## Subscriptions

An annual subscription to Biochemistry Abstracts: Part 2, Nucleic Acids includes twelve monthly issues, each containing author and subject indexes and the twelfth issue comprising the annual cumulation of both indexes. Subscriptions are entered on a calendar year basis only.

#### Annual subscription rates

Full details of surface and air delivery rates in the various geographical areas shown below can be obtained from the appropriate office or agent.

#### Japan

US Asiatic Company Limited, Tsutsumi Building, 13-12 Shimbashi 1-chome, Minato-ku, Tokyo 105, Japan

#### India, Sri Lanka, Bangladesh, Nepal, Burma, Malaysia, Singapore, Indonesia and Thailand

Universal Subscription Agency Pvt. Ltd., 117/Y-1/294 Model Town, Pandu Nagar, Kanpur 208005, India

#### Israel

N.P.K. Meida Ltd., P.O. Box 10127, Tel-Aviv 61101, Israel

#### Rest of the world

### Foreword

#### **Biochemisty Abstracts: Part 2, Nucleic Acids**

(formerly Nucleic Acids Abstracts) commenced publication in 1971 and is published monthly. Each issue contains approximately 700 abstracts followed by author and subject indexes.

#### Coverage

In compiling each issue, CSA's editorial staff monitors approximately 5,000 primary journals and other source references for papers falling within the scope of the journal.

### Subject scope and arrangement of subject matter

The table of contents shows the full scope of the journal. Every paper citing any physical, chemical or biological aspect of nucleic acids, nucleoproteins, nucleotides, nucleosides, and related purines and pyrimidines is reported. Papers relating to nucleotides will be included only where they are of direct relevance to the nucleic acids themselves. Abstracts are allocated to the section (subsection) to which they are most relevant and cross-referred to other sections (subsections) where appropriate.

#### Using this journal

Full details of the bibliographic data cited for each abstract and of abbreviations used can be found in the first issue of each volume.

#### **Author Index**

## Subject Index

Abdominal ganglion,

neuropeptides, egg laying, water balance genes, gene expression, Aplysia 7118. Abelson leukemia virus,

Delson leukemia virus,
c-abl gene transcription, translocations, myeloid leukemia (chronic), man 4380
gag gene, v-abl gene, nucleotide sequence, relationship transformation
hibroblasts, ymphoid cells, mice 401.
transformation, lymphoid cells association, immunoglobulins heavy chains,

transformation, lymphoid cells association, immunoglobulins heavy chains, variable region fragments, organization 7437. 
transformed cells, immunoglobulins heavy chains variable region genes, restriction endonuclease mapping, cDNA nucleotide sequence 393, transformed cells, mRNA, regulation protein p53 biosynthesis 5099. 
Absorption spectroscopy, 4-acetoxyaminoquinoline-1-oxide interaction DNA, quantitation adducts formation 6032.

acriflavin, tetramethylacriflavin, acridine orange, binding DNA, calf thymus 273. adenine, 2-aminoadenine derivatives, poly(5-bromouridylic acid) helix formation 3591

chromatin core particles, thermal denaturation, erythrocytes, chickens 6271. cytidine 6335

cytidine 6335.

5.6-dihydroflavopereilrine, sempervirine binding DNA 5124.
flash photolysis intermediates, adenine, derivatives 3532.
gold+DNA complex 4467.
lactose repressor binding DNA, Escherichia coli 2079.
porphyrins binding calf thymus DNA 279.
2-propanol role, RNA 5740.
4-thioundine triplet state 3548.
U.V. radiation effects on DNA helix-coil transitions, phage T7 4448.
U.V. radiation induction DNA, psoralen derivatives binding 3766.

G.v. radiabilità, accetabularia, chioropiasts, closed circular DNA, charactenzation 5333.

Accetabularia mediterranea,
RNA migration, dark, cycloheximide, cytochalasin B effects on 167 Acetaldehyde, intrauterine exposure, induction chromosome aberrations, rats 2752. Acetamidase,

genes, plasmid pBR322, protoplast fusion, integration Aspergillus nidulans 2606.

\*\*Acetamildobenzamilde, inhibition ADP-ribosyl transferase, effects on DNA repair, radiation damage, cell lines 6712.

Acetaminophen induction necrosis, poly(I·C) inhibition, liver, mice 2736.

Acetic acid, +aniline+ozone, degradation, tRNA 3594

Acetic anhydride, carbamylation, chromatin, liver, rats 2050.

nucleosomes core particles acetylation, induction unfolding 5556. Acetobacter acetl xyllnum,

endodeoxyribonuclease, purification, characterization, nucleotide sequence cleavage 3402.

Actobacterium woodli, rfNA cistrons, companson methodology, Clostridium, Eubacterium limosum, Eubacterium tenue, Veillonella 1524.

Acetone,

effects on DNA structure, fluorescent probes 5147.

Acetophenone,
+U.V. radiation, characterization induction cytosine containing pyrimidines

+U.V. radiation, characterization induction cytosine containing pyrimidines dimers, Escherichia coli 451.

N-Acetoxy-2-acetylaminofluorene, 2-acetylaminofluorene, 2-acetylaminofluorene, 2-acetylaminofluorene, 4-caffeine, ± phenobarbitone, sister chromatid exchange, rats 7661.

effects on DNA methylation, inheritance, mice 6523.

induction DNA repair, correlation cigarette smoking, leukocytes (mononuclear),

induction DNA repair, correlation cigarette smoking, leukocytes (mononucliman 2466: interraction satellite DNA, bases specificity, calf thymus 5148. modification DNA, bases specificity, phage ФX174 969.

\*\*Acetoxy-2-aminofluorene\*\*, - DNA adducts, preparation methodology, phage ФX174 936.

\*\*Acetoxy-amino-quino-line 1-oxide\*\*, DNA, double-stranded poly(G3-G0; chemical modification, effects on DNA (cytosine-5-)-methyltransferase methylation, brain, cattle 1331.

interaction DNA, absorption spectroscopy, quantitation adducts formation 6032.

α-Acetoxylsobutyryl bromide,
chemical modification adenosine 4246.

2-Acetoxyletrahydrofuran,
condensation 5-fluorouracil, reaction mechanisms 4925

5-O-Acetyl-2, 3-O-leopropylideneuridine,
structure 4252.

Acetyl-CoA, dependent enzymes, activation mutagens, binding DNA, Salmonella typhimurium 1604 Acetyl-CoA synthetase, interaction 5-aminoacyladenylate phosphonate analogs 4958.

interaction 5'-aminoacyladenylate phosphonate analogs 4958.

B-N-Acetyl-D-glucosaminidese, precursors, post-translation processing, cell-free systems, occytes, Xenopus

5831

effects on dinucleoside monophosphates conformation, N.M.R. 3561. iodine denvatives, interaction dinucleoside monophosphates, conformational

iodine derivatives, interaction dinucleoside monophosphates, conformational analysis 3580, poly(dC-dG) adducts, effects on DNA methyltransferase kinetics 4830.

2-Acetylaminofluorene, had be a conformation of the conformation

methodology 7339 methodology 7339 methodology 7339 methodology 7349 method

2-Acetylaminofluorene, (continued)

Acetylation

histone H2B, variants, characterization, testes, rats 6951. histones, estradiol effects on, progesterone, tamoxifen modulation, uterus,

histones, estradiol effects on, propesterone, tamoxifen modulation, uterus, fetuses, guinea-njas (6275, histones, post-translation, antibodies affinity (6979) histones, rolationship RNA biosynthesis, nuclei, liver, rats 3461, histones, sodium butyrate effects on, carcinoma, breast, cell lines 6256 histones, sodium butyrate effects on, cell lines 2778, nucleosomes core particles, induction unfolding 5556 post-translation, poly(ADP-ribose) modification, relationship, chromatin, nucleosomes 6974, relationship chromatin conformation, high mobility group protein 17 effects on, HeLa cells 7658.

HeLa cells 7658. tes, histone H4, Physarum polycephalum 1355.

sites, histone H4, Physarum poycepnaium 1355.

N-Acetylicharzidine,
binding DNA, characterization, liiver, rats, hamsters 3740.
Acetylichaline receptors,
biosynthesis, translation regulation, skeletal muscle, mice 7048.
cloning, gene regulation, reviews 7007.
gene expression, mRNA micronijection, electric organs, Torpedo 7604.
genes, nucleotide sequence, evolution, chickens 732.
muscarinic, guanine nucleotides effects on activity, cell membranes, cortex, rats

5056.

nicotinic, nucleotide sequence, reviews, Torpedo californica 7006. 
subunits, cloning, DNA nucleotide sequence, skeletal muscle, cattle, man 1725. 
subunits genes, nucleotide sequence, electric organs, Torpedo californica 7329. 
Acetylcholinesterase, 
Ace locus, DNA, gene mapping, chromosome 3, Drosophila melanogaster 3775. 
mRNA, levels, embryogenesis, Ciona intestinalis 4725.

Acetylene,

derivates, metabolic activation, binding DNA, mechanisms 5844.

Acetylornithine aminotransferase.

genes, transformation, Escherichia coli 2572 Achlya klebsiana,

mitochondria DNA, repeated sequence 7238. Acholeplasma laidiawii,

protoplast fusion, transformation, polyethylene glycol induction 4008

+phenois, extraction DNA, RNA 5836.

Acinar cella, clastogenicity, N-nitroso-bis(2-oxopropyl)amine, pancreas, rats comparison hamsters 2330. Acinetobacter, plasmids, genetic control aromatic compounds biodegradation pathway 6303. Acinetobacter calcoaceticus, transposon Tris site-directed mutagenesis, restriction endonuclease mapping, hybridization analysis 2623.

Acipenser stellatus, nuclei, transplantation, effects on chromosomes conformation nuclear envelopes

6283 effects on 6-thioguanine metabolism, cytotoxicity, leukemia 1210, mice 4934

effects on 6-thioguarine metabolism, cytotoxicity, leukemia 1210, mice 4934. Aclacinomycln A, inhibition DNA biosynthesis, phage ΦX174 465. metabolites, effects on DNA biosynthesis, RNA biosynthesis, structure-activity relationships, Friend erythroleukemia cells 1134. structure-activity relationships, induction DNA repair, mutagenesis, tumorigenesis 4629.

Acremonium, rRNA 5S, nucleotide sequence 7396

derivatives, DNA interaction, linear dichroism 266. dyes, intercalation DNA, mathematical models 5889.

oyes, intercatation Tark, misurentaniaa moders soos.

Acridine orange, all thymus, absorption spectroscopy 273.

DNA binding, effects on structure 951.

inactivation, ribosomes, oxygen roles 6385.

induction peroxide radical, DNA, poly(dG-dC), photosensrtization, E.P.R.

inhibition RNA polymerase interaction superhelical DNA, Escherichia coli 585, interaction polyribonucleotides, polydeoxyribonucleotides, DNA calf thymus, characterization 3572.

characterization 3572.

4. Actridinylamino)methane sulfone-anisidide,
+ nucleus components, induction clastogenesis, cell lines 1625.

4. G-Actridinylamino)methanesulfon-m-anisidide,
+ copper induction DNA breaks, mechanisms, oxygen, free radicals role 5128.
+ copper induction DNA breaks, plasmid pDPT275, plasmid pBR322 5129.
4. G-Actridinylamino)methanesulfonanisidide,
use, DNA sedimentation 2304.
Actridiavia.

Acriflavin

binding DNA, calf thymus, absorption spectroscopy 273. clastogenesis, genetic analysis DNA repair, Vibrio cholerae 2471. Acrolein,

induction 1,N-2-propanodeoxyguanosine DNA adducts 4457.

Acrylamide,
effects on cell cycle, Escherichia coli 1143.
gels, DNA transfer, electrophoresis, pyroxylin 5105.

gets, DNA transfer, electroprioresis, pyroxym 3105. Acrylonitrfler, binding proteins, RNA, DNA, stomach, brain, rats 3718. effects on RNA biosynthesis, ribosomes biosynthesis, Saccharomyces 7057.

Actin, analogs, purfication, stimulation RNA polymerase II 7160. biosynthesis inhibition, translation, adenovirus (human) 2 infected HeLa cells 6494.

α-cardiac isotypes, mRNA, RNA biosynthesis, embryogenesis, skeletal muscle,

chick embryos 6487.
deoxyribonuclease I complex structure, gadolinium induction, electron microscopy
4796.

4796.
effects on mRNA polyadenylation regulation, reviews, eukaryotes 4906 effects on mRNA polyadenylation regulation, reviews, eukaryotes 4906 gene expression isotypes, hybridization analysis, muscles, embryos, constitutive. Strongylocentrolus purpuratus 4397. gene expression, nucleotide sequence, development, heart cells differentiation, skeletal muscle, ratio 7302.

gene expression, relationship differentiation, cell lines mice 7136

Ademine, roominised)

- Ihymne base pairs, hydrogen bonding, sodium effects on 4292.

Ademine base pairs, hydrogen bonding, sodium effects on 4292.

Ademine abmosted,
incorporation DNA, alkalianiny lability, characterization 3744.

Ademine methyltransterase,
activity, Phage T1 induction, Escherichia coli 1999.

Ademine nucleotides,
analinos photnetificini, labilitica. gene families, gene expression relationship development, Strongylocentrotus purpuratus 6471. population 09/16.
gene regulation, expression, cell cycle, Tetrahymena pyriformis 3262.
genes, Dictyostelium discordeum, HeLa cells, cell-free system RNA biosynthese, actin, Dictyostelium discordeum, HeLa cells, cell-free system RNA biosyntheses 5823. Adenine nucleotides,
analogs photoaffinity labelling, pyruvate kinase, muscles, rabbits, isocitrate
dehydrogenase (NADT), pigs 5647.
depletion, relationship 6-methylmercaptopurine inhibition purines biosynthesis.
lymphoma cell lines, mice 67.
levels, cell proliferation, Vincar osea 66.
Adenine phosphoribosyttransferase,
APRT gene, restriction fragment length polymorphism, hybridization analysis, m
7353.
and lines, mutation mechanism. genes, hybridization analysis, Pisaster ochraceus 7237 genes, nyondization analysis, Pisaster ochraceus 7237.
genes, skolation, comparison skeletal muscle, heart, man 1643.
genes, mapping, chromosome 6, Saccharomyces cerevisiae 4552
genes, mucleotide sequence, Glycine max. Zea mays 3807.
genes, nucleotide sequence, skeletal muscle gene expression, heart, rats 2929.
genes, structure, comparison v-frg gene, nucleotide sequence, feline sarcoma
virus 3739. VIII. 3 793. genes, transformation, gene expression, man 4085. genes, transformation, gene expression, skeletal muscle, heart. man 1578 mRNA, detection methodology. Caenorhabdftis elegans 165. mRNA, gene expression, lymphocytes activation, man 6451. mRNA nucleotide sequence, skeletal muscle, man 7109. apri locus, mutation mechanisms, heterozygotes, hemizygosity, CHO cells 1633 apri locus, nucleotide sequence, dTTP, dCTP levels effects on, CHO cells 7394 Adeno-associated virus. Adeno-associated virus, cloning, transfection 507. deletion mutant, DNA repeated sequence role cloning 520. deletion mutant, effects on DNA biosynthesis 6705. DNA biosynthesis, role nucleotide sequence, conformation 5339. early region gene products, role helper viruses activity, Vero cells 4604. Adeno-associated virus 2, NAA biosynthesis, publicities analysis 4607. mRNA, post-transcription processing, mutation effects on, Saccharomyces cerevisiae 5786. mRNA translation, cDNA gene libraries construction, Plasmodium falciparum 4322. subunits, deoxynbonuclease I binding sites, peptide mapping 4099. G-Actin insertion, deletion mutant, DNA biosynthesis, hybridization analysis 4603. Adenocarcinoma, deoxyribonuclease I complex, X-ray diffraction, chickens 5498 DNA, 5-fluorouracil interaction, colon, man 6534, podophyliotoxins derivatives induction DNA clastogenesis, lung, man 3014. Adenomatosis, repair action of the colon of the c genes, promoters, nucleotide sequence, skeletal muscle, rats, chickens 1780. β-Actin, genes, cDNA nucleotide sequence, gene libraries, cytoplasm, chickens 1740 genes, nucleotide sequence, man 3085. relationship sister chromatid exchange, man 3473 Actinidia chinensis, plant breeding, Ti plasmid gene transfer 2565. Adenosine, α-actionyisobutyryl bromide chemical modification 4246.
amino acids substitution effects on DNA conformation, C.D., I.R. spectroscopy, N.M.R. 2185. Actinomine, interaction DNA, spectrophotometry, viscometry, birefringence 967 interaction DNA, spectroprotometry, viscometry, pretringence 997.

a Actinomycetes,
aminoglycoside antibiotics, production, genetic engineering 4016.
a actinotycoside antibiotics, production, genetic engineering 4016.
a interaction, plants, pathogens, genetic engineering, books 4892.
plasmid pO415, plasmid pOA7, plasmid pOA11, plasmid pOA29, plasmid pOA29, plasmid pOA30, characterization 5233.
a. Acthoracy in the production of the production of the position of the production N.M.H. 2185. amino group protection, use 2-nitrophenylsulfenyl 4245. amino group protection, 9-fluorenylmethoxycarbon, oligoribonucleotides, oligodeoxyribonucleotides synthesis 2168. d analog, synthesis 5629. analog, synthesis obes.
 analog, tubercidin, synthesis, N.M.R., binding endonuclease 2'-5'-oligo(A) dependent, L. cells, mice 4973. Actnomycln, binding oligodeoxyribonucleotides, helix, N.M.R. 792. binding sites, lactase operon, footprinting, Escherichia coli 261. derwatives, binding DNA 74. DNA biosynthesis binding, association aging, diploidy, fibroblasts, mice 470. sensitivity, RNA biosynthesis, hematipoiesis, stem cells 4398. Acthomyclin D, binding DNA, spectrophotometry, a radiation effects on 269. binding oligodeoxyrbonucleotides, conformation 72. binding single-deoxyrbonucleotides, conformation 72. binding oligodeoxyrbonucleotides, conformation 72. DNA binding oligodeoxyrbonucleotides, conformation 72. DNA binding oligodeoxyrbonucleotides (NA biosynthesis, DNA nucleotide sequence, phage T7 DNA binding specification and conformation 72. DNA binding specifications (NA biosynthesis, DNA nucleotide sequence, phage T7 DNA binding specifications). obsparied in Lorens, lines 497.3 analogs, endonbonuclease substrate specificity, L cells, mice 6886. analogs, 8,5'-anhydroadenosine, synthesis, conformation 5632. assays, use liquid chromatography+fluorometry 2129. dephosphorylation, comparison reactivity undine, thymidine dephosphorylation, oepitospholyalut, comparison reactivity owner, thyminine depitor role metals 753. derivatives, isolation, synthesis, phage Mu 2140. derivatives, purification, biological activity, Cordyceps, Isaria 4239. derivatives, synthesis 52. derivatives, synthesis c. conformational analysis 4244. effects on cyclic AMP levels, kidney, rats 6332. ellipticine derivatives alkylation, stereoselectivity 5638. billion states, initiation in the obsymbers, both indeedide sequence, plage 1557.

DNA binding specificity, cooperativity 1620 inhibition protein biosymbesis, CHO cells 1492, inhibition protein biosymbesis, CHO cells 1492, inhibition spoty (dG-dC), B-form, Z-form transitions 1452, interaction call thymus DNA, N.M.R. 2176, 1010 cells on the cell cycle interaction cells on the cells of the cell hypoxanthine = platelet-derived growth factor, stimulation DNA biosynthesis, L. cells 3256. biosymmesis, Leuis 3250. induction buds, Hyophila involuta 2125. inosine conversion, IRNA Asp, role anticodons nucleotide sequence, yeasts 704-lipolysis regulation, adipocytes, rats 749. metals, chelation, characterization 3563. methylation, residues mRNA synthesis, transport, SV40 infected cells 1570. oligonucleotides, 5'-terminus capping, synthesis, inhibition protein biosynthesis 2164. 2164.

Oligonucleotides, effects on caps degradation, nuclei, liver, rats 2196.
oligonucleotides, stability, serum, chickens 2197.
oligonucleotides, synthesis, phosphotriseter method 2163.
oligonucleotides synthesis, 1-(p-nitrophenyl-ethoxycarbonyl)-benzotriazole,
1-methyl-3-(p-nitrophenyl-ethoxycarbonyl)-imidazolium chloride amino group
protection 2130. hosphorylation, use aluminum derivatives 4945. polys-bromoundylic acid interaction, thermodynamics, equilibrium dialysis, melting, calorimetry 5636, suppression, lymphocytes T DNA biosyntnesis, mice 3874, toxicity, lymphocytes B, lymphocytes T, leukocytes (granulocytic), cell culture man 56. synthesis 50. ante Adducts,
DNA, 9, 10-dimethyl-1,2-benzanthracene, manmary gland, liver, rats 7194,
formation, 5-methylchrysene interaction DNA, calf thymus, N.M.R., U.V.
spectroscopy, mass spectroscopy, high-performance liquid chromatography 5118.
Adenia volikensii, . man 56.
transition metals complex, structure, E.S.R. 2151.
Adenosine arabinoside,
analogs, antiviral activity, effects on cardiovascular system 4262.
derivatives, synthesis, antiviral activity, herpesvirus 3534.
drug resistance, association DNA incorporation cytosine arabinoside, herpes
simplex virus 1649. volkensin inhibition, protein biosynthesis, HeLa cells, reticulocytes, rabbits Adenine adsorption silver colloids, surface enhanced Raman scattering spectroscopy 4922. alkylation analogs, synthesis, methodology 2121. 3-amnopropylamino derivatives, synthesis, adenosylhomocysteinase inhibitors effects on DNA precursors levels, interaction herpes simplex virus 1, HeLa cells 6309.
analogs, methylation, synthesis, structure 3528.
analogs, proteins interaction, role protons 2122.
analogs, synthesis, methodology 2119
depletion effects on DNA biosynthesis, lymphoma cells, mice 5399.
denvatives, lash photolysis intermediates, absorption spectroscopy 3532.
derivatives, formation poly(5-bromouridylic acid) helix, C.D., absorption
spectroscopy 3591.
derivatives, induction leukocytes levels, toxicity 35.
electrons orbitals localization 4233
+ guanine, base pairs, oligodeoxynbonucleotides, N.M.R. 115.
induction buds, stacking, conformational analysis, energetics 3531.
induction touts, Hyophila involuta 2125.
induction DNA, 9,10-dimethyl-1,2-benzanthracene binding induction, embryo cells,
interaction formaldehyde, amines effects on 3743. 2823 metabolism, effects on DNA biosynthesis, leukemia, mice 6084, synthesis 52. Adenosine deaminase,
ADA gene, cDNA isolation, hybridization analysis, gene mapping, chromosome 25
man 5921. man 5921.

cDNA, introns, nucleotide sequence, man 3160.
genes, gene libraries, mRNA probes, lymphoblasts, man 2620.
genes, nucleotide sequence, RNA biosynthesis, deficiency, severe combined immunodeficiency, man 3192.

mRNA levels, lymphoblastoid cell lines, man 2268.

mRNA, structure, mutants, lymphoblasts, cell lines, man 7100.

Adenosine dialdehyde, inhibition adenosylipmotycsteinase artivity. Scalenosylmethydyne methydation. inhibition adenosylhomocysteinase activity, S-adenosylmethionine methylation, mice 6923 mice 6923.

Adenosine Kinase,
Inhibition. 4-amino-5-bromo-pyrrolo[2,3-d]pyrimidine Echinodictyum,
5-deoxy-5-idotubercidin 1-yipnea valentiae 4269.

Adenosine-3-eiktylphosphates,
effects on ribonuclease T2 kinetics, Aspergillus oryzae 1958.

Adenosine-7-eiktylphosphates. interaction formaldehyde, amines effects on 3743.
malondialdehyde effects on, amino groups adducts, cyclopropane ring formation 6311.
methylase substrate specificity, DNA, thymus 3425.
methylation effects on DNA conformation equilibrium 6670.
methylation, hydration, mass spectroscopy 4928.
methylation, rRNA 23S, gene regulation antibiotic resistance, bacteria 7524.
\*N4-methoxycytosine complex, N.M.R., I.R. spectroscopy 33.
oxidation, rRNA 55 structure, escherichia coli, Bacillus stearothermophilus,
Thermus thermophilus 4367. effects on ribonuclease 12 kinetics, Aspergillus oryzae 1958.

Adenosine-5'-alkylphosphates,
effects on ribonuclease 72 kinetics, Aspergillus oryzae 1958.

Adenosine-5'-phosphorodiamidates,
solubility, relationship conformation, N.M.R., C.D. 5654.

Adenosine-5'-tetraphosphate-5'-guanosine,
assays, high-pressure liquid chromatography, Physarum polycephalum, Saccharoma

residues excision, y radiation, DNA glycosylase role, Escherichia coli 7470

Adenosine-5'-tetraphosphate-5'-guanosine, (continued)
corevisiae, rats 5651.

Adenosine-5'-tri-metaphosphates,
EINA polymerase substrate specificity, affinity labelling, Escherichia colli 6903.

Adenosine-tri-metaphosphatese,
comparison cytochrome c oxidase genes, restriction endonuclease mapping,
processing, mitchondria, saccharomyces cerevisiae 4347.

Coubling faraded oligoribonucleoides similation 2195.

DNA dependent, purification, characterization, Het.a cells 2000.

double-stranded oligoribonucleoides similation 2195.

Coul 5312.

B-subunit, e-subunit overlaid genes, nucleotide sequence, plasmid pfXY159, Escherichia Adenovirus (numar) 2, coll 5312.

B-subunit, e-subunit overlaid genes, nucleotide sequence, chloroplasts, Nicotiana tabacum 6005.

Nicotiana

Advances y memoration in a manage, regulation transcription, mRNA methylation, translation, cytoplasmic polyhedrosis virus 1561. levels, rRNA 5.8S methylation, cell culture age, oncogenesis 6439. metabolism, 5'-deoxy-5'-methythicadenosine effects on, transformed cells, rats

metabolism, role, hydrazine, DNA methylation, liver, rats 957

methylation, adenosine dialdehyde inhibition, mice 6923
Adenovirus,

Addressine diadensine discontinuon, mine 6923.

chromatin core protein, DNA interaction, C.D., U.V. radiation cross-linking 6273.

chromosomes, replication origin, nucleotide sequence 5259.

DNA biosynthesis, DNA-binding protein, DNA polymerase, purification, characterization 596.

DNA biosynthesis, replication origin, reviews 4212.

DNA biosynthesis, replication origin, reviews 4212.

DNA biosynthesis, replication origin, reviews 4212.

DNA biosynthesis, RNA biosynthesis, genetic analysis, books 4900.

DNA biosynthesis, RNA biosynthesis, nucleotide sequence, reviews, books 4896.

DNA integration, role early region 1, eukaryotes infection 3889.

DNA, magnetic birefingence 1521.

DNA, nucleosides isolation, use formic acid 2128.

DNA replication, mechanisms, reviews 1401.

DNA, restriction endonuclease mapping 4519.

cDNA, cloning methodology 3352.

s, books 4898

DNA, restriction endoruclease mapping 4519.

CDNA, cloning methodology 3352.

CDNA, cloning methodology 3352.

BNA, cloning methodology 3352.

BNA, restriction DNA, nucleotide sequence, Tupaia belanger 5909.

BNA, region DNA, nucleotide sequence, regulation RNA biosynthesis 3649.

BNA, region proteins, induction viruses gene expression, transformed cells 7508.

fructose-bisphosphatase fbp gene, transformation, deletion mutant, Escherichia coli 4769

coil 4769

6-D-galactosidase lac2 gene containing, use cloning yeasts genes 1197, gene amplification, Saccharomyoes cerevisiae 3377, gene amplification, Saccharomyoes cerevisiae 3377, gene expression, transfection, monkeys cell lines 563, gene fusion, construction, use staphylococcus protein A genes 1255, gene fusion, construction, use staphylococcus protein A genes 1255, gene fusion, construction, use staphylococcus protein A genes 1255, gene transfer, methodology, plants, books 1399, genetic engineering, use, adenovirus (fuman) 5 deletion mutant 6842, herpes simplex virus, histocompatibility locus HLA A2 region, B7 region, transfection, gene expression, mice host systems 2693, herpes simplex virus thymidine kinase genes use, characterzation Mammalia promoters 4757.
herpes simplex virus 1, transfection, eukaryotes DNA DNA biosynthesis, size effects on 6839, unimber 2 u. olasmid, construction, transformation, Saccharomyces

high copy number 2  $\mu$  plasmid, construction, transformation, Saccharomyces cerevisiae 1250

cerevisiae 1250.

hybrids, gene fusion, lactose operon, reviews, Escherichia coli 3375.
influenza virus hemagglutinins, eukaryotes 5469.
linear plasmids, construction, yeasts 1248.
liposomes, Escherichia coli 3369.
methodology, Agrobacterum tumefaciens, plasmids, Ti plasmid, recombination 6851.
mobilization, use R factor R68.45, Escherichia coli 4050. mobilization, u phage λ 1243.

phage  $\lambda$ , construction, characterization 2630. phage  $\lambda$ , DNA genes, transduction, Aspergillus nidulans 3961

phage A, DNA genes, transduction, Aspergillus nidulans 3961.
phage A, reviewe, books 4198.
phage A, reviewe, books 4198.
phage A, tryptophan operon transduction, methodology, Eschenchia coli 3962.
phage A, use, genetic analysis, methodology, reviews 3524.
phage A, tryptophage S, site-directed mutagenesis methodology 4745.
phage AgtWES, closed circular DNA transduction, bovine leukemia virus 1892.
phage Mu Chloramphenicol antibiotic resistance, lactose operon, gene fusion,
Escherichia coli tranduction 4750.
phage Mu Eschenchia coli lactose operon hybrids, gene fusion analysis gene
expression 1265.

phage Mid Ladritum a contractors operating management analysis general expression 1265.

phage Mu, transposons containing, use gene fusion, β-D-galactosidase hybrids 2652.

phage M13 1242

phage M13, endodeoxyribonuclease excision 1245, phage M13, transduction, association plasmid pC194 replication, Escherichia coli 2534.

2534
phage M13, IRNA genes, Alu family repeated sequence cloning, HeLa cells 1159, phage M13, use DNA nucleotide sequence determination 996, phage M13mp, histidine operon transduction, Salmonella typhimurium 2540, phage M13mp7, β-interferon genes, gene expression 2669, phage M13mp7, phage M13mp701, endodeoxyribonuclease Hindilli cleavage sites insertion, N-terminus β-D-galactosidase N-terminus transduction, gene expression 7576.

phage P1 cosmids 4039.

hage P4 cosmids 4039.

phage Tg13, transduction, Bacillus thuringiensis galleriae 2546. phage 031, transduction thyP3 gene, gene mapping, host systems Bacillus subtilis 2533.

prage 931, Tansbuction try 5 gene, gain inapprag.
subtilis 2533.
phages+plasmids, recombination, characterization 2648.
plant viruses use induction male sterility, plant breeding, reviews 10.
plasmid NAH7, naphthalene oxidation genes transformation, gene expression,
Pseudomonas putida 1949.
plasmid pACKC1, transformation plasmid pAMβ1 replication origin,
Streptococus faecalis 2557.
plasmid pACYC184, F factors leader sequence stabilization 6846.
plasmid pACYC184, pri gene transformation, characterization, Klebsiella pneumoniae 2552.
plasmid pANL, gene mapping, hybridization analysis, replication origin, Anacystis nidulans 2373.
plasmid pBN, transformation megacin genes, Bacillus megaterium 2574.
plasmid pBN TK-1, construction, BK virus+plasmid pML-1, characterization, man cell lines. Eschenchia coli 6848.
plasmid pBR 322, glutathione synthetase genes transformation gene amplification.

Cloning vectors, (continued) Escherichia coli 2667

plasmid pBR322, β-D-galactosidase genes transformation, Klebsiella pneumoniae 2571.

25/1.

plasmid pBR322, β-lactamase genes, transformation, gene expression, temperature-sensitive mutant, Escherichia coli 2676. plasmid pBR322, acetylorinthine aminotransferase genes transformation, Escherichia coli 2572.

plasmid pBR322, DNA transformation, chloroplasts, chromosomes, Nicotiana tabacum

2003, plasmid pBR322, endo-1,3-β-D-xylanase, exc-1,4-β-D-xylosidase genes, transformation, Bacillus pumilus 2678. plasmid pBR322, maloiactic fermentation genes transformation, Lactobacillus

plasmid pBR322× plasmid pDU1 hybrids, Anabaena, Escherichia coli host systems 4752 plasmid pBR322, ribulosebisphosphate carboxylase genes transformation,

plasmid pBH322, triunioseuspinospinate cardoxyrase genes dansionnation, Rhodopseudomonas sphaeroides 2568. plasmid pBR322, threonine operons transformation, Escherichia coli 1910, plasmid pBR322, transformation aminobenzoate synthetase genes, Escherichia coli 2685

plasmid pBR322, transformation, capsid protein genes, rotavirus (simian) SA11 plasmid pBR322, transformation Corynebacterium diphtheriae toxins genes.

plasmid pBH322, transformation Corynebacterium diphtheriae toxins genes, Eschenchia coli 1948 plasmid pBH322, transformation DNA Bordeteila pertussis 2555. plasmid pBH322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBH322, transformation rotavirus genes 1919. plasmid pBH322, use R factor RE-5 transformation 4051 plasmid pBH325, ribulosebisphosphate carboxylase genes transformation, Rhodospirillium rubrum 2675.

Hinddospinium rubrum 2015, plasmid p842, Bacillus and policy plasmid p8542, Bacillus avolidis and plasmid p8542, Bacillus avolidis avolidi

plasmid pDH5060, stability, Escherichia coli transformation Bacillus subtilis 2653

2053.

plasmid pEX1-3 construction, liver proteins specificity, bacteria 6145.

plasmid pHG, tetrahydrofolate dehydrogenase genes transformation, induction methotrexate resistance. Drosophila 2580.

plasmid pHS12, hepatitis B surface antigen genes insertion, transformation Escherichta coli 1942.

plasmid pJJ41, transformation aminobenzoate synthetase genes, Streptomyces lividans 2685.

Invidans 2685.
plasmid pINI, characterization 1935.
plasmid pIKC30 1246.
plasmid pKC30 1246.
plasmid pKC30, onstruction, use DNA repair genes cloning, Escherichia coli 1192.
plasmid pKC30, phage λ O gene transformation 695.
plasmid pKL6, transformation β-D-galactosidase genes, Escherichia coli 2692
plasmid pLG4 containing ary5 gene, transformation yeasts 2558.
plasmid PNF2000, RAD2 gene, hybridization analysis, Saccharomyces cerevisiae

2416

plasmid pPL608, recA gene transformation, gene expression, Eschenchia coli 2679, plasmid pRC3, transformation leucine genes, ARS site, Candida mattosa 2569, plasmid pRD1, nitrogen fixation nif gene transformation, Enterobacce 535

535. plasmid pSAP21, β-lactamase genes, transformation, host systems, Bacillus comparison Eschenchia coli 4075. plasmid pSAS1206, Escherichia coli 5474. plasmid pSN, transformation sucrose fermentation, nisin biosynthesis,

Streptococcus lactis 2561.
plasmid pSV2gpt, hepatitis B core antigen genes transformation, expression, man

1947

pasmid povzgin, inepatitis o core antiger genes transformation, influenza A virus 1952. 
plasmid py 20230, neuramindase genes transformation, influenza A virus 1952. 
plasmid py 15-610, transformation Escherichia coli 1253. 
plasmid py 15-610, transformation ascherichia coli 1253. 
plasmid py 17-13, construction, Bacilius subitiis 47-60, plasmid py 18-13, construction, Escherichia coli 1936. 
plasmid py 18-13, construction, experientia coli 1936. 
plasmid py 18-10, transformation protoplasts Clostridium acetobutylicum 75-84, 
plasmid py 18-10, protoproperation py 18-10, protoproper

plasmid p5V2-gpt, genetic markers, transformation RNA genes, Epstein-Barr virus

2581. 

p plasmid, STE gene transformation, Saccharomyces cerevisiae 1199. 
plasmid YRp7, transformation DNA Saccharomyces cerevisiae 1914. 
plasmide pG051.14 transposon Tn951, use lactose operon, Zymomonas mobilis 551. plasmids, antibiotic resistance, transformation, expression, Bacillus subtilis 2567

2567.
plasmids, construction, transformation, host systems, Bacillus brevis 4761.
plasmids, construction, tryptophan promoter, Escherichia coli 4762.
plasmids, construction, use characterization Streptomyces 3373.
plasmids, construction, yeasts + bacteria 1938.
plasmids, Escherichia coli, HSP90 gene transformation, association 8-D-galactosidase activity, Saccharonyces cerevisiae 1874.
plasmids, Escherichia coli, transformation SNF1 gene Saccharomyces cerevisiae

plasmids, exo-1,4-α-D-glucosidase genes, transformation, Saccharomyces diastaticus 2575

diastaticus 2575.
plasmids, gram-negative bacteria 4041.
plasmids, hygromycin B phosphotransferase genes transformation, Escherichia coli, Saccharomyces cerevisiae 2682.
plasmids, phages, DNA integration methodology 1244.
plasmids, plasmid pE6, gyrA gene transformation, gene expression, Bacillius subtitis 680.

subtilis 6803

plasmids, radioactive labelling, use phage T4 DNA polymerase 1982 plasmids, somatotropin genes transformation, expression 1953 plasmids, survival analysis, Escherichia coli 7579

plasmids, transformation hepatitis B surface antigen 2687

Coegulation factor X, cDNA, nucleotide sequence, precursors characterization, liver, cattle 7098. Cloning vectors, (continued)
plasmids, transformation methodology, Neurospora crassa 2578.
plasmids, yeasts gene fusion, galactokinase genes transformation. Escherichia coli 2677. Coal, ash, induction hyperplasia, carcinoma, DNA biosynthesis, trachea, hamsters 3915 coli 2677.
polydeoxyribonucleotide synthetase genes, U.V. radiation, X radiation, sensitivity, Haemophilus influenzae 4044, preparation, fermenters, phages, Rhuxobium meliloti 4048, production single stranded DNA, nucleotide sequence 4061, promoters, production, plasmid p8RH4 5416. protoplasts regeneration, protoplast fusion use. Bacillus subtilis 4759, rats insulin genes, termination factors, Escherichia coli 4084, retrovirus, bacteria neomycin resistance gene transfer, hematopiesis stem cells, mico 514, fed. in hymrithe kinase penes, association promoters. Coat protein, binding sites, RNA, affalfa mosaic virus, tobacco streak virus 4356.
genes, DNA nucleotide sequence, phage Pf3 1641.
genes, ribosomes binding sites, 5'-terminus effects on protein biosynthesis, phage MS2 1169. phage MS2 1169. lysine residues amidination, DNA, phage fd, transfection Escherichia coli 3302. nucleotide sequence, amino acid sequence, phage Pf3 4492. precursors, protein biosynthesis, RNA, Solanum nodiflorum mottle virus 2986. RNA binding specificity, phage R17 1394. RNA biosynthesis, gene regulation, satellite tobacco necrosis virus 6767. tobacco mosaic virus, mRNA, RNA biosynthesis, protoplasts, Nicotiana tabacum 3666. mice 514.
retrovirus, infection, thymidine kinase genes, association promoters, α-globin retrovirus deletion 3232
retrovirus, production, use gene transfer mammalian cells, avian cells 7583 spleen focus-forming virus 1263.
stability, plasmids autonomously replicating sequence, Saccharomyces cerevisiae host systems 4070. Cobalt(III). tris o-phenanthroline complex, double-stranded helix cleavage, stereospecificity, photoactivation 7186. Cochliobolus carbonum Streptococcus lactis, lactose metabolism genes, transformation Streptococcus sanguis 5442. DNA isolation, organelles 2295 Cochliobolus heterostrophus, SV40, c-Ha-ras gene mutants, transfection 2549. SV40, origin deletion mutant, transfection fibroblasts, man, gene expression DNA isolation, organelles 2295 Codons, 6146 odons, anticodons interaction, protein biosynthesis errors, ribosomes sites 7059. base composition, mitochondria genes, Mammalia 7257 characterization, protein biosynthesis inflation, preproinsulin, rats 6395. clusters analysis, base composition, models, nucleotide sequence 7259 effects on gene expression thymidine kinase it gene, herpes simplex virus 5047. errors, relationship protein biosynthesis rates, Escherichia coli 7058. llanking regions, effects on missense mutant protein biosynthesis, cell-free system 441, alchochedisce mBNA mitganesis; effects on nonsense SV40, proinsulin genes man, transfection, mice pituitary (anterior) cell lines 1943 1943.
SV40 promoters containing plasmids, construction 553.
SV40 replication origin containing, promoters role hepatitis B surface antigen gene expression, COS cells 1944.
SV40, transfection, β-interferon gene regulation, nucleotide sequence characterization, man 1157.
Ti plasmid 7881. Tiplasmid, characterization, Agrobacterium tumefaciens 5466.
Tiplasmid, gene transfer plant cells, Agrobacterium tumefaciens 7580.

damage mechanisms, 2-phenylethylhydrazine carcinogenesis 4440,
damage menaphthone inseriton, hepatocytes, rats 6520
damage, mutagenesis, DNA repair, Eschenchia coli, reviews 3509
damage, N-nitroso-N-methyl-N-nitroguandine induction, nicotinamide analogs
effects on recovery, transformed cells 4630.
damage, N-nitrosomethyl (2-oxopropyl)amine, role liver, pancreas, hamsters, rats
4442.

damage, propanolol derivatives induction, nuclei, liver, rats 3018.

damage, quinone antitumor activity, lymphoblasts 5868 damage, radiation induction, sulfhydryl groups, oxygen radicals effects on, Bacillus subtilis 6542.

damage, radiation induction, sulfhydryl groups protection, Bacillus subtilis 6541.

damage, radiation induction water radicals, DNA repair mechanisms, phage  $\Phi X174$  6732.

damage, radioisotopes induction, fibroblasts, man 5119. damage, relationship antineoplastic drugs, VP16-213, VM26 inhibition DNA topoisomerase II 5523.

damage, relationship cytotoxicity anthraquinone derivatives, CHO cells 3739. damage, relationship poly(ADP-ribose) polymerase substrates, lymphocytes, man 5131

damage, SOS repair, U.V. radiation inhibition, relationship recA promoter, Escherichia coli 5359. damage, superoxide free radicals induction, copper(II) catalysis, mechanisms

5888

damage, superoxide, radicals, doxorubicin mechanisms 5860. damage, x radiation induction, fluorescence assays, liver, rats 3736. dark interaction, psoralen, fluorescence 5850.

dark interaction, psoralen, fluorescence 5850
daunorubricin derivatives intercalation, calf thymus 973.
daunorubricin intercalation 2333
daunorubricin, proflavine binding, spectrophotometry 6535.
defective-interfening particles, activity, restriction endonuclease mapping, herpes simplex virus 1562.
defective-interfening particles, herpes simplex virus 1662.
defects, structure, Epstein-Barr virus 4516.
degradation, nuclei, lymphocytes, systemic lugus erythematosus, man 6924.
deletion mutant, 41 promoter, oligonucleotides, RNA polymerase synthesis, Escherichia coli, phage 17 6697.
deletion, proviruses, dexamethasone induction envelopes mRNA transcription, mammary tumor virus 3675.
deletion, provirusas, dexamethasone induction envelopes mRNA interactions of the structure of the st

dememylation, relationship U.V. radiation effects on metallomionein [M1-1] gene, cells lines 3015. denaturation, mathematical models 6043. denaturation, stability, cdc2 gene, temperature-sensitive mutant, Saccharomyces cerevisiae 1793.

cerevisiae 1793. deoxyribonuclease II, micrococcal endonuclease, nuclease, substrate specificity, binding 7611. deoxyribonuclease I sensitivity, SV40 transformed cells DNA 5159. dependent adenosinetriphosphatase, punfication, characterization, HeLa cells

2000

2000. detection, hybridization analysis, Escherichia coli, incidence pigs, man 3701. detection, hybridization analysis, hepatitis B virus, infected cells, man 4431. detection, Siman sacroma virus proviruses, bone marrow neoplasia, children 3705. detection, use 9-(2-hydroxyethoxymethyl)guanine, herpes simplex virus infected BHK cells 3703. determination nucleotide sequence methodology 994.

determination nucleotide sequence, methodology, use phage M13 cloning vectors

990
deuterium oxide, adaptability effects on, Streptococcus pneumoniae 3761.
dexamethasone receptors complex binding, ribonuclease effects on 1391.
di-(2-ethylhexyl)phthalate, di-(2-ethylhexyl)adipate binding, relationship,
lumors, liver, rats, mice 6527.
44-diacetamidodiphenyl, N-acetylbenzidine binding, characterization, liver,

4.4-diacetamidodiphenyl, N-acelylibenzidine binding, characterization, liver, rats, hamsters 3740.
 4.5-diamidino-2-phenylindole hydrochloride interaction, C.D., ultracentrifugation, viscometry, calonmetry 1629.
 dielectric constant, ionic strength effects on 3867.
 dielectric constant, microwave radiation absorption effects on 3742.
 5,6-dihydroflavopereirine, sempervirine binding, C.D., fluorescence, absorption

5.6-dinydroflavopereinne, sempervinne binding, o.l., nuorescence, absorption spectroscopy 5124.
 10-dimethyl-1,2-benzanthracene binding, induction adenine, guanine substitution, embryo cells, mice 3727.
 10-dimethyl-1,2-benzanthracene binding, 2'-deoxyadenosine specificity, skin, mice 5149.
 10-dimethyl-1,2-benzanthracene metabolites binding, calf thymus 1619.
 10-dimethyl-1,2-benzanthracene adducts formation, role.
 10-dimethyl-1,2-benzanthracene adducts formation, role.

9.10-dimethyle-1,2-benzantinacene metaubinies unkinigi, can inyinus 1613. 9.10-dimethylbenz(a)anthracene adducts formation, role 7-hydroxymethyl-12-methylbenz(a)anthracene, epidermis, mice 3728. dinucleotides antibodies binding kinetics 3430. dinucleotides, nucleotide sequence, Vertebrata, Invertebrata, mitochondria.

onnucleotides, nucleotide sequence, Verlebrata, Invertebrata, mitochondna, phages, bactena, vruses 3132.
distamycin A analogo briding 6737, distribution, nuclei size, photometry, thyroid function, goiter 242.
DNA (cytosine-4)-methyltransferase Borl methylation, Bacillus centrosporus 608 DNA (cytosine-5)-methyltransferase methylation, B-form, Z-form, brain, cattle 1329.

DNA methylase modification, effects on endodeoxyribonuclease specificity,

DNA methylase modification, effects on endodeoxyribonuclease specificity, adenovirus (human) 2 68889

NA topoisomerase II interaction, page T4 1318.

DNA-binding protein binding, N.M.R., arginine residues role, chromatin, Escherichia coli, Bacillus stearothermophilus 5585

DNA-binding protein binding, fluorescence, Bacillus globigii 4887 double-stranded, antibodies, antigen-antibody complexes, binding erythrocytes, complement component C3b receptors, man 6206 double-stranded, antibodies, lymphocytes subpopulations, systemic lupus erythematosus, man 6205. double-stranded, autoantibodies, detection, enzyme-linked immunosorbent assay methodiciony systemic lupus erythematosus, man 6301.

methodology, systemic lupus erythematosus, man 6931 double-stranded, autoantibodies, leukocytes (mononuclear), systemic lupus

DNA. (continued) DNA, (continued) NA, (continued)

bbbs, topography, electron microscopy, cauliflower mosaic virus 6041. trans-4-acetylaminostilibene metabolites binding, liver, lung, stomach, rats 5845. trans-4-acetylaminostilibene metabolites binding, relationship tumorigenesis, promoters effects on, rats 5847.

promoters effects on, rats 5847. 
transcription, cauliflower mosaic virus plasmid pCa8, Glycine max RNA polymerase 
II levels effects on 2708. 
transcription, translation, cell-free systems, Eschenchia coli 832 
transfer, effects on nodulation, inheritance, Pisum sativum 544. 
transformation, BK virus, Ibiroblasts, rats, kidney cell lines, hamsters 3885. 
transformation, Bordefella perfussis 2555. 
transformation, characterization, hybridization analysis, haemophilus 5188. 
transformation, chloroplasts, chromosomes, Nicotiana tabacum 2563. 
transformation, gene expression, vaccinia virus 6859. 
transformation, protection relationship conformation, transformasomes, outer

transformation, gene expression, vaccinia virus 6859 transformation, protection relationship conformation, transformasomes, outer membranes, Haemophilus influenzae 6799 transformation region, nucleotide sequence, use plasmid pCM4000 containing deletion fragments, cytomegalovirus (human) 1079; transformation, transduction, African swine fever virus 3992 transformation, transmosion (sexual), Agrobacterium tumefaciens 4681. transposon Ds nucleotide sequence, as mays 7283. transposons nucleotide sequence, as mays 7283. transposons nucleotide sequence, Trypanosoma bruces 6004. tris(phenanthroline)ruthenium(II) binding, stereoselectivity 4466. tritium oxide effects on molecular weight, thymus, rats 3024. tritium oxide incorporation, hematopoietic system, rats 3025. tumor cell lines+Moloney leukemiai virus long terminal repeat transfection, oncogenes identification 7548.

oncogenes identification 7548.
tumorigenicity, polyoma virus, 5V40, neonates. Rodentia 4605.
U.V. radiation damage, degradation, Escherichia coli 3758.
U.V. radiation inactivation, pH, temperature effects on, Haemophilus influenzae 3717.

U.V. radiation induction damage, DNA repair parameters, fibroblasts, Gardner's

U.V. radiation induction damage, DNA repair parameters, fibroblasts, Gardne syndrome, man 5364
U.V. radiation induction damage, DNA repair, role protein biosynthesis, Saccharomyces cerevisiae 6724.
U.V. radiation induction pyrimdines dimers, mice 972.
U.V. radiation induction, 5-methoxypsoralen photoaddition, calf thymus 6529.
U.V. spectroscopy, comparison carcinogens, identification, calf thymus 3013. ultracentrifugation, sporulation, Bacillus subtilis 408.
unwinding angles, lactose operator interaction lactose repressor, Escherichia coli 692.

coil 692
ummnding, high mobility group protein 1+high mobility group protein 2 effects
on, magnesium role, thymus, pigs 5580
ummnding, intercalation 3-nitrobenzothiazolo (3,2-a) quinolinium, calf thymus,

unwinding, intercalation 3-introbenzothiazolo (3,2-a) quinolinium, calf thymus, Microoccus lysodeliktius 968. 
unwinding kinetics, temperature, ionic strength effects on 3862. 
unwinding, transcription factor A induction, Xenopus 3422. 
uptake, transformation, role protonmotive force, Haemophilus influenzae 3307 
uptake, use liposomes, protoplast fusion, plant breeding, reviews 1404. 
uracil, detection methodology, liver, brain, man 1048. 
urdine analogs incorporation, breast carcinoma, mice 3877 
vancella-zoster virus, sensory ganglia, latent infection, man 3887 
vibrational analysis 6036. 
vibrational analysis relationship solvents viscosity 2430 
virulence plasmid pRi8196, Ti plasmid sequence homology, Agrobacterium 6631 
viscosity effects on, vibrational analysis, models 6686 
warts, carcinoma genomes isolation, hybridization analysis, papillomavirus 
(leporine) 4530 
water interaction, N.M.R. 1790

water interaction, N.M.R. 1790

DNA (continued)

woodchuck hepatitis virus integration sites, nucleotide sequence, hybridization analysis, hepatocytes, Spermophilus 3846

X radiation clastogenicity, 8-bromocaffeine, cysteamine effects on, hepatocytes. rats 3723

(ats 3723)
X radiation effects on, nuclei, bone marrow, liver, rats 3481
X radiation induction damage, DNA repair inhibitors effects on survival, mammalian cells 6514.
X radiation induction damage, DNA repair, role poly(ADP-nbose) polymerase,

A radiation induction damage, notify a polytoperate in the polytoperate inhibitors effects on DNA repair, CHO cells 6713.

X radiation induction double stranded breaks, role DNA repair, mammalian cells

6515 X radiation single-stranded breaks, DNA repair, glutathione effects on survival, CHO cells 6717.

xanthine dehydrogenase rosy locus, acetylcholinesterase Ace locus, repeated sequence, gene mapping, chromosome 3, Drosophila melanogaster 3775. zinostatrn effects on, DNA repair, cell lines, hamsters 5874.

DNA 5'-hydroxyl kinase,

DNA 5 - nydroxyt kinase, activity, chromatin, liver, rats 1988.

DNA 3'-phosphatase, activity, chromatin, liver, rats 1988.

DNA (adenine-6-)-methytransferase, substrate specificity. Escherichia coli 1998.

DNA binding protein, binding protein, binding superceiling DNA mitochondria. X

DNA binding protein, binding supercoiling DNA, mitochondria, Xenopus laevis 2077. DNA blosynthesis, aclacinomycin A inhibition, phage ΦX174 465. aclacinomycin A metabolities effects on, structure-activity relationships, Friend erythroleukemia cellis 1134.

ery simulation and selection of the continuous continuo

6088, age, diets effects on, Sarcophaga carnaria 6748, aging effects on, fibroblasts, man 478, aging, hydrocortisone effects on, fibroblasts, lung, man 425, aluminum effects on, Triticum aestivum 6753, aluminum effects on, Debalasts, mice 5396

3'-amino-3'-deoxythymidine inhibition, L1210 cells 6744.
3'-amino-2',3'-dideoxycytidine, ribonucleosides, deoxyribonucleosides effects on,

I 1210 cells 61

L1210 cells 61.

9-ammoacrdinien inhibition, interaction DNA polymerase 5388.

9-ammiobenzamide, β-lapachone inhibition, mammalian cells 1827.

3-ammiobenzamide effects on, CHO cells 482.

5-amminouracii effects on, photometry, autoradiography, cell cycle, meristems, roots, Allium cepa 7490.

amphidicolin inhibition, adenovirus 3251.

androgens effects on, fibroblasts, liver, comparison bone marrow, cattle 3260.

anomaly, sodium fluoride induction, sister chromatid exchange, hamsters 4872.

antomary, sodium incorde induction, sister critoriatio exchange, namisters 4672 antibiand entratives effects on, mice, man 271, antigen T genes gene expression effects on, mutants, polyoma virus 6701, antibigen T genes gene expression effects on, mutants, polyoma virus 6701, antibicroparativity mechanisms 142, antitiumor agents CC-1065 inhibition, relationship cell cycle, CHO cells 6066, aphidioclin, canavanine inhibition, parvoirus (bovine) 7466, aphidioclin effects on, life cycle, asexual reproduction, Plasmodium falciparum

aphidicolin inhibition, cell division, archebacteria 5387. aphidicolin, N-hydroxyurea effects on, Plasmodium falciparum 7486. apyrimidinic sites, apurinic sites effects on, association transversion, transition, phage M13 473.

assestos, glass, minerals fibers effects on, tumor cells, rats 1129.

assays, comparison thymidine incorporation, flow cytometry nuclei DNA, liver, rats 3879.

ssays, deoxyuridine use, chemotherapy, growth inhibition test, leukemia, man 6741.

0.41.1 assays, stilbestrol, metabolites, induction DNA damage, germ cells, mice 5150. association avoidance learning, stress, brain, rats 1139. association cell division, dinoffagellates 436. association diadenosine tetraphosphate intracellular levels, eukaryotes 6046.

association diadenosine tetraph'osphate intraceflular levels, eukaryotes 6046, association estrogens demethylation 5-terminus vitellogenin genes, chickens 3268. association histones protein biosynthesis, Physarum polycephalum 645. association histones protein biosynthesis, Physarum polycephalum 645. association late region genes, gene expression, vaccina virus 6768. autoradiography, spermatogenesis, Nereis diversicolor 479. 8-azaguanine, N-hydroxyurae effects on, comparison, HeLa cells 7471. 8-azaguanine 6-fluorouracil inhibition, DNA biosynthesis, man, mice 5381. 5-azathioprine effects on, plastocytes rats 2477. bacteria, eukaryotes, books 7694. BCG induction splenocytes inhibitors, macrophages, lymphocytes T, mice 3931. benzo(a)pyrene effects on, polyoma virus 4522. BCG induction splenocytes inhibitors, macrophages, lymphocytes T, mice 3931. benzo(a)pyrene effects on, argenier interaction, skin, mice 3916. benzo(a)pyrene effects on, mitochondria, comparison nuclei, hepatocytes, rats 3917.

benzyladenine, water, autoradiography, cotyledons, Citrullus vulgaris 4598 books 699.

benzyladenine, water, autoradiography, conyledonis, cirturius vulgatis 4050. books 699, butylated hydroxytoluene induction, relationship γ-glutamyltransferase activity, liver, rats 3926.

C-type banding, relationship cell cycle, lymphocytes, pigs 3223. casteline, secretin effects on, localization, pancreas, rats 1136. caffeine inhibition, association precursors uptake, mice 472. calcium, calmodulin effects on, espeneration, Planaria 4645. calcium effects on, Dugesia gonocephala 6479. capsid protein genes suppressor mutant, phage 14 4600. carbon tetrachloride effects on, iiver, mice 2474. cauliflower mosaic virus, Brassica cell-free system 3883. cell cycle, microinjection, embryos, Xenopus 4876. cell cycle, Kanopus 4586. cell division, nuclei, Saccharomyeso cerevisiae 6692. centromeres activity effects on, chromosome aberrations, X. chromosome, man 2448. Cephalosporium aphidicola aphidicolin resistant mutant, Toxoplasma gondii 4636. characterization, fibroblasts, man, cell-free systems 6048. characterization, Rous sarcoma virus, infected cells 1113.

DNA biosynthesis, (continued) 
chemicals genotoxicity, DNA repair, cell culture assays, pancreas, rats 5355. 
chloramphenicol inhibition, correlation clastogenicity 2327. 
chioroform, ornithine decarboxylase, liver, kidney, mice, rats 6085. 
chloroplasts, cell culture, Marchantia polymorpha 6690. 
chloroplastis levels, leaves differentiation, Liliaceae, Amaryllidaceae 6691. 
chlorpromazine, pimozide, penfluridol inhibition, Tetrahymena 1832. 
cholesterol companson pigments calculus effects on, galibiladder, man 3937. 
chromatin, reconstitution, assembly 2751.

chromatin, relationship nucleosomes DNA repeated sequence, embryos, Echinois 7679

chromium effects on, liver, mice 222. X chromosome, Mammalia, books 5599

A chromosome, Marinfalai, Jouds 3939.
deazamyen inhibition, Escherichia coli 4638.
coal ash induction, trachea, hamsters 3919.
colcheine effects on, smooth muscle, artery, rats 1130.
ColE1, RNA I promoter, RNA II promoter effects on, Escherichia coli 5404. comparison cell division, correlation protein biosynthesis, embryogenesis, mice 1799.

comparison DNA repair, mitochondria, nuclei, oocytes, Drosophila melanugaster 1107.

comparison nuclease sensitivity sites, antigens localization, chromatin, hepatoma, liver 6262.

hepatoma, liver 6262 compartmentation, regeneration, liver, rats 5340, complex, DNA polymerase I, aphidicolin, dTTP inhibition, man 4812, complex, DNA polymerase I, abhidicolin, dTTP inhibition, man 4812, complex, DNA polymerase I, stabilization factors, Eschenchia coli 5515, concanavalin A lymphocytes T inhibition, Leishmania, visceral leishmaniasis, mai Kenya 3932. coordination histones protein biosynthesis, role polyribosomes association nuclei, Misgumus fossilis 5419. correlation DNA catabolism. CHO cells 6049, cyanocobalamin intracellular levels association, Propionibacterium shermanii 2446

cyanocycline A inhibition, Escherichia coli 1835

cyclophosphamide effects on, mitosis, circadian rhythms, Ehrlich ascites tumor, mice 4641

mice 4641
cytomegalovirus (human) effects on, skin, mice 5384.
cytomegalovirus (human) effects on, rabbits, man 446.
cytomegalovirus (human) effects on, rabbits, man 446.
cytosine arabinoside, aphidicolin, novobicon, nalidixic acid inhibition, effects
on DNA repair, CHO cells 5380.
cytosine arabinoside inhibition, bone marrow, nonlyinphatic leukemia, man 6740,
cytosine arabinoside inhibition, leukemia, man 5640.
defective mutant, phage 49W-14 infection, effects on Pseudomonas acidovorans
protein biosynthesis 3606.

protein oldsymmess sood.

defects, cell cycle temperature-sensitive mutant, Saccharomyces cerevisiae 325f
deletion mutant effects on, adeno-associated virus 6705.

3-deoxy3-2-aminothymidine, 2,3-dideoxy-3-aminoadenosine inhibition, embryos.

3'-deoxy-3'-aminothymidine, 2',3'-dideoxy-3'-aminoadenosine innibition, empryos, Paracentrottus Invidus 14848 anosine, inhibition, herpes simplex virus 4265. 2'-deoxyadenosine, 2'-deoxyadenosine analogs effects on, colon carcinoma cell lines, man 224, deoxynucleoside 5'-monophosphates uptake, use, Mycoplasma mycoides mycoides 4'-deoxypyridoxine inhibition, epidermis, mice 4639 deoxyribonucleosides phosphorylation, embryogenesis, Hemicantrotus pulcherrim

1106. leoxyribonucleotides levels, U.V. radiation, CHO cells 1837

detection, use 5-bromodeoxyuridine, 5-iododeoxyuridine monoclonal antibodies, spleen, mice 445. spieen, mice 445.
determinants, plasmid pTB19, Bacillus stearothermophilius, Bacillus subtilis 5338
DNA analysis, characterization, adenovirus (human) 2 infected cells, man 6706.
DNA gyrase inhibitors effects on, mitochondria, liver, rats 5389.
DNA polymerase catalysis, 2',3'-dideoxy-3'-aminonucleoside 5'-triphospates
inhibition 2824.

infiliation 224.

DNA polymerase I activity, nuclei, cell culture, cardiac muscle, rats 6189.

DNA polymerase incomporation 2-aminopurine deoxyribonucleotides, sites specificity, phage T4 594.

DNA polymerase inhibitors effects on, HeLa cells 6067.

DNA primase initiation 2723.
DNA structure, reverse transcription models, cauliflower mosaic virus 3228 DNA-binding protein, DNA polymerase, purification, characterization, adenovirus

dnaA gene gene expression effects on, Escherichia coli 5408. dnaA gene proteins binding replication origin, purification, Escherichia coli 1104.

dnaB gene, gene products levels effects on, phage λ 2535, doxorubicin inhibition, mice myeloma cell lines, DNA biosynthesis, doxorubicin

dnabl gene, gene products leveis emecis on, pnage A 2535.

doxorubicin inhibition, mice myeloma cell lines, DNA biosynthesis, doxorubicin inhibition 1617.

elongation, 4-hydroxyaminoquinoline 1-oxide, guanine adducts, DNA polymerase, phage M13 5393.

elongationis, DNA polymerase misincorporation characterization, methodology, electrophoresis, Escherichia coli 4815.

emetine effects on, mitosis, embryos, Anthocidaris crassispina 5395.

enzymatic editing, evolution 5032.

enzymatic editing, evolution, insulin, transforming growth factor effects on, cell culture, mice 5397.

evolution, viruses 6045.

R factor RK2, Escherichia coli, Pseudomonas putida 5342.

factors affecting, mitosis, meiosis. Saccharomyces cerevisiae 1140.

fidelity, site-directed mutagenesis methodology effects on 7575.

Fluorodeoxyuridine inhibition, lymphocytes bilastogenesis, mice 6328.

N-formylleurosine effects on, thymidine kinase, Erlich ascites tumor 6743.

O gene replication proteins stimulation, phage A 895.

genetic analysis, adenovirus, books 4900.

O gene replication proteins stimulation, phage \(\lambda\) 685.
genetic analysis, adenovirus, books 4900.
genetic analysis, adenovirus, books 4900.
genetic canalysis, use iododeoxycyficline, herpes simplex virus 435.
genetic control, mathematical models, plasmid \(\lambda\) 4. Escherichia coli 7461.
genomes cores templates role, novobiocin inhibition, adenovirus 1796.
gentamicin effects on, kidney, rats 464.
glucagon effects on, regeneration, liver, rats 5407.
gossypol inhibition, specificity, Hella cells, CHO cells 5385.
growth inhibition factors effects on, cell density, cell lines 1135.
growth, synchronization differentiation, Naeqieria gruberi 3226.
GTP, O6-guanine methylation, effects on 5392.
Helenium microephalum microfenin inhibition, Ehrlich asoites tumor cells 4633.
heparin components effects on, relationship electrical properties, cell lines
2478.

NA biosynthesis, (continued) herpes simplex virus 1, tobacco extracts inhibition, relationship dysplasia, oral cavity 5052.

rpes simplex virus 2 DNA, leukemia cell lines 5346.

herpes simplex virus 2.

9-(1.3-dihydroxy-2-propoxy)methyl]-guanine+interferon inhibition 4264.
herpesvirus (bovine) 1, a-interferon effects on, macrophages 7464.
herpesvirus (equine) persistent infection, transformed cells, embryos, hamsters

3230. histones biosynthesis relationship, development, embryos, mice 443. histones effects on, chloroplasts, Chlamydomonas reinhardtii 2750. histones effects on, chloroplasts, Chlamydomonas reinhardtii 6095. 9-(2-hydroxyethoxymethyl)guarnien inhibition, herpes simplex virus 467. 9-(2-hydroxyethoxymethyl)guarnien inhibition, herpes simplex virus 1128. 9-(2-hydroxyethoxymethyl)guarnien-hydrazbine inhibition, herpes simplex virus 1 5344.

hyperthermia effects on, mononuclear phagocyte system, peripheral blood, man 1137.

hypoxanthine, ± adenosine ± platelet-derived growth factor stimulation, L cells 3256

cells 3256.
immunoglobulins, reviews 1798.
in vitro methodology, CollE1 3880.
indicators, omithine decarboxylase activity, hepatocytes, rats 6051.
infection, phage A, reviews 3892.
infliction, phage A, reviews 3892.
Hel.a cells 1559. inhibitors, sister chromatid exchange, cell cycle growth stage, hamsters 7666. initiation, aminoglycoside antibiotics inhibition, mechanisms, Escherichia coli

5386 initiation, association reverse transcription, Rous sarcoma virus 1797. initiation, fibronectin, cathepsin D proteolysis, fibroblasts, harnsters 480. initiation, identification DNA polymerase recognition sites, adenovirus (human) 2

440

1440. initiation mechanisms, phage T7 438. initiation rates, infected cells, adenovirus (human) 2 7463. initiation rates, infected cells, adenovirus (human) 2 7463. initiation, repicons, adenovirus, cell-free system 3150. initiation, repicons, adenovirus, cell-free system 3150. initiation, RNA role, reverse transcription, avian sarcoma virus 3878.

initiation, role gene 3 terminal protein, structure-activity relationships, phage Φ29 1102.

initiation, role protein A, phage Mu, cell-free system 6745. initiation, role ribonuclease H, Escherichia coli 5402. initiation sites, hemoglobin synthesis effects on, Friend erythroleukemia cells

57/93, initiation sites, herpes simplex virus 1 infected lung cells, embryos, man 3237. initiation, somatomedin genetic control, post-transcription, fibroblasts 7492. initiation, terminiation, role 4, gene DNA recognition, phage ΦX174 475. initiation, V gene mutation effects on gene II regulation, phage f1, phage fd, phage M3 6774.

insertion, deletion mutant, hybridization analysis, adeno-associated virus 2 4603.

4603

risulin effects on, diabetes mellitus, liver, rats 6094.
interferon effects on herpes simplex virus induction 3231.
interferon effects on, mechanisms, models, SV40 6736.
intermediates, electron microscopy, phage P1 1807.
iron chelating agents inhibition, herpes simplex virus 1, vesicular stomatitis virus 6738.

ketconazzio inhibition, lumphocytes, man mics 469.

iron cheaning agents infinition, nerbes simplex virus 1, vesicular stornatilis virus 6738, ketoconazole inhibition, lymphocytes, man, mica 469, kinetics, correlation templates primers binding, DNA polymerase (RNA-dependent), avian myeloblastosis virus 590, kinetics, 91-24-hydroxyethoxymethyl)guanine, bromovinyldeoxyuridine, 9-3.4-dihdyroxybutyl)guanine, 9-44-hydroxybutyl)guanine inhibition, association thymidine concentration, herpes simplex virus 1 480, fall alter egion promoters, role antigen 1, transfection, SV40 7496. lature acid inhibition, Escherichia coil 39/m3/bocytes 7 cell surface antigens monoclonal anbbodes, interleukin 2 role 7494. levels, lymphocytes, pregnancy, onlogeny, clinical aspects, man 5336. lymphocytes, cord blood, neonates, man 6698. lymphocytes, cord blood, neonates, man 6698. lymphocytes, surfaces, concanavalin A, association cell culture, man 3929. lymphocytes, T, ATP, adenosine, suppression, mice 3874. Lys-bradykinin stimulation, libroblasts, man 1801. macrophages, arenavirus infection inhibition, mice 1112. magnetic fields effects on, fibroblasts, man 3294. mammary tumor virus proviruses, hormones effects on, mammary tumor virus proviruses, hormones effects on, mammary gland, mice 1177. mathematical models 4590.

DNA (C6-alkylguanine)-alkyltransferase activity, man, rats 6198.

DNA, proteins cross-linking, diberazo(a,e)fluoranthene, metabolites induction, mice 4469.

DNA repair, U.V. radiation induction, embryos, mice 7477. DNA repair, ataxia telangiectasia, Huntington's chorea, nevus effects on, cell lines 6728

Innes 6728
DNA repair, biosynthesis, 3-aminobenzamide effects on, man 464.
DNA repair, bleomycin clastogenesis, man 1121.
DNA repair, cell proliferation relationship, skin, transfers, man 5347.
DNA repair dependent double-stranded DNA breaks, U.V. radiation induction, repair, man 5351.
DNA repair, DNA biosynthesis, role DNA polymerase I, y radiation DNA breaks, man 6184.
DNA repair, DNA polymerase I, DNA polymerase II, thibitate official states and the polymerase I. DNA replications and the polymerase I. DNA replications are provided to the pr

man 6184.

DNA repair, DNA polymerase I, DNA polymerase II inhibitors effects on, man 5367

DNA repair, excision, role poly(A) polymerase, man 5368.

genetic variance DNA repair, mutagenicity, man 1842.
glycoproteins, association ofhormatin, cytomegalovirus (human) infection, serum induction, man 2756.

induction, man 2/35.
gossypol induction clastogenicity, man 4160.
possypol induction clastogenicity, man 4160.
heat shock proteins, cDNA, nucleotide sequence, Salmo gairdnen 7326.
histone H1 etvels, age effects on, cell lines 4168.
histone H4 8, histone H26 RNA biosynthesis, relationship growth rate, mice 3296.

Fibroblasts, (continued) hormones regulation DNA biosynthesis, cell division, flow cytometry, man 4646 host systems, use transfection, characterization, Bloom's syndrome, man 2657. hydrogen peroxide clastogenicity, DNA repair, man comparison hamsters, mice 7206 flow molecular weight DNA, bleomycin effects on, xeroderma pigmentosum, man 6064 man. chromosome 17, Ecogot genes, SV40 transfection, cell hybrids, man mice 2548 man, hybrids CHO cells, glucose-6-phosphate dehydrogenase gene expression, regulation 1163.

melanoma, sister chromatid exchange analysis, family studies, man 6260. methylmercuric chloride, mercuric chloride, chromosome aberrations, Muntiacus

6230.
methylmethanesulfonate toxicity, β-lapachone effects on DNA repair, man 5365 mice, mitogenicity, 2:5'-oligo(A) inhibition 1929 morphology, tRNA, queuine modification, skin, man 6367 morfality, mercure chlonde binding chromatin, rats 1351. non-protein sulfhydryls depletion, γ radiation, sister chromatid exchange, chromosome aberrations, embryos, mice 7662 normal subjects, effects on sister chromatid exchange, Bloom's syndrome, man 72656.

nucleoli, transformed cells, rRNA biosynthesis, puromycin inhibition, man 6486.

plasmids DNA repair, U.V. radiation, man 5376.
poly(ADP-ribose) polymerase, chromatin proteins, cell cycle association benzamide carcinogenesis, man 4881.

carcinogenesis, man 4631.

polydeoxyribonucleotide synthetase (NAD\*) activity 1332.

procollagen mRNA levels, cell-free system determination, scleroderma skin 5100.

procollagen mRNA, protein biosynthesis regulation, role feedback inhibition, sheep 2993.

protein biosynthesis, effects on biodegradation, enucleation effects on regulation, mice 5788. radioisotopes induction DNA damage, man 5119. RNA biosynthesis, protein biosynthesis, silica induction 906.

rRNA genes, 5-bromodeoxyundine incorporation, chick embryos 5341. IRNA-guanine ribosyttransferase inhibitors, substrate specificity, mice 2845, sister chromatid exchange, chromosome aberrations, methoxsalen+U.V. radiation induction, skin, case reviews, man 3722.

sister chromatid exchange, chromosomes instability induction, retinoblastoma inheritance, skin, man 4863. sister chromatid exchange, psoralen+U.V. radiation induction, role cross-linking,

man 1379. sodium butyrate inhibition, transformation specificity protein biosynthesis, G

phase, cell cycle 4325. sodium fluoride, cytotoxicity, induction chromosome aberrations, DNA repair, man

4614

somatomedin, post-transcription genetic control, DNA biosynthesis initiation 7492

stilbestrol induction sister chromatid exchange, role metabolism 7677 SV40 genomes integration, stability, mechanisms, man 1075. SV40 origin deletion mutant transfection, man, gene expression 6146

tandem repeated sequence, nucleotide sequence, man 5252 letrahydrofolate dehydrogenase mRNA levels, cell cycle effects on, mice 5088. tetrahydrofolate dehydrogenase mRNA, processing, amino acids levels effects on, mice 5088.

mice 1548.

transfection methodology, man, recombinants, SV40 6795. tumongenesis, cell proliferation, v-myc genes induction, embryos, quail, avian myelocytomatosis virus 6057.

U.V. radiation induction DNA damage, DNA repair parameters, Gardner's syndrome, man 5364.

U.V. radiation induction DNA repair, kinetics, man 1814.
U.V. radiation induction DNA repair, relationship life span, Primates 3909.
X radiation, clastogenesis, genetic variance DNA repair, skin, man 2032. Fibroin,

genes, flanking regions modulation RNA biosynthesis, cell-free system 3291.
genes promoters, relationship transcription, site-directed mutagenesis 4667.
genes, RNA biosynthesis, promoters DNA nucleotide sequence, characterization,
Bombyx mori 3198.

heavy chains genes, DNA nucleotide sequence polymorphism, Bombyx mori 5905. Fibronectin,

Ibronectin, cathepsin D proteolysis, initiation DNA biosynthesis, fibroblasts, hamsters 480. cDNA, nucleotide sequence, mRNA levels, multiple forms, man 7073. genes, splicing, nucleotide sequence, restriction endonuclease mapping, liver, rats 2922.

rats 2922.
mrkanation histone H2A+histone H3, nephelometry 4871.
mrkna, nucleotide sequence, characterization, cell lines, man 5733.
mrkna, nucleotide sequence, characterization, cell lines, man 5733.

Fibrosarcomes, gene, activation mechanisms, nucleotide sequence, man 7240 DNA, melphalan cross-linking, misonidazole effects on 1601. mustine cross-linking DNA, misonidazole, diethyl maleate enhancement, mice 4461

Triustine cross-many Stridelity.

DNA polymerase I replication, heat inactivation exodeoxyribonuclease activity effects on, Escherchia coli 598.

Fine structure mapping.

Oli 2 locus, Oss I locus, use deletion mutant, mitochondria, Saccharomyces cerevisiae 5277.

Fingerprinting, restriction endonuclease mapping, DNA fragments, herpes simplex virus 2 6597. RNA, avian sarcoma virus B77, rats transformed cells 7287.

Fisson neutrons,

Fisson neutrons, clastogenicity, hyperthermia, Drosophila melanogaster 4884.
Fischerle Virus, Bombyx moti infection, ceil-free system protein biosynthesis, proteins, peptide mapping 3689
S-terminus RNA, nucleotide sequence, poly(A)-containing 5029.

5'-terminus RNA, nucleotities sequence, polyterians lation modification, Flagella, elongation, a-tubulin formation, association post-translation modification, Crithridis fasciculata 5775 flaE gene, flaY gene, chemotaxis methylation genes, gene regulation, Caulobacter crescentius 6764 p. D-Iructrotiuranosidase din gene, activity detection, R factor RP4 gene transfer, Salmonella hyphirmurum 6849 al gene, transposons mutagenesis, gene expression, Vibno parahaemolyticus 4784 regeneration, mRNA levels, Chlamydomonas reinhardtii 4354 Flanking regions, cosmids, nucleotide sequence, characterization, phage \( \) 3152 cosmids, nucleotide sequence, characterization, phage \( \) 3152 COSMIds, nucleotide sequence, characterization, phage \( \) 3152

cosmids, nucleotide sequence, characterization, phage λ 3152 fibroin genes, modulation RNA biosynthesis, cell-free system 3291. interleukin 2 genes, nucleotide sequence, structure, man 3109.

Flanking regions, (continued)

nucleotide sequence, Calliphora erythrocephala 3207. rRNA genes, nuo lash photolysis,

adenine, derivatives, intermediates, absorption spectroscopy 3532 DNA, psoralen analogs complex 3765 avobacterium.

plasmid pOAD2, 6-aminohexanoate-cyclic-dimer hydrolase, 6-aminohexanoate-linear-oligomer hydrolase genes, restriction endonuclease mapping, cloning 1200
plasmid pOAD2, 6-aminohexanoate-cyclic-dimer hydrolase nylA gene, gene mapping.

hybridization analysis 3783

effects on sister chromatid exchange, lymphocytes, rabbits 2754

emects on sister chromatid exchange, lymphocytes, rabbits 2754
Flavoprotein-linked monoxygenase,
Flavoprotein-linked monoxygenase,
Flavor compounds,
2.3-butanedione, 2.3-pentanedione, biosynthesis, isoleucine-valine operon,
cloning, gene regulation, Saccharomyces cerevisiae 6756. Flavorings,

food additives induction DNA damage 6752. Flocculation,

Saccharomyces drastaticus - Saccharomyces drastaticus - Saccharomyces cerevisiae 7562 - ethanol production, gene transfer, Saccharomyces cerevisiae 4006 FLOB gene, mating types loci effects on gene expression, Saccharomyces diastaticus 5783.

Flow cytometry, chromosomes, DNA immobilization, use gene mapping, hamsters 7352

DNA, cell cycle, endometrium, man 241 DNA content, breast carcinoma, man 246

DNA content, breast carcinoma, man 246

glycine hydroxymethyltransferase glyA gene, transformation, Saimonella
typhimurum 3315 Gene libraries, (continued) chickens oviduct, construction, use SV40 promoters containing cloning vectors 553 glycine hydroxymenytransterase glyA gene, transformation, Salintonena typhimumum 3315 glycoproteins genes, cravirus (simian) SA11 7090.
glycoproteins, hybridization analysis, Epstein-Barr virus 1777.
c-Ha-ras1 gene, insulin, 8-globin genes, chromosome 11, man 1732.
hisD gene, hisG gene, use transposon 176 mutagenesis. Klebsiella pneumoniae 52-histidine utilization hut genes. Enterobacter aerogenes 5249.
histocompatibility locus H-2 D region, inse 6550.
histocompatibility locus H-2 I-A region, use cDNA probes, mice 5165.
histocompatibility locus H-1A g-chains, hybridization analysis, characterization, man 1061.
histone H2A, histone H2B, histone H4 genes, Oryza 407.
host range regions, murine leukemia virus 5232.
hybridization analysis, plasmid pANL, Anacystis indulans 2373 induction susceptibility, nucleotide sequence, use gliucocorticoids 3847.
a-interferon genes, chromosome 4, mice 5213.
interleukin 2 genes, hybridization analysis, chromosome 4, man, chromosome 1, cats 4485. cloning vectors cosmids, construction. Pseudomonas, Thiobacillus host systems 2639 construction, α-D-glucosidase genes, monkeys 2691 construction, cDNA, actin mRAA translation, Plasmodium falciparum 4322 construction, ntrogenase genes isolation, transduction. Azotobacter vinelandii construction, pseudobactin biosynthesis genes, Pseudomonas 1886 construction, use cosmids, Oryza 1595 cytochrome c genes, isolation, cDNA nucleotide sequence, chickens 1703. DNA isolation methodology, use Alu family repeated sequence, plasmids, transformation 1208. transformation 1208. cDNA, construction, methodology 2599 c-erb gene, hybridization analysis avian erythroblastosis virus v-erbA gene, v-erbB gene, man 1722. hbnnogen a-chain, y-chain genes, hybridization analysis, liver, man 385 gastrin genes, cDNA nucleotide sequence, restriction endonuclease mapping, liver, man 1032. cats 4485 cats 4485 (ysophospholipase genes, Escherichia coli 3065, megacin A, megacin immunity genes, plasmid pBM309, Bacillus megaterium 257 mercury resistance genes, Flactor R100 2382, methodology, actin genes, use plasmid 2μ, chromosome 6, Saccharomyces cerevisiae 4552 mobilization bom region, nucleotide sequence. Clo DF13, Escherichia coli 5223, mutation, restriction endonuclease mapping, phage hiploi 1074, myosin light chains genes, Drosophila melanogaster, comparison chickens 4489 nahA gene, hybridization analysis, electron microscopy, plasmid NAH7, plasmid SAL1 3778 man 383 man 383
man, retrovirus, hybridization analysis 1723.
nrfrogen fixation nif gene, cloning, Azotobacter chroococcum 2510
priutiary, glycoprotein hormones α-subunt genes, cDNA nucleotide sequence,
cattle, comparison man 379.
repeated sequence DNA, deoxyribonuclease sensitivity, chickens 1708
repeated sequence SNA, construction, nucleotide sequence, hybridization
analysis, Mus musculus 329 SAL1 3778 introgen fixation inf gene. Klebsiella pneumoniae 2545 introgen fixation inf genes, introgen-fixing bacteria 2627 introgen fixation infK gene. infC gene. afth gene, Rhizobium mellioti 3941. nodulation nod gene, gene expression, site-directed mutagenesis, cell-free translation systems. Rhizobium mellioti 7270. Notchlocus, Drosophila melanogaster 1052. restriction endonuclease mapping, α-interferon, IFN-α gene, placenta, man Notchlocus, Drosophila melanogaster 1052.
oligomycin antibotic resistance olig gene, flanking regions, nucleotide
sequence, Saccharomyces cerevisiae 3170,
phage 17 350
photosynthesis, transformation, Rhodopseudomonas 3976,
pili genes, Escherichia coli 5248
pili genes, Escherichia coli 5248
pilasmid p5A81206, use cloning vectors, Escherichia coli 5474,
plasmid p1A4001, Streptomyces lavendulae 4506,
plasmid p1A1, Pseudomonas 7274
proline proA gene, hypoxanthine phosphoribosyltransferase gpt gene, ataA gene,
newD gene, Salmonella typhimurium 2361
promoters regions association long terminal repeat, neomycin genes, avian sarconi 5293
FINA genes, restriction endonuclease mapping, Plasmodium falciparum 1686
snRNA, scRNA solation, characterization, man 5018.
IRNA genes dusters, hybridization analysis, cDNA nucleotide sequence, HeLa cells
cell-free systems transcription, rats 1711.
rmB operon promoters, DNA nucleotide sequence, Bacillus subtilis 286.
screening, use oligodeoxyribonucleotides, computer programs 3582. screening, use of Gene localization. myc gene gene amplification, neuroblastoma cells, man 1033 Gene manipulation, catabolism pathways, host systems, Pseudomonas 6147. gene expression, books 4200. genetic engineering, books 7699.

Gene mapping,
ADE1 gene, chromosome 1, Saccharomyces cerevisiae 6128.

adenosine dearninase ADA gene, isolation cDNA, hybridization analysis, chromosome virus 334 promoters, tyrT gene, Escherichia coli 330. C-protein, cDNA nucleotide sequence, chromosome 1, liver, man 4500. proteins, F factors, Escherichia coli 5202 ADET gene, Chromosome 1, John Schreit 1, John C-protein, CINA nucleotion sequence, chromosome 1, ilver, man 4500, proteins, F. factors, Escherichia coli 520 2

Thousand protein 27, inosonital protein 58, noosonital protein 511 gene mapping 1008. Thousebisphosphate carboxylase, introgenase genes, hybridization analysis, Rhodopseudomonas sphaeroides, Kiebsisella pneumoniae 2568. Rhodopseudomonas sphaeroides, Kiebsisella pneumoniae 2568. Rhodopseudomonas sphaeroides, Kiebsisella pneumoniae 2568. Rhodopseudomonas 5947. Rhodopseudomonas 6147. Turnieracens zow deoP3 promoter deo operon, Escherichia coli 6675. DNA, chloroplasts, Hordeum vulgare 3191. DNA immobilization, hybridization analysis, chomosomes, flow cytometry, hamsters DNA polymerase dna£ gene, Escherichia coli 4108.
DNA polymerase BIT r-subunit dnaX gene, γ-subunit dnaz gene, Escherichia coli 5925 DNA polymerase III --subunit dnaX gene, y-subunit dnaz gene, Eschenchia coli 5925
DNA probes, hybridization analysis, methodology, man 5985
DNA repeated sequence, hybridization analysis, somatic cells hybrids 3184.
DNA, reverse transcription sites, duck hepatitis B virus 4515.
DNA topoisomerase I mutants, DNA gyrase genes, Escherichia coli 345.
dnaQ gene, ribonuclease H rith gene promoters, Escherichia coli 5173.
ecdysteroid regulation genes, hybridization analysis, Drosophila
melanogaster 7149
elastase genes, gene mapping, Pseudomonas aeruginosa 299.
encapsidation, herpes simplex virus 1 1678.
endodeoxyribonuclease stes, use electron microscopy, Escherichia coli 5235.
v-erbB gene, avian erythroblastosis virus 987.
esterases genes, chromosome 2, Drosophila virilis 3391.
esterases genes, gene expression, Drosophila virilis 3390.
gene development genes, hybridization analysis, chromosome 3, Drosophila 7216.
fatty-acid synthetase genes, transduction, Saccharomyces cerevisiae 4688.
frameshift mutant suppressors genes, Saccharomyces cerevisiae 1099
β-D-galactosidase lacZ gene, hsp70, microinjection, Drosophila 3390
gene amplification, CAD gene, hamsters cell lines 977.
L gene nucleotide sequence, vesicular stomatitis virus 4350,
gene products, utilization sites, phage λ 5894.
gene 27, phage SPO1 291.
genes, 5-terminus, tubulin genes, Chlamydomonas reinhardtii 5172.
genenes, papilloma virus (avian) 6601.
β-globin genes, nuclei matrix, erythrocytes, chickens 3177.
α-globin genes, nuclei matrix, erythrocytes, chickens 3177. structural proteins genes, Vaccinia virus 1774. subtilisin genes, Bacillus subtilis 3782. subtilisin yeries, Jeanius Subtilisi 3782. subtilisin spr£ gene promoters, Bacillus subtilis 5178. temperature-sensitive mutant, cold tolerance recombinants, gene expression, role host systems, influenza A vrus 3627. temperature-sensitive mutant, insertion sequence 1, association rho gene, temperature-sensitive mutant, insertion sequence 1, association rho gene, Escherichia coli 5179. 
thalassemia genes, reviews man 2101. 
thermal stability mapping, double-stranded DNA, viruses 7455. 
threonine dehydratase ivil gene, Saccharomyces cerevisiae 3030. 
thyP3 gene, transduction, host systems Bacillus subtilis 2533. 
Tk locus, GALK locus, ACP locus, ADA locus, ITPA locus, CHO cells 1733. 
transposon Tn1 induction mutation, genomes, phage P1 3998. 
transposon Tn233 (CH), Singella flexiener 7315. 
tyP promoter, mutants, Escherichia coli 7360. 
ubiquinol-cytochrome c reductase genes, iron-sulfur proteins, core II, yeasts 2515. uracil-DNA glycosylase genes, transduction, Escherichia coli 4786

urinary bladder carcinoma oncogenes, chromosome 11, man 1645, use gene transfer. R factor R68.45, Pseudomonas 529, use nucleotide sequence, mathematical models 3045.

Gene mapping, (continued)

VPg gene, use VPg gene proteins amino acid sequence, cowpea mosaic virus 6408 xanthine dehydrogenase rosy locus, acetylcholinesterase Ace locus, repeated sequence DNA, chromosome 3, Drosophila melanogaster 3775. xylose isomerase genes, transformation, Eschericha coli 4706. yeasts autonomously replicating sequence DNA nucleotide sequence, chloroplasts. Chlamydomonas reinhardii 3100. zein pML1 gene, promoters, Zea mays 3169.

Gene products,

apolipoprotein E mRNA, purification, processing, cell-free system, liver, rats 5803.

araC gene proteins binding sites, localization, effects on pBAD promoters function, Escherichia coli 2377.
association phage T3 infection Escherichia coli F factor 4599.
CDC8gene proteins, nucleotide sequence, hybridization analysis, Saccharomyces

CDC8gene profeins, nucleotide sequence, hybridization analysis, Saccharomyces cerevisiae 3208.

characterization, dnaZ locus, dnaX locus restriction endonuclease mapping, transformation, Escherichia coli 2376.

Cya gene, purification, adenylate cyclase activity, amino acid sequence, genes, Escherichia coli 5102.

dna A gene, heat mactivation effects on RNA i promoter, RNA il promoter, ColE1 DNA biosynthesis, Escherichia coli 5404.

Haemophillus galilinarum.
DNA topoisomerase I, DNA cleavage sites, correlation nuclease 5522.

Haemophillus haemolyticus, endodeoxyribonuclease Hhall r gene, m gene, nucleotide sequence 5215.

Haemophilus Influenza, plasmid pVe445, restriction endonuclease mapping, comparison plasmid pNG18,

plasmid pVe445, restriction endonuclease mapping, comparison plasmid pNG18, plasmid pNG10, Neisseria gonornhoeae 6630.

Haemophillus Influenzae, DNA, U.V. radiation inactivation, pH, temperature effects on 3717. immunoglobulin A proteinase genes, nucleotide sequence, homology Neisseria gonornhoeae, Neisseria meningifidis 1746. outer membranes, transformasomes, DNA transformation, protection relationship conformation 67309.

outer membranes, transformasomes, UNA transformation, profection relationship conformation 6799. 
polydeoxyribonucleotide synthetase genes, cloning vectors, U.V. radiation, X radiation, sensitivity 4044. 
protonmolive force role, DNA uptake, transformation 3307. 
transformation, Haemophilus influenzae transport, integration, mechanisms 3319. 
Haemophilus parainfluenzae, 
tetracycline antibiotic resistance, nucleotide sequence, homology transposon 10

Hair dves

sister chromatid exchange frequency, lymphocytes, man 2759. Haloacetate dehalogenase,

loci, association plasmid pUO1, restriction endonuclease mapping, Moraxella 3784 Halobacterium cutirubrum

dark DNA repair, U.V. radiation, photoreactivation, comparison Escherichia coli

ribosomal A protein, C.D. 2857

Halobacterium halobium,

bacterioopsin genes, insertion sequences localization, electron microscopy, restriction endonuclease mapping 4538. bacteriorhodopsin genes, transformation, insertion sequences, hybridization applying 3310.

analysis 3310.
insertion sequences, distribution, relationship mutants 371.

inverted repeat insertion sequences nucleotide sequence, association bacteriorhodopsin genes 3162.

uacrenomooopsin genes 3162.
phage 04 hinsertion sequence ISH1.8 nucleotide sequence 6607.
purple membranes, bacteriorhodopsin, amino acids substitution, site-directed
mutagenesis, nucleotode sequence 4491.
rRNA 16S genes promoters, nucleotide sequence 6635.
strains, closed circular DNA, nucleotide sequence, homology 5193.
Hatobacterium volcanil,
rSNA 16S purplexités sequence 3444.

rRNA 16S, nucleotide sequence 2244.

Halococcus morrhuse,
RNA polymerase, purification, kinetics 586.
rRNA 16S genes, nucleotide sequence, structure 7256. Halothane,

effects on protein biosynthesis, liver, rats 907.

Hamsters,

3-aminobenzamide+methylmethanesulfonate, + N-nitroso-N-ethylurea, sister chromatid exchange synergism, cytotoxicity 6226. antibody response, influenza virus hemagglutinins genes, vaccinia virus transfection 3969.

transferction 3969.
sapartate carbamoyltransferase pyrB gene, transformation, gene expression 6858.
benzo(a)pyrene binding DNA, RNA, butylated hydroxyanisole, butylated
hydroxytoluene effects on 1615.
bone marrow, methylkanthines induction sister chromatid exchange 633.
bone marrow, methylkanthines induction sister chromatid exchange, mechanisms, cell culture

cell cycle, growth stage, DNA biosynthesis inhibitors, sister chromatid exchange 7666. cell lines, adenovirus (human) 2 integration sites, DNA nucleotide sequence 993 cell lines, CAD gene, gene amplification, hybridization analysis, gene mapping

977.
cell lines, cadmium chloride induction DNA breaks 251.
cell lines, carcinogens effects on transformation, sister chromatid exchange, dose spitting 6242.
cell lines DNA, benzo(a)pyrene binding 2332.
cell lines DNA structure analysis, amplification, association N-(phosphonacetyl)-L-aspartic acid resistance 978.

Hamsters, (continued)

il lines, DNA, 5-bromo-2'-deoxyuridine, 5-iodo-2-deoxyuridine incorporation, ohototoxicity 7191.

photoloxicity 7191.

cell lines, ethylimethanesulfonate induction sister chromatid exchange, chromosome aberrations, colchicine, demecolcine, uncristine effects on 1607.

cell lines, gene amplification, rRNA genes, correlation carbamoyl-phosphate synthetase, dihydro-oratase, aspartate carbamoyltransferase genes, N-(phosphonacetyl)-L-aspartic aod resistance 481.

cell lines, mitosis, interphase chromosomes, chromatin ultrastructure 671.

cell lines, N-nitroso-N-nethyl-N-nitroguandine pretreatment effects on clastogenesis 2037.

cells lines, 3-biolitico-your land incorporation for induction size of ordinated exchange 1367.
cells, alkylating agents sugar alcohols, sister chromatid exchange 6948.
CHO cells, U.V. radiation induction sister chromatid exchange 4859.
CHO cells, DNA repair deficient mutant, DNA, calcium chromate, mercuric chloride

CHO Sells, DNA repair deticient mutant, DNA, calcium diffuriate, inercuric chloride effects on 6749. 
chromatin, DNA release, radiation induction, DNA, mathematical models 1374. 
chromatin structure, daunorubicin± U.V. radiation genotoxicity 7651. 
chromsome aberrations, relationship double-stranded DNA clastogenesis, 
detection, methodology, restriction endonuclease mapping 7201. 
chromosomes, flow cytometry, DNA immobilization, hybridization analysis, use gene

chromosomes, flow cytometry, DNA immobilization, hybriotization analysis, use gen mapping 7352.

2,4-D, pesticides (organochlorine), 4-chloro-2-methylphenoxyacetic acid inductior, sister chromatid exchange 4844.

DNA, gene transfer, temperature-sensitive mutant genes, BHK-21 cells 2589.

DNA methylation effects on gene expression 491.

DNA, proteins cross-linking, U.V. radiation induction 4435. embryos, DNA repair, stilbestrol induction, role metabolic activation 2467. embryos, transformed cells, DNA biosynthesis, herpesvirus (equine) persistent infection 3230.

epidermis, neoplasia, relationship DNA biosynthesis, ornithine decarboxylase activity, phorbol myristate acetate effects on 6087.

extraction, promote mynatic execute enects of model.

yel lens, polyribosomes, association microfilaments, cell membranes, electron microscopy 5699.

histopialists, DNA biosynthesis initiation, fibronectin, cathepsin D proteolysis

fibroblasts, DNA methylation levels, aging, tumor cells 1712. fibroblasts, hydrogen peroxide clastogenicity, DNA repair, comparison man, mice

7206 glutathione role, DNA, aflatoxin B1 binding, kinetics 6519

glutathione rolle, UNA, allatoxin b1 bindingi, kiriletis on 519.

hepatocytes, DNA repair assays, nitrosamines, aromatic amines 3242.
hepatoma, nonhistone proteins, DNA complex, amino acid sequence 2766.
high mobility group proteins amino acid composition, biosynthesis 6944.
hypoxanthine phosphonbosyl transferase highr gene, reversion mechanisms, point mutation, gene amplification 6072.
kidney, cell cycle, temperature-sensitive mutant, histones, RNA levels, gene expression, 650.

expression 6050. Superaure-sensitive mutant, histones, RNA levels, gene expression 6050. Illure, DNA, 4,4'-diacetamidodiphenyl, N-acetylbenzidine binding, characterization 3740.

liver, glutathione transferase, modulation Aspergillus aflatoxin B1 binding DNA 3005

lung, temperature-sensitive mutant, tryptophanyl-tRNA synthetase isolation 3601. mitochondria, rRNA genes flanking regions, nucleotide sequence, transcription

mitochonoria, intina genes training regions, nucleouse sequence, cansarpini, attenuation structure 72c feb. mRNA, purification, Characterization 4340, nucleon phase cell cycle, role, mRNA, purification, Characterization 4340, neconates, hemoglobin developmental stages isotypes, gene expression 910, pancreas, acinar cells, clastogenicity, N-nitroso-bis(2-oxopropyl)amine,

pancreas, acinar cells, clastogenicity, N-nitroso-bis(2-oxopropyl)amine, comparison rats 2330. 
pancreas, DNA, N-nitroso-bis(2-oxopropyl)amine, N-nitrosobis(2-hydroxypropyl)amine, N-nitrosobis(2-hydroxypropyl)amine, N-nitrosobis(2-hydroxypropyl)amine induction damage, relationship carcinogenicity 3720. 
pancreas, N-nitroso-bis(2-oxopropyl)amine induction clastogenesis, sodium selenite effects on DNA repair 1125. 
pancreas, role liver, N-nitrosomethyl (2-oxopropyl)amine DNA damage 4442. 
poly(ADP-ribose) polymerase inhibitors, enhancement hyperthermia cytotoxicity

4834 quindoxin, carbadox, olaquindox, sister chromatid exchange, dose-response

quindoxin, carbaoox, olaquindox, sistem currottiauu exchange, viocer haponise effects, feeds containing 4846.

fragilis 1805.

ringliss 1002.

Trole bilirubin enhancement light induction DNA breaks, fibroblasts, man 5137.

Hydrogen sulfide,
chemical modification snRNA U6 cytosine residues, effects on secondary structure,
mice 168.

TRNA SS, secondary structure, tertiary structure, cytosine residues, mouse 6405. Hydrogen-deuterlum exchange, poly(dA-dT), comparison poly(dA-dT)-(dA-dT), double-stranded helix 3579. Hydrogenase,

genes, transformation, gene expression, Escherichia coli 5479 Hydrolysates,

benzo(a)pyrene-7,8-diol-9,10 epoxide, DNA binding 5892. Hydrolysis,

Hydrodysia, activity, phosphate, mRNA guanylytransferase, nuclei, liver, rats 2726, aminoacyl-tRNA, glycerol, sucrose, diols potentiation 4303.
ATP -yp-azidoanilide, photohysis 556.
ATP, association RNA polymerase II initiation, RNA biosynthesis, capping 5-terminus, Rous-associated virus 0, Rous-associated virus 2, β-globin, adenovirus (human) 2 1291.
Inhibition, RNA, DNA, sanguinarine 5143.
HRNA esters analogs, structure-activity relationships 5675.
Hydrophobicity, ethers, alkylation DNA, mutagenicity testing, Ames test 944.
Hydrozhod-bush

Hydroxide,

Hydroxide, radication clastogenicity, rRNA, Escherichia coli 7203. radicats, γ radication, α radication radiolysis, comparison DNA clastogenesis 4273. radicates (2:CMP addition, α radiation radiolysis, comparison DNA clastogenesis 4273. radicates clastogenicity, single-stranded DNA, anoxia, conductivity 4452. radicats, interaction azapyrimdines, pulse radiolysis 4232. radicates, 1,3-dimethyluracil addition, radiolysis, gas chromatography, mass spectroscopy 4226.
Hydroxy acetylaminofluorene, +DNA adducts, formation, mammary gland, rats 257. N-hydroxyphenacetin derivatives, DNA damage, genotoxicity, rats 5856.

N-Hydroxy-N'-aminoguanidine, derivatives, ribonucleotide reductase inhibition, N.M.R., tumor cells, rats 4128. N-Hydroxy-1-naphthylamine, binding DNA, tumorigenicity, rats 5151. N-Hydroxy-2-aminofluorene, binding, DNA B-form companson Z-form 937 + DNA B-form companson Z-form 937 + DNA adducts, preparation methodology, phage ΦX174 936.

+ DNA adducts, preparation methodology, phage ΦX174 936.

N-Hydroxy-2-naphthylamine,
binding DNA, tumorigenicity, rats 5151.

8-Hydroxyadenine,
delection, radioimmunoassay 4923.

4-Hydroxyaminoquinoline 1-oxide,
DNA biosynthesis elongation, guanine adducts, DNA polymerase, phage M13 5393.

metabolism, binding DNA, chick embryos 3753.

Hydroxybenzotriazole,
use, oligodeoxyribonucleotides synthesis 767

9-Hydroxybenzo(a)pyrene,
binding DNA, bases characterization, ColE1 4462.

2-(α-Hydroxybenzyli)benzimidazole,
inhibition FNA biosynthesis, tobacco mosaic virus, Nicotiana tabacum disease
control 5058.

9-(4-Hydroxybutyl)quanine.

4.4-Mind Stock (1988) and the stock of thosaic virus, Nicotalia tabacum disease (1988) and the stock of the s

Hydroxylamine,
DNA clastogenesis, DNA repair, mutagenesis, phage ΦX174 1116.
6-hydroxylaminouracil,
nitro-phenylisothiocyanate interaction, purines analogs synthesis 4924.

nitro-phenylisothicoyanate interaction, purines analogs synthesis 4924. 
Hydroxylation, deoxyguanosine, ascorbic acid, reducing agents 3541. 
IRNA, aerobic conditions effects on, Salmonella typhimurium 6363. 
4'-(Hydroxymethyl-4,5',8-trimethylpaoralen, cross-inking riRNA 235, structure analysis, Escherichia coli 135. 
5-Hydroxymethyl-2'-deoxyuridine, formation, y radiation, tritium decay, DNA, HeLa cells 3730. 
7-Hydroxymethyl-12-methylbenz(a)anthracene, role 9,10-dimethylbenz(a)anthracene DNA adducts formation, epidermis, mice 3728. 
5-Hydroxymethyluracil.

role 9,10-dimethylibenz(a)anthriscene DNA adducts formation, epidermis, mice 3
5-Hydroxymethylursell,
use acyclopseudoisocytidne, acyclopseudoundine, derivatives synthesis 5637.
N-Hydroxyphensicetin,
hydroxy acetylaminofluorene derivatives, DNA damage, genotoxicity, rats 5856.
4(2-Hydroxyphenyl)-2-ursell,
synthesis, methodology 2120.
1-Hydroxysafrole,

netabolites, 1'-sulfooxysafrole DNA adducts, tumors, liver, mice 5140.

4-Hydroxytamoxifen receptors,
polynucleotides interaction 119.

5-Hydroxytryptamine,

ruciotatus patanine, rnucleotides storage, granules, N.M.R., platelets, pigs 2153. elease, platelets, immunoglobulins induction, single-stranded DNA effects on, inflammation, man 6203.

inflammation, man 6203.

N-Hydroxyures,
DNA repair inhibition, growth stage effects on, cell lines 1117.

effects on DNA biosynthesis, DNA repair, 8-azaguanine companson 7471.

effects on DNA repair excision, mammalian cells 5363.

modulation 1-β-D-arabinofuranosylcytosine, metabolism, cytotoxicity, L1210.

cells, promyeliocytic leukemia cells, man 37.

Hygromycln B,

antibiotic resistance genes, DNA nucleotide sequence, gene regulation,

Escherichia coli 375.

antibiotic resistance genes, gene expression, Streptomyces ambofaciens 28.

Escherichia coli 375.

Albibilità resistance genes, gene expression, Streptomyces ambofaciens 2644.

Inhibition protein biosynthesis, saccharomyces, Kluyveromyces 4326.

phosphotransferase genes, transformation, gene expression, streptomyces hygroscopicus 1921.

Hygromycin B phosphotransferase, genes, nucleotide sequence, transformation, gene expression, Saccharomyces cerevisiae, Escherichia coli 2682.

Hymeniacidor sanzulinae.

Hymeniacidon sangulinea, rRNA 5.85, nucleotide sequence, secondary structure predictions, rRNA 28S interactions models 881.

Hyophila Involuta, buds, adenine, adenosine induction 2125.

Hyperplasia,

coal ash induction, trachea, hamsters 3919.

Hypersensitivity,
5'-terminus deoxyribonuclease, metallothionein I gene expression effects on, gene regulation, mice 340.

Hyperthermia,

cytotoxicity, poly(ADP-ribose) polymerase inhibitors enhancement, hamsters 4834. effects on DNA biosynthesis, mononuclear phagocyte system, peripheral blood, man

effects on mitosis, micronuclei formation, melanoma xenografts, man 4446 fisson neutrons clastogenicity, Drosophila melanogaster 4884.

hypertonicity, hospital interest protein biosynthesis rates, cell lines, mice 6384.

Hypnea valentiae, 5'-deoxy-5-iodotubercidin pharmacology, adenosine kinase inhibition 4269. Hypocotyle, PNA avera Christo may 5540.

ppocoryin, nucleoli fractionation, chromatin, rRNA, auxin, Glycine max 5540. ribosomal proteins mRNA levels, 2,4-D effects on, seedling, Glycine max 916

Hypothalamus.

huliberin mRNA, purification, characterization, rats. mice, man 2983. Hypothyroidism.

alnutrition, cell proliferation, DNA polymerase activity, cerebellum, rats 6912. Hypoxanthine.

adenosine ± platelet-derived growth factor, stimulation DNA biosynthesis, L. cells 3256.

modulation, methotrexate 5-fluorouracil cytotoxicity synergism, L1210 cells, mice

4938
uptake. N6-methyladenosine inhibition, kinetics, CHO cells 752.
hypoxanthine phosphoribosyl transferase, haprt gene, reversion mechanisms, point mutation, gene amplification, hamsters 6072.

6072. Hypoxanthine phosphoribosyltransferase, gpt gene, expression, transformation methodology, use transposons, host systems cell culture 567.

cell culture 567.
gpt gene, restriction endonuclease mapping, Salmonella typhimurium 2361.
HGPRT locus, X radiation, U.V. radiation mutagenesis, DNA repair effects on, lymphoblasts, cell lines 6516.
HPRT gene, gene transfer, gene amplification, L cells 7597.
protein biosynthesis, role maternal inheritance mRNA, embryos, mice 5083.
Hypoxathine arabinoside,

analysis, high-performance liquid chromatography, plasma 6315.

I.R. Radiation, DNA, B-form, Z-form conversion, role temperature 423.

DINA, B-form, 2-form conversion, role temperature 425.

use cloning vectors, Eschenchia coli 3369.
use, DNA uptake, protoplast fusion, plant breeding, reviews 1404.
use, gene transfer, protoplast fusion, cell fusion, books 2799.
use, gene transfer, protoplast fusion, reviews 2103.
use, incorporation Ti plasmid protoplasts, Agrobacterium tumefaciens 4009.
use preproinsulin I gene transfer, hybridization analysis, liver, rats 3357.
use, transfection spheroplasts, Lactobacillus casei 5440.
Lipotropin,

enes, transcription, promoters regions, nucleotide sequence, HeLa cells 1563. β-Lipotropin,

B-Lipotropin, precursors genes, transduction, gene expression, man, cattle 4771. Liquid chromatography, early precursors general production and characterization platinum complex binding guanylyl-3',5'-guanosine, guanylyl-3',5'-guanosine, guanylyl-3',5'-guanosine, guanylyl-3',5'-guanosine, guanylyl-3',5'-guanosine, guanylyl-3',5'-guanosine, 2175. DNA 5-methylcytosine content determination, methodology 5106. DNA, RNA, rRNA fractionation 853. +fluorometry, adenosine assays 2129.

Liquid chromatography, (continued) guanne, methylathon, interaction cis-platinum diamminodichloride 3529. 6-methylbenz(a)pyrene DNA adducts structure 5121. punnes, pyrimidines, nucleotides, nucleosides 720 hymne dimers isolation, methodology, DNA, cell lines 2434

Listeria monocytogenes,

Streptococcus faecalis plasmid pAMβ1 conjugation, characterization, use cloning vectors 3368 Lithlum,

effects on poly(dG-dC) conformation, B-form, Z-form transitions 2178.

ver, age effects aminoacyl-tRNA binding ribosomes, peptidyl transfer, rats 1495 age role, hydrocortisone effects on RNA biosynthesis, rats 4392. arminoacyl-tRNA synthetase activity, leukemia, age, mice 4313. arminoacyl-tRNA synthetase, sedimentation, rabbits 1473. 4-aminobuyrate aminotransferase levels, 6-azauriacii, 5-fluorouracil effects on,

4-ammobutyrate aminotransferase levels, 6-azauracil, 5-fluorouracil effects on, rats 2127.
aminoglycoside antibiotics inhibition nbosomal proteins synthesis, rats 3609, α-amylase Amy-1a gene, gene expression, promoters regulation, mice 3294, α-1-antictyposin, α-1-antitrypsin, antithrombin III, cDNA, nucleotide sequence, man 1013.
α-1-antitrypsin cDNA, transformation, Eschenchia coli host systems, man 4696, α-1-antitrypsin mRNA, detection, use α-1-antitrypsin cDNA, man 1520.
α-polipoprotein A-I cDNA nucleotide sequence, rats 4528.
α-polipoprotein E genes, nucleotide sequence, mRNA detection, man 6003.
a-polipoprotein E genes, nucleotide sequence, mRNA detection, man 6003.
a-polipoprotein E mRNA, gene products, purification, processing, cell-free system, rats 5803.

arginyl-tRNA synthetase lysyl-tRNA synthetase complex, hydrodynamics, structure, models, rats 1469.

models, rats 1459.

ascites tumor cells, nucleosomes, chromatin nonhistone proteins, rats 6237. 
bone marrow, nuclei, DNA, histones, X radiation effects on, rats 3481. 
carbamoyl-phosphate synthetase (armonal), protein biosynthesis, post-transcription regulation, neonates, rats 5779. 
carcinogenesis, cell proliferation, relationship gene expression c-myc gene, charles gene, rats 5787. 
carbaras gene, rats 5787. 
carbaras gene, ratio 5787. 
carbaras gene, ratio 5787.

carcinoma, hepatitis 8 virus gene expression, organization 4088. catalases genes, transformation, cata 6802. 
catalases genes, transformation, cata 6802. 
catalases genes, transformation, cata 6802. 
catalases genes, transformation, catalases, augminosuccinate synthesiaes, argininosuccinate lyases, argininosuccinate synthesiaes, argininosuccinate lyase, argininosuccina

purines, rats 4848.

chromatin, non-histone proteins, immunochemistry, rats 6954.

chromatin, non-histone proteins distribution, relationship micrococcal
endonuclease susceptibility, chickens 5564.

chromatin, nucleosomes, linkage DNA organization, rats 3470.

chromatin, rRNA genes, structure, Xenopus laevis 7680.

chromatin, statellite DNA, nucleosomes, localization specificity, rats 5568.

chromatin structure, relationship histone H1 regions, rats 6258.

chromosome, 1, C-protein gene mapping, cDNA nucleotide sequence, man 4500.

chromosomes, high mobility group proteins comparison, testes, Salmo gardnerii
2746. chromosomes, nonhistone proteins, rats companson Ehrlich ascites tumor cells

4877.
coagulation factor X cDNA, nucleotide sequence, precursors characterization,

cattle 7098 came r/98.

cytochrome c oxidase subunits genes, hybridization analysis, nucleotide sequence, rats 4572.

cytochrome P-450 cDNA, nucleotide sequence, rats 5961.

cytochrome P-450 mutiple forms, nucleotide sequence, amino acid sequence, rabbits

cytocritorian P-4-so mulphe forms, increduced sequences, animo acid sequence, race 2404.
cytosol, glucocordicoids receptors complex binding, DNA, rats 5883.
cytosol, microsomes, aminoacyl-tRNA synthetase isoenzymes, chromatography, rabbits 6380.

rabbits 6-500 development, histone H1 vanants gene expression, rats 2028. 9,10-dimethyl-1,2-benzanthracene, DNA adducts, rats 7194. DNA, 4,4'-diacetatamidodiphenyl, N-acetylbenzidine binding, characterization, rats, hamsters 3740

DNA adducts, aminoazobenzene, derivatives carcinogenesis, mice 4471

DNA adducts, aminoazobenzene, derivatives carcinogenesis, mice 4471.
DNA, benzo(a)pyrene birding, indole-3-carbinol protection, mice 1602.
DNA, benzo(a)pyrene, N-nitrosodimethylamine metabolites binding, indole-3-carbinol effects on, mice 5122.
DNA biosynthesis assays, companson thymidine incorporation, flow cytometry nuclei DNA, rats 3879.
DNA biosynthesis, carbon tetrachloride effects on, mice 2474.
DNA biosynthesis, nutrients, metabolites effects on, rats 5094.
DNA biosynthesis, nutrients, metabolites effects on, rats 5093.
DNA biosynthesis, ornitriine decarboxylase, chloroform effects on, mice, rats 6085.

DNA biosynthesis, TCDD effects on, rats 2475

DNA biosynthesis, TCDD effects on, rats 2475.

DNA cross-linkling, nitrofurantoin induction 665.

DNA damage, Crotalaria spectabilis monocrotaline, rats 5146.

DNA damage, x radiation induction, fluorescence assays, rats 3736.

DNA, hepatitis B virus DNA integration, hybridization analysis, man 1664.

DNA methylation, comparison, brain, mice 323.

DNA methylation, bydrazine, role S-adenosylmethionine metabolism, rats 957.

DNA, methylation ievels, cliets effects on, rats 3747.

DNA (D6-methylguanine)-methyltransferase, DNA glycosylase activity, man 5374.

DNA pohymerase (INA-dependent) purification, characterization, rats 5914.

DNA polymerase (RNA-dependent), purification, characterization, rats 6914. DNA repair, N-nitroso-N-ethylurea chemical modification, comparison kidney, lung, brain, rats 4620 DNA structure, aureomycin, +ethidium bromide effects on, rats 634

Liver, (continued)

DNA topoisomerase I, nucleotide sequence specificity, SV40 DNA, rats 7634.

DNA topoisomerase I, purification, characterization rats 1317.

DNA, trans-4-acetylaminostilbene metabolites binding, rats 5845.

DNA uracil, detection methodology, man 1048.

cDNA, transferrin genes, nucleotide sequence, hybridization analysis, man 2409.

doxorubion binding DNA, nuclei proteins, rats 253.

elongation factor 2, 5 p-fluorosulforphyberacyl guanosine photoaffinity labelling, rats 5015.

endocrinology, gene regulation, urinary tract proteins gene families, mice 7271 endoplasmic reticulum, deoxynbonuclease, substrate specificity, kinetics, rats 4798.

4798.
enolase isoenzymes mRNA levels, development, rats 2284.
fatty-acid synthetase genes, cDNA transformation, rats 4707.
α1-fetoprotein genes transcription, dexamethasone inhibition, rats 201.
fibroblasts, DNA biosynthesis, androgens effects on, comparison bone marrow, cattle 3260.

cattle Scott.

fibronechi genes, splicing, nucleotide sequence, restriction endonuclease mapping, rats 2922.
gene libraries, fibrinogen α-chain, γ-chain genes, hybridization analysis, man 385.

analysis, man 385.
gene libraris, gastrin genes, cDNA nucleotide sequence, restriction endonuclease mapping, man 1032.
gene libraries, histocompatibility locus HLA DR region, heavy chains genes, restriction endonuclease mapping, cDNA nucleotide sequence, man 1721.
gene libraries, HRNA genes clusters, hybridization analysis, CDNA nucleotide sequence Hella edits cell-free systems transcription 1711.
a2u-globulin genes, nucleotide sequence requirements hormones induction, rats 348.

glucocorticoids receptors, ribonuclease, a-chymotrypsin treatment, comparison

glucocorticoids receptors, ribonuclease, a:-chymotrypsin treatment, comparison controsteroids receptors, rats 4793.

r-glutamytiransferase, activity, butylated hydroxytoluene induction, relationship DNA biosynthesis, rats 3926.
glutathione peroxidase biosynthesis, selenocysteine incorporation, rats 6500, glutathione peroxidase biosynthesis, selenocysteine incorporation, rats 6500, glutathione benefits, rats, harmsters 3005.
glycine methytitransferase mRNA purification, size, rats 6402.
glycoproteins mRNA levels, inflammation, rats 231.
growth, 2;5-oligo(A) modulation, rats 680, genomethythosynate guanosinetiphosynate guanylytitransferase, mRNA capping, kinetics, rats 2730 haptoglobin variants, nucleotide sequence, amino acids substitution, man 3181. hepatitis B virus integration genomes, association single-stranded DNA, man 991. hepationa, chromatin, nuclease sensitivity, comparison DNA biosynthesis sites, antigens localization 6262.

hepatoma, chromatin, nuclease sensitivity, comparison DNA biosynthesis sites, antigens localization 6262.
hepatoma comparison, DNA-binding protein, rats 4889.
hepatoma, nonhistone proteins, chromatin structure, enzyme-linked immunosorbent assay, rats 3454.
hepatoma, RNA polymerase I, RNA polymerase II activity, phosphorylation effects on, rats 4805.
high mobility group protein 1 histones complex interaction, DNA, role, nucleosomes assembly, rats 6958.
histidy-IRNA synthetase purification, myositis autoantibodies inhibition, rats 3602.

3602. histocompatibility locus H-2, class I gene nucleotide sequence, mice 3781. histone H1 identification, chickens 6235. histone H1 Salmonidae, comparison mice 5554. infection, herpes simplex virus transfection. Tupaia glis 3971. inflammation. RNA polymerase, RNA biosynthesis. rats 5509 lead, iron effects on RNA biosynthesis, protein biosynthesis, minerals levels. quail 4396.

quair 4336. lysine dietary restrictions, RNA polymerase, nonhistone proteins, histones, RNA biosynthesis, rats 6971. lysyl-tRNA synthetase, zinc, AMP dependent diadenosine tetraphosphate synthesis,

lysyl-tRNA synthetase, zinc. AMP dependent diadenosine tetraphosphate synthesis, diadenosine tetraphosphate inhibition aminoacystation, rats 127. a2-macroglobulin biosynthesis, cell-free system, induction, a2-macroglobulin mRNA, rats 1582. mediation benzo(a)pyrene binding DNA, rats 2332. mediation benzo(a)pyrene binding DNA, rats 2332. methylcholanthrene induction cytochrome P-450 mRNA, cloning cDNA, rats 1529. microsomes, ruclei, DNA binding, doxorubicin activation, enzymes, rats 6536. microsomes, polynibosomes association cytoskeleton, gel-filtration chromatography, rats 2852 microsomes, ribosomes, elongation factor 2 interaction, nucleotides mediation, rats 4331.

rats 4331

rats 4331.
mitochondria, DNA biosynthesis, DNA gyrase inhibitors effects on, rats 5389.
mitochondria DNA, physical properties, molecular weight, ducks 421
mitochondria, DNA polymerase, carbon tetrachloride, N-nitrosodiethylamine,
phenobarbitone effects on, mice 1132.
mitochondria, homology nuclei, DNA, hybridization analysis, rats 5967.
mitochondria, mRNA translation, rats 1584.
mitochondria, poly(A)-containing mRNA, 5'-terminus, nucleotide sequence, rats
878.

876.
mitochondria, RNA, levels determination, rats 3614.
mitochondria, rRNA 185 5-terminus, relationship poly(A), rats 4365.
mup gene gene families RNA biosynthesis, hormones regulation, mice 2953.
necrosis, acetaminophen induction, poly(I-C) inhibition, mice 2736.
nitrosamines fragmentation DNA, rats 1616.
N-nitroso-N-(2-oxopropyl)urea, N-nitroso-N-acetoxymethyl-N-2-oxopropylamine, DNA
methylation mechanisms 5891.

methylation mechanisms 5891.
nonhistone proteins, Aspergillus flavus aflatoxin B1 binding, sex differences, proteins dietary intake, rats 646.
nuclear membranes, mRNA transport, mRNA-binding protein specificity, rats 6287.
nuclei, caps degradation, adenosine oligonucleotides effects on, rats 2196.
nuclei, caps degradation, adenosine oligonucleotides effects on, rats 2196.
nuclei, chromatin, angiotensin receptors association, rats 6298.
nuclei, chromatin conformation, ofves effects on, electron microscopy, rats 4841.
nuclei, chromatin, nonhistone H1 localization, use cross-linking, mice 3462.
nuclei, chromatin, nonhistone proteins, O-phenanthroline+copper sulfate complex effects on, rats 6232.
nuclei, chromatin structure, differential scanning calcrimetry.

nuclei, chromatin structure, differential scanning calorimetry, rats 1368, nuclei, chromatin structure, relationship RNA biosynthesis enhancement, rats 7649

7049. nuclei, DNA binding protein kinase, rats 2007. nuclei, DNA biosynthesis, polysaccharides polyanions effects on, relationship histones complex 5409. nuclei, DNA, damage, propanolol derivatives induction, rats 3018.

Liver, (continued)

, DNA polymerase II, role DNA repair, kinetics, characterization, rats

nuclei, DNA repair kinetics, bleomycin, N-nitroso-N-methylurea induction, rats 5377.

53/7. uudel, hepann, comparison RNA polymerase II factors affecting, rats 6234. nuclei, histones acetylation, relationship RNA biosynthesis; rats 3461: nuclei, histones, ADP-ribosylation, relationship NAD(P)\* nucleosidase activity, chickens 6978. nuclei, mRNA caps catabolism, role bis(5'-adenosyl) triphosphatase, rats 6190.

nucie, mRNA caps catabolism, role bisto -adenosyn improspriatase, ratis o 199. nuciei, mRNA quanylytiransferase, phosphate hydrolysis activity, ratis 2726. nuciei, phosphoprotein phosphatase, histone H1 specificity, ratis 6191. nuciei proteins, activation RNA polymerase I, ratis 4802. nuciei, RNA biosynthesis, Sunsel Yellow FCF, Ponceau 3R, amaranth stimulation,

nuclei, RNA biosynthesis, Sunset Yellow FCF, Ponceau 3H, amaranth stimulatior rats 2278 nuclei RNA, nucleotide sequence, hybridization analysis, sheep 1519. nuclei, RNA polymerase binding poly(dA-dT), temperature effects on, mice 2709. nuclei, RNA polymerase, RNA polymerase inhibitors, ribonuclease (pancreatic) activity. Walker 256 carcinoma effects on, rats 1976. nuclei, RNA transcription, factors affecting, rats 1588. nuclei, RNA transcripts, identification, use 5-0-12-thiotriphosphate), rats 5017.

nuclei rRNA nucleotidyl-methyltransferase, purification, characterization, rats

uciei, satellite DNA, repeated sequence, relationship nucleosomes localization specificity, mice 5549. nucleoi, rRNA 285, association rRNA 5.8S precursors, hybridization analysis.

rats 5932 orotate phosphoribosyltansferase activity, pyrimidines analogs inhibition, structure-activity relationships, mice 7026. parenchyma, nuclei, DNA, 2-acetylaminofluorene metabolites interaction, characterization, rats 3719. parenchyma, RNA uptake, degradation, rats 2882. phosphatase, substrate specificity, phosphorolylation, histone H1 residues 4162. phosphorolypruvate carboxykinase (GTP) mRNA, RNA biosynthesis, insulin effects

on, fetuses, rats 5064.
polydeoxyribonucleotide synthetase (ATP), activity relationship blunt-end

polydeoxyribonaceourde symmetase (ATF), activity relationship biunt-enti-ligation, rats 1328. preproinsulin I gene transfer, use liposomes, hybridization analysis, rats 3357. protein biosynthesis, DNA biosynthesis, RNA biosynthesis, chromium effects on, mice 222.

protein biosynthesis, halothane effects on, rats 907. protein biosynthesis, post-transcription lead acetate effects on, rats 3685. proteins specificity, cloning vectors, plasmid pEX1-3 construction, bacteria

6145.

pyruvate kinase isoenzymes, 5-deoxyundine effects on levels, fetuses, rats 5787. rats, mitochondria, protein biosynthesis inhibitors, effects on polyribosomes, mRNA, cell-free systems 5806 regeneration, aging effects on cell division, DNA polymerase activity, mice 4814, regeneration, DNA biosynthesis, glucagon effects on, rats 5407. regeneration, DNA biosynthesis compartmentation, rats 5340. regeneration, metabolism, ribosomes biosynthesis, metabolism 5002. regeneration, N-nitrosomethylbenzylamine carcinogenesis, role O6-methylguanine, rats 4632.

regeneration, relationship RNA polymerase I, RNA polymerase III activity, mice 5080

3000 regeneration, ribosomes biosynthesis, metabolism, rats 5002. regeneration, RNA polymerase activity, mice 6179. regulation α-letoprotein gene expression, rats 4678. retinol-binding protein genes, cDNA nucleotide sequence, hybridization analysis, man 1724

ribonuclease, purification, molecular weight, rats 6887

inbosomal subunit 405 sedimentation, ionic strength role, rats 5707, ribosomes conformation, stability, sucrose effects on, rats 6381, ribosomes, mRNA binding sites, ribosomal protein S26 localization, affinity labelilies, step 5709. labelling, rats 5708 nbosomes, ribosomal protein L6, ribosomal protein L29, isolation.

characterization, electrophoresis, peptide mapping, rats 4316.
ribosomes, ribosomal subunit 40S, proteins interaction, identification, rats

ribosomes, rRNA 5S, ribosomal protein L5 receptors, restriction endonuclease

mapping, nucleotide sequence, rats 5737.

ribosomes, rRNA 5.8 S, rRNA 28 S, ribosomal subunit 60S complex, structure, rats

4997. ribosomes subunits, proteins spatial distribution, use cross-linkage, rats 2868. ribosomes, translation fidelity, aging effects on, mixe 148. RNA acylation effects on function, association aging, rats 811. RNA biosynthesis, angiotensin effects on 7147. RNA biosynthesis, angiotensin effects on rats 7273. RNA biosynthesis, silibinin effects on, rats 7157. RNA biosynthesis, silibinin effects on, rats 7157. RNA biosynthesis, somatotropin effects on, neonates, rats 2949. RNA, DNA alkylation, chloroethylene oxide, chloroacetaldehyde, vinyl chloride carcinogenicity, rats 2309.

RNA genes, quantitation atlatoxin B1 DNA adducts, rats 5117. RNA, reconstitution, Bacillus stearothermophilus ribosomal subunit 50S, cattle

5723.

Zygotes, maies pronuciei, microinjection, nost systems zob4.

1-AB region, nucleotide sequence, histocompatibility locus H-2, mice 1050. adenine phosphoribosyltransferase, apri locus, mutation mechanisms, heterozygotes, hemizygosity, CHO cells 1633. adenine phosphoribosyltransferase apri locus, nucleotide sequence, dTTP, dCTP levels effects on, CHO cells 7394. alcohol dehydrogenase Adh1 locus, mutation, transposons, insertion sequences, repeated sequence, revertants, Zea mays 5297. alcohol dehydrogenase ADR3 locus, 51-terminus, site-directed mutagenesis, use oligodeoxyribonucleotides 3365. amiA locus, mutation, nucleotide sequence, association transformation, host systems DNA repair, Streptocoocus pneumoniae 1652. Antip locus, genomes organization, CDNA cloning, Drosophila 2346. Antip locus, genomes organization, CDNA cloning, Drosophila 2346. Antip locus, genomes organization, CDNA cloning, Drosophila 2347. Antip locus, Brand detection, hybridization probes, localization, distribution, embryos, Drosophila 234 analysis methodology, Drosophila 5721. arg locus, gene regulation, association guanosine-3-diphosphate-5-diphosphate, Escherichia coli 5417. arg locus, transcription, translation, Escherichia coli 5036. app8E locus, trnV1 locus, nucleotide sequence, olivorplasts, Hordeum vulgare 7450.

vulgare 7450.

38 iocus, 3C locus, gene mapping, X chromosome, Drosophila 5302.

babR locus polymorphism, RNA recombination induction, nucleotide sequence,
Babesia bovis 4359.

68C locus, gene regulation, nucleotide sequence, gene products amino acid sequence, polytene chromosomes, larvae, Drosophila melanogaster 1059.

sequence, polyteñe chromosomes, larvae, Drosöphila melanogaster 1059. Ch locus, translocations, effects on c-myc gene expression, chromosome 8, Burkitt's lymphoma 6755. Cavalianic acid biosynthesis, transformation, Streptomyces clavuligerus 6797. CUP1 locus, nucleothde sequence, RNA biosynthesis regulation, Saccharomyces carevisiae 3175. Cuties, nucleothde sequence, organization, larvae, Drosophila melanogaster 1073. dihydroorotate dehydrogenase Dhod locus, ethylmethanesulfonate mutagenesis, genetic analysis, Drosophila melanogaster 5139. DNA polymerase, cloning, restriction endonuclease mapping, herpes simplex virus 1 1649.

DNA polymerase, mutation, association phosphonoacetic acid resistance,

DNA polymerase, muration, association prospronoacetic acid resistance, aphidicolin hypersensitivity, herpes simplex virus 1 2719. 
DNA repair, mapping, methylmethanesulfonate sensitivity, Neurospora crassa 3239. 
dnaZ locus, dnaX locus, transformation, restriction endonuclease mapping, gene products characterization, Escherichia coli 2375. 
Drosophila melanogaster, chromatin structure, organization, Drosophila melanogaster (557). 
245E Locus enforce hybridization analysis transfurding, salivary cland.

melanogaster 657.

74EF locus, puffing, hybridization analysis, transduction, salivary gland chromosomes, larvae, Drosophila melanogaster 3057.
endogenous retrovirus (avian), gene mapping, restriction endonuclease mapping, chickens 5274.
β-globin, L1Md family repeated sequence, hybridization analysis, mice 1700.
glutamate dehydrogenase (NADP\*) am locus, mapping, Neurospora crassa 5941.
glutamate dehydrogenase (NADP\*) am locus, nucleotide sequence, duplication mutants, Neurospora crassa 5936.
glycerol-3-phosphate transport ugp locus, transduction, Escherichia coli 2537.
engs locus cross sene hybridization analysis, structure, man 5935.

gryceror-s-prospriate transport upp locus, transduction, escribificha (2017), gg5 locus, c-mos gene, hybridization analysis, structure, man 5935. haloacetate dehalogenase, association plasmid pUO1, restriction endonuclease mapping, Moraxella 3784, heat shock, chromatin organization, characterization, Drosophila melanogaster

6941 heat shock locus 87A, restriction endonuclease mapping, genetic variance, role

heat shock locus 87A, restriction endonuclease mapping, genetic variance, role transposons, Drosophila melanogaster 1029 heat shock 63B locus, DNA nucleotide sequence, Drosophila melanogaster 335. his locus, genes replacement, methodology, Saccharomyces cereviae 2605. his locus, transduction, phage SV1, Streptomyces venezuelae 1894. histocompatibility locus H-2, heteroduplex, recombination, nucleotide sequence, mice, Escherichia coil 3890. histocompatibility locus HLA, DR region, 6 chains, cDNA clones, nucleotide sequence, man 3779. histocompatibility locus RT1, restriction fragment length polymorphism, hybridization analysis, rats 3110. hmr locus characterization, genetic control mating types, Saccharomyces cerevisiae 5428.

nmi locus characterization, general control maning types, decemberate cerevisiae 5428.
hordein, Hor-2 locus, deletion, effects on lysine levels, Hordeum vulgare 1046.
hpt locus, aprt locus, mutation, mutagens induction, CHO cells 5136.
hptR locus, role, U.V. radiation, nalidixic acid induction groEL gene, dnaK gene,

hight locus, role, U.V. fadiation, natidixic acid induction givez, gene, unan gene, Escherichia coli 5422.

hypoxanthine phosphoribosyltransferase HGPRT locus, X radiation, U.V. radiation mutagenesis, DNA repair effects on, lymphoblasts, cell lines 6516.

Immil locus, ant gene, mit gene, air gene, DNA nucleotide sequence 324.

Immunoglobulin E heavy chains, nucleotide sequence homology mice man 7443.

Immunoglobulins k-chain constant region joining region, cDNA nucleotide sequence, rabbits 1713.

sequence, rabbits 1713.

immunoglobulins k-chain, translocations effects on c-myc gene RNA

Loci, (continued)

biosynthesis, hybridoma, cell lines 3272, immunoglobulins heavy chain, effects on light chain, gene expression, mice 6482 immunoglobulins heavy chains, c-myc gene translocations, nucleotide sequence, Burkitt's lymphoma, man 402

Burktiff's lymphoma, man 402 iron transport, hybridization analysis, ColV-K30, homology plasmid pJM1 1776. korß locus, gene expression, gene mapping, R factor RK2, Escherichia coli, 7127 w locus, nucleotide sequence, introns, structure, Drosophila melanogaster 6570. w locus, RNA biosynthesis, hybridization analysis, introns, Drosophila 6413 v locus, transformation, dosage compensation, gene localization effects on gene expression, Drosophila melanogaster 6880 lon locus, gene regulation capsules polysacchandes biosynthesis genes, Escherichia coli 7527. mating types, effects on evo-1,4-α-D-glucosidase STA gene, flocculation FLOB gene expression, Saccharomycos diastaticus 5783. mating types, regulation sites localization, Saccharomycos cerevisae 349 mei-9 locus, mus(2)201 locus, role DNA excision, larvae, Drosophila melanogaster 1124.

MIV-4 locus, expression, hybridization analysis, mammary tumor virus, mice 4495 Notchlocus, gene mapping, nucleotide sequence, Drosophila melanogaster 1052 Oil 2 locus, 50s.1 locus, line structure mapping, use, mitochondria, Saccharomyces cerevisiae 5277 par locus, nucleotide sequence, Eschenchia coli 5185.

pc locus, gene expression, Periconia circinata, phytotoxins effects on, host-pathogen interactions, Sorghum 3680

per locus, restriction endonuclease mapping, X chromosome, rhythms, Drosophila

per locus, restriction endonuclease mapping, a criromosome, riryurins, brussipinelanogaster 5265.

polymorphism, DNA, hybridization analysis, chromosome 13, man 6654,

proBA locus, nucleotide sequence, glutamate kinase, glutamate-semialdehyde
dehydrogenase, Eschenchia coli 7226.

pr locus genetic analysis, Eschenchia coli, association restriction
polyribonucleotide synthetase(ATP), polynucleotide kinase, deficient mutant,
than TA 4874.

polymoniosouse synthelase(x1P), polymonectore kinase, cencient mutant, phage T4 4831.

Qa-1 focus, gene regulation, mice 503.

A region, nucleotide sequence, comparison C region, man 6546 rhs focus, structure, organization, repeated sequence 7417.

fibroblasts, DNA repair, DNA polymerase I, DNA polymerase II inhibitors effects

introdusts, DNA repair, DNA polymerase r, DNA polymerase in initiations et on 5367. fibroblasts, DNA repair, excision, role poly(A) polymerase 5368. fibroblasts, genetic variance DNA repair, mutagenicity 1842. fibroblasts, glycoproteins, association chromatin, cytomegalovirus (human)

infection, serum induction 2756. fibroblasts, hormones regulation DNA biosynthesis, cell division, flow cytometry

4646 fibroblasts, hybrids CHO cells, glucose-6-phosphate dehydrogenase gene

expression, regulation 1163. fibroblasts, hydrogen peroxide clastogenicity, DNA repair, comparison hamsters, mice 7206

fibroblasts, methylmethanesulfonate toxicity, β-lapachone effects on DNA repair 5365.

fibroblasts, nucleoli, transformed cells, rRNA biosynthesis, puromycin inhibition

bedeo.

fibroblasts, plasmids DNA repair, U.V. radiation 5376. fibroblasts, poly(ADP-ribose) polymerase, chromatin proteins, cell cycle association benzamide carcinogenesis 4881. fibroblasts, radioisotopes induction DNA damage 5119. fibroblasts, sister chromatid exchange, psoralen+U.V. radiation induction, role

cross-linking 1379.

fibroblasts, sodium fluoride, cytotoxicity, induction chromosome aberrations, DNA

förroblasts, sodium fluoride, cytofoxicity, induction chromosome aperranons, UNA repair 461-4.

fibroblasts, SV40 genomes integration, stability, mechanisms 1075.

fibroblasts, SV40 origin deletion mutant transfection, gene expression 6146.

fibroblasts, tandem repeated sequence, nucleotide sequence 5252.

fibroblasts, transfection methodology, recombinants, SV40 6795.

fibroblasts, X chromosome fragile sites gene expression, 5-azacytidine pretreatment, 5-fluorodeoxyuridine, methotrexate suppression 3557.

fibronactin CDNA, nucleotide sequence, mRNA levels, multiple forms 7073.

fibrosarcoma cell lines, N-ras gene, activation mechanisms, nucleotide sequence 7240.

2'-fluoro-5-iodo-1-cytosine arabinoside, antiviral agents, herpesvirus infection

5041.

5-fluorouracil+mitomycin C+hexamethylamine, antineoplastic drugs 2815.

5-fluorouracil+mitomycin C+hexamethylamine, antineoplastic drugs 2816.
gallbladder, DNA biosynthesis, cholesterol comparison pigments calculus effects on 3937

Gardner's syndrome, fibroblasts, U.V. radiation induction DNA damage, DNA repair

Garchier's Syndrome, Indicolasts, U.V. radiation induction DNA damage, DNA rej parameters 5364.

gastric mucosa, DNA (O6-methylguanine)-methyltransferase activity 6197.

gene libraries, c-erb gene, hybridization analysis avian erythrobiastosis virus v-erbA gene, v-erbB gene 1722.

gene libraries, histone H2A, histone H2B, histone H3, histone H4 genes, cDNA nucleotide sequence 383.

gene libraries, restriction endonuclease mapping, α-interferon, IFN-α

gene incranes, restriction endonuclease mapping, a-interieron, IFN-α gene, placenta 5293.
gene libraries, retrovirus, hybridization analysis 1723.
gene libraries, snRNA, scRNA isolation, characterization 5018.
gene transfer, methodology, protoplast fusion 3336.
genes, role tumorigenicity, hybridization analysis, restriction endonuclease mapping 2357.

genitourinary tract tumors, RNA, cytomegalovirus (human), herpes simplex virus 2

glioma, thyroid turnor cell lines growth, vinblastine, 5-fluorouracil effects on 5627.

β-globin, δ-globin genes, cloning, gene expression 6862. γ-globin, β-globin genes, RNA biosynthesis origin sites 3084.

region gene products 3281.
-globin genes, cloning 513.

a-globin genes, cloning 513.
globin genes, cloning, gene expression 2670.
globin genes, cytosine methylation 1685.
y-globin genes, cytosine methylation 1685.
y-globin genes, gene expression, DNA methylation effects on 1854.
globin genes, nucleotide sequence, cloning, gene expression 355.
β-globin genes, nucleotide sequence, gene regulation, thalassemia 6559.
y-globin genes, nucleotide sequence, RNA splicing, termini site selection

ζ-globin genes, pseudogenes, length polymorphism, relationship repeated

sequence 3201.

(-globin genes, pseudogenes, RNA biosynthesis, promoters 6107.

6-globin genes, repeated sequence, hybridization analysis, nucleotide sequence, comparison monkeys 3203.

-globin genes spacer region, endonuclease S1 (Aspergillus) mapping 1697.

-globin genes transcription initiation sites, regulation 7536.

-globin pseudogenes flanking regions, cDNA nucleotide sequence, comparison chimpanzees 1080.

-globin hNA biosynthesis, role RNA polymerase III 1297.

globin, thymidine kinase genes, recombinants, gene regulation, gene expression 3284.

90ssypol indiuction fibroblasts electrogeneity, bands.

gossypol induction fibroblasts clastogenicity, lymphocytes sister chromatid

gossypol induction fibroblasts clastogenicity, lymphocytes sister chroma exchange 4160 c-Ha-ras gene mutants, transfection, tumorigenesis resistance 2549. haptoglobin, α-chains, β-chains, nucleotide sequence 1043. haptoglobin cDNA, nucleotide sequence, α-chain, β-chain mRNA 5299. haptoglobin Hpα-1S gene, Hpα-2FS gene, nucleotide sequence 7453, head and neck, carcinoma, oncogenes, hybridization analysis 4498. heart, skeletal muscle, actin isotypes, gene expression 1578.

hematopoietic system malignancy, c-myc gene, nucleotide sequence, gene expression

5318
hemoglobin genes recombination sites, restriction endonuclease mapping 4527.
hemoglobin Lepore-Boston genes, nucleotide sequence, restriction endonuclease
mapping 4535.
hemoglobin Miyada, globin genes, cloning, nucleotide sequence, gene fusion 7407.
hepatitis B core antigen genes, transformation, expression 1947.
hepatitis B virus DNA polymerase levels 1310.
hepatitis B virus DNA hybridization analysis, carriers 3803.
hepatitis B virus infected cells, DNA detection, hybridization analysis 4431.
hepatoma cell lines, hepatitis B virus, DNA integration, nucleotide sequence
7318.

7318. high molecular weight RNA, association snRNA U1 5744. histocompatibility antigen HLA, class I molecules, class II molecules, nucleotide sequence homology 658-histocompatibility locus HLA a region, B region polymorphism, hybridization analysis, restriction endonuclease mapping 1010.

histocompatibility locus HLA A region, nucleotide sequence, comparison C region 6546

histocompatibility locus HLA, A2 region, B7 region transfection, gene expression 2693

histocompatibility locus HLA B7 region characterization, interaction interferon 4483 histocompatibility locus HLA B7 region nucleotide sequence, comparison A2 region

358 histocompatibility locus HLA, C region, A region, nucleotide sequence 6545. histocompatibility locus HLA, DC region β-chain genes, nucleotide sequence

histocompatibility locus HLA, DR region, β chain signal peptides genes, nucleotide sequence 3794. histocompatibility locus HLA, DR region,  $\beta$  chains, cDNA clones, nucleotide sequence 3779.

sequence 3779. histocompatibility locus HLA DR region α-chain genes, DNA nucleotide sequence, reviews 975. histocompatibility locus HLA DR region cDNA nucleotide sequence 378. histocompatibility locus HLA DR region, DC region α-chain genes, DNA nucleotide sequence 974. histocompatibility locus HLA DR region, DC region, α-chain, β-chain genes polymorphism 976.

polymorphisms 70.
histocompatibility locus HLA DR region, gene expression, cloning 7587.
histocompatibility locus HLA I-A region α-chain polymorphism, hybridization

institution patients of the region α-chain polynorphism, hybridization analysis 6672.

histocompatibility locus HLA, SB region β-chains gene mapping, hybridization analysis, characterization 1061.

histone H4 genes, DNA nucleotide sequence, HeLa cells cell-free system

transcription 400. histones gene expression, adenovirus (human) 2 infection effects on 5056

homogeneity snRNA U1 gene families, role gene amplification, gene conversion 441. hybridoma, oncogenes, hybridization analysis, chromosomes localization 1677. 9-(2-hydroxyethoxymethyl)guanine side effects 2817. hypothalamus, luliberin mRNA, purification, characterization 2983. immunodeficiency, relationship rotavirus (human), genomes electrophoresis, man

6679.

immunoglobulin A a-chain genes, allotypes identification, use restriction fragment length polymorphism 3103.

immunoglobulin E heavy chains, nucleotide sequence, homology rats, mice 7443.

immunoglobulin E heavy chains, nucleotide sequence, homology rats, mice 7446.

immunoglobulins, u-chain, a-chain introns, nucleotide sequence 7297.

immunoglobulins, u-chain variable region genes, nucleotide sequence, evolutionary genetics 7376.

immunoglobulins u-chain variable region genes, nucleotide sequence 7426.

immunoglobulins variable region, u-chain genes, organization, evolution 5167.

immunoglobulins variable region, chain genes, organization, evolution 5167.

immunoglobulins variable region, chain genes, nucleotide sequence, gene frequency predictions 7285.

immunological diseases, autoimmune diseases. role DNA lesione. DNA nocience.

immunological diseases, autoimmune diseases, role DNA lesions, DNA repair defects, reviews 615.

influenza virus, nucleotide sequence, comparison fowl plague virus 7340.

Man, (continued)

insulin genes, cloning, gene expression 4019.
insulin production, use genetic engineering, methodology 1926.
insulin production, use genetic engineering, methodology 1926.
interferon gene, nucleotide sequence, evolution 1762.
β-interferon gene expression, plasmid pTrS3 cloning vectors, Escherichia coli 1936

β-interferon, gene expression, production, Autographa californica nuclear polyhedrosis virus, transfection, Spodoptera frugiperda 1261. β-interferon gene expression, transformation 2673.

β1-interferon gene expression, use promoters, Escherichia coli host systems

4763 interferon gene regulation, lac promoter, hypiac promoter 3273. B-interferon gene regulation, nucleotide sequence characterization 1157. B-interferon genes, cloning, gene expression 1946. Interferon genes nucleotide sequence homology, interleukin 2 1760. Interferon genes, nucleotide sequence, phage 11 transduction 3304. Interferon genes, temperature, phosphate concentration, gene regulation, gene expression, yeasts 2524. B-interferon genes, transformation, gene expression (4778. Interferon genes, transformation, gene expression 4778. Interferon genes, transformation, gene expression 4778. ouse; mutagens induction, hprt locus, aprt locus 5136. nitrosocimetidine induction, Escherichia coli 6733. cosmoregulation, ompf gene protein biosynthesis, Escherichia coli 5078. phage D3112 transposition induction, hybridization analysis, Pseudomonas aeruginosa 5999 β phase cell cycle, mRNA, purification, Charactenzation, hamsters 4340.

Mutation, (continued)

6-phosphofructokinase pfkB gene, characterization, nucleotide sequence, Escherichia coli 3135.

Essimenchia coli 3135. pir gene, effects on regulation DNA biosynthesis, plasmid pRK419 1145. potassium channels genes, cloning shaker locus, Drosophila melanogaster 7564. rates, base pairs substitution distance effects on, nucleotide sequence, phage T4

5260.

recA protein, gene mapping, nucleotide sequence, escherichia coli 5263.

repressors, effects on binding operators, phage A 691.

role DNA repaeted sequence secondary structure 418.

ruv gene, effects on DNA repair, recombination, Escherichia coli 5356.

shrunken loic, transposon Ds, structure, gene expression, Zea mays 316.

sup2 gene, sup1 gene, cycloheximide dependent growth, ribosomes conformation,
Saccharomyces cerevisiae 836.

transitions, hotspots, nucleotide sequence, rill8 gene, phage T4 5268.

transposons induction, hybridization analysis, X chromosome, Drosophila

melanogaster 4507.

melanogaster 4507

Mycella, nuclei, DNA, characterization, use media (culture), Puccinia 6504. ribonuclease localization, Aspergillus clavatus 2698.

Mycobacterium bovis, DNA, restriction endonuclease mapping 4512.

DNA, feathsian intuitions interpret of the Mycobacterium butyricum,
DNA methylase, growth conditions effects on activity 3424.
Mycobacterium phel,
DNA methylation 4127,
DNA methylation 4127,
hages, nucleic acids labelling, DNA biosynthesis, RNA biosynthesis 3648. pnages, nucleic acids labellir Mycobacterium smegmatis, DNA methylation 4127. tRNA, initiation factors, nucle Mycobacterium tuberculosis,

nucleotide sequence, Streptomyces comparison 6364. DNA, restriction endonuclease mapping 4512.

Mycoplasma.

infected lymphocytes, induction sister chromatid exchange, man 6220. RNA polymerase (DNA-dependent) multiple forms, purification, characterization 1296

Mycoplasma capricolum.

rRNA genes, hybridization analysis, restriction endonuclease mapping 3168.

Mycoplasma flocculare,

DNA methylation, restriction endonuclease mapping, Mycoplasma hyopneumoniae comparison Mycoplasma flocculare 2364. DNA methylation sites, restriction endonuclease mapping, comparison Mycoplasma hyopneumoniae 2364.

Mycoplasma hyopneumontae, DNA methylation sites, restriction endonuclease mapping, comparison Mycoplasma flocculare 2364

Mycoplasma mycoides mycoides,
DNA biosynthesis, deoxynucleoside 5'-monophosphates uptake, use 4644.

Mycotoxins, induction sister chromatid exchange, lymphocytes, man 5544.

Myelin basic protein, protein biosynthesis, cell-free system, mutants, mice 3682. Myeloblastic leukemia, cell-free hybridistate acetate effects on gene expression, man cell lines, c-myb gene, phorbol myristate acetate effects on gene expression, man 5097

Myeloid cells, differentiation induction, bromodeoxyuridine incorporation DNA, promyelocytic leukemia, man 59.

Myeloid leukemia.

cells differentiation, histone H1 composition, mice 7660

cells dintermatation; instante in composition, milec 7000.

cells, high mobility group protein 1, high mobility group protein 2, phosphorylation histone H1, chromosomes, mice 2058.

DNA biosynthesis, phorbol myristate acetate inhibition, induction cell surface antigen (leukemia-specific), differentiation 3249.

antigen (leukemia-specino), antigen (leukemia-specino), Myelold leukemia (acute), Myelold leukemia (acute), bone marrow, blood, man 4823.

Mysioria leukemia (acure),
DNA polymerase levels, bone marrow, blood, man 4823.

Mysiold leukemia (chronic),
c-abi gene translocations, transcription, man 4380,
mitomycin C, sister chromatid exchange, Philadelphia chromosome, man 6243.

Myeloma, cell lines, DNA biosynthesis, doxorubicin inhibition, mice 1617. cell lines, immunogiobulin A mRNA, overproduction, mice 6484. histones, RNA biosynthesis, degradation, relationship deoxyribonucleotides

metabolism, mice 6233.
immunoglobulins heavy chains genes, recombination homology, hybridization analysis, cell lines 5928.
neomycin antibiotic resistance neoR gene, genetic markers, protoplast fusion, mice 3356.

Myelogrollferative sarcoma virus, comparison Moloney sarcoma virus, oncogenes, 3"-terminus long terminal repeat, nucleotide sequence 3843. nucleotide sequence 3943. lemperature-sensitive mutant, transfection, proviruses DNA, restriction endonuclease mapping, hybridization analysis 3844. Myo-inosito1-phosphate synthase, gene regulation, inositol, Neurospora crassa 6763.

Myobiasta, cell culture, RNA biosynthesis, sodium butyrate effects on 904. myosin heavy chains genes, transcription gene regulation, chick embryos 7541. mRNA ribonucleoproteins complex, heat shock effects on, relationship protein biosynthesis, chickens 3438.
Myocardial Infarction, DNA, autoantibodies, angina, man 7644. DNA biosynthesis, dogs 6746.

Myoglobin,

genes, nucleotide sequence, structure, reviews, eukaryotes 3520, genes, repeated sequence, structure, flanking regions, man 7442.

Myosin, fragments, 1,N6-ethenoadenosine diphosphate binding, fluorescence 5657, heavy chains genes, transcription gene regulation, myoblasts, chick embryos 7541, light chains genes, nucleobde sequence, gene mapping, Drosophila melanogaster,

comparison chickens 4489

autoantibodies, histidyl-tRNA synthetase inhibition, liver, rats 3602.

Myositis, (continued)
threonyl-IRNA synthetase autoantibodies relationship, man 7641.
Myotonic dystrophy,
linkage analysis, chromosome 19 restriction fragment length polymorphism, family
studies, man 5962.

histocompatibility locus H-2 5'-terminus, introns organization, mRNA genetic 
variance, mice 5931.
      histocompatibility locus H-2 D region, gene libraries, mice 283. histocompatibility locus H-2, I-A region, β-chain genes, mice 4486. histocompatibility locus H-2 I-E region, cDNA clones, mice 4550.
                                                                                                                                                                                                                                                                                                                                                                                                                                             insertion sequences inverted repeat, association bacteriorhodopsin genes, Halobacterium halobium 3162.
Insertion sites, phage P1, insertion sequence 2, Escherichia coli 6555
```

Nucleotide sequence, (continued)
InsSG gene, complementation InsSA gene, insertion sequence 5 6647.
Integration sites, DNA, hybridization analysis, woodchuck hepatitis virus infection hepaticytes, Spermophilius 3846
Intercalating agents specificity, DNA 5871.
Interferon genes, cDNA, hybridization analysis, gene expression, Escherichia coli 2414

B-interferon genes, choning, amnion cell lines, man 7429
Interferon genes, man 5490.

c-interferon genes, mice 5213.
Interferon genes, mice 5213.
Interferon genes, page 11 transduction, man 3304.

c-interferon IFN-a 13 gene, gene conversion, man 6657.
Interferon induction, companson rRNA genes, mitochondria, man 3776.
Interfeukin 2 genes, flanking regions, structure, man 3109.
Interfeukin 2 genes, site-directed mutagenesis, cysteine structure-activity relationships, man 7554. Nucleotide sequence, (continued)
c-myc gene, hematopoietic system malignancy, man 5318.
c-myc gene, lymphocytes B malignancy, man, mice 2399.
c-myc gene, man 7418. c-myc gene, ymonocytes B malignancy, man, mice 2399.
c-myc gene, man 7418.
c-myc gene, man 7418.
c-myc gene, man 7418.
c-myc gene, in the proper strain gene ibiraries, mice 999.
mycolobin genes, structure, reviews, eukaryotes 3520.
mycsin light chains genes, Drosophila melanogaster, comparison chickens 4489.
napin subunts, Brassica napus 1739.
neuraminidase genes, antigenic variants, influenza A virus 5022.
neuraminidase genes, myc man 7333, neuraminidase genes, myc plague virus 4358.
neuraminidase genes, influenza A virus 1648.
neuraminidase genes, influenza A virus 3640.
neutralization antigens, glycoproteins genes, cDNA, rotavirus (simian) SA11 3625.
nicotinic acetylcholine receptors, reviews, Torpedo californica 7006.
nitrogen fixation nif gene, Azotobacter chroococcum 2510.
nitrogen fixation nif gene, nodulation genes, Rhizobium trifolii, Rhizobium parasponia 3789.
nitrogen fixation nif gene promoters, Klebsiella pneumoniae 3133. interleukin 2 genes, site-directed mutagenesis, cysteine structure-activity relationships, man 7354. intracistemal A-particle genes long terminal repeat, Mesocricelus auratus 990. introns excision sites, rffNA precursors processing, mice 4999 introns, flanking regions, rfNA genes, Calliphora erythrocephata 3207 introns, homology, mitochondria fung, chloroplasts, nuciei plants 3195. introns, spiice junctions, recognition, computer programs, eukeryotes 6699, invariant chain, association histocompatibility locus PLA DR region, mRNA, man nitrogen fixation nif gene, Azotoacter chrococcount 2010.

Introgen fixation nif gene, nodulation genes, Rhizobium trifolii, Rhizobium parasponia 3789.

Introgen fixation nif gene promoters, Klebsiella pneumoniae 3133.

Introgen fixation nif gene promoters, Rhizobium meliloti 3124.

Introgenase genes, Bradyrhizobium japonicum 3786.

Introgenase genes, Bradyrhizobium japonicum 4480.

Introgenase infl gene, Bradyrhizobium japonicum 4480.

Inopaline DNA, gene transfer mechanisms, Ti plasmid, Agrobacterium 7379.

Notchlocus, Drosophila melanogaster 1052.

NS gene, deletion mutant, influenza A virus 2338.

Introgenase influence and introgenase introge invariant chain, association histocompatibility locus HLA OR region, mRNA, man 6407.

inverted repeat, 5'-terminus, 3'-terminus, Tupaiidae adenovirus 1644.

inverted repeat, DNA, varicella-zoster virus 5965.

inverted repeat, Linctions, chloropilasts, Nicotiana tabacum 6560.

isolates, citrus exocortis virus 6983.

isolation, type II collagen genes, man 3086.

kallikrein enzymes gene lamilies, submaxillary gland, mice 7330

kanamycin nucleotidytansferase genes, plasmid pTB913, Bacillus subtilis, Bacillus stearorbemophilus, comparison plasmid pUB110, Staphylococcus aureus 7377.

keratin genes, epidermis, man 1729.

keratin genes, feathers, scales, chickens 6566.

keratin genes, mice 1003.

Kirsten sarcoma virus 3093.

korA gene, B factor RK2 377.

Kpn family repeated sequence, man 381.

L3 gene, bluetongue virus 6427.

labelling, DNA, methodology 3808.

lac operon, flanking regions, Escherichia coli 5190.

lac UVS promoter, phage T7 promoters, interaction RNA polymerase 3271.

β-lactamase genes, Bacillus cereus 1213.

lactose operator, brinding lactose repressor, Escherichia coli 6018. 6-lactamass apro gene Escherichia coli comparison Shigella sonnei 2408.

9-lactamass apros, Bacillus creede 12630; Escherichia coli 6018.

lactase perion, lipipage on gene fusion remini, Escherichia coli 6018.

lactose perion, lipipage on gene fusion remini, Escherichia coli 6021.

late region genes, vaccinia virus 6768.

lectins genes, chromosomes, Phaseolus vulgans 7249.

lectins Lef gene, insertion sequences, Glycine max 3171.

leghemoglobin genes, Glycine max 3786.

leghemoglobin genes, Glycine max 3786.

leghemoglobin de genes, Glycine max 3786.

leghemoglobin Lip gene, seudogenes, Glycine max 3209.

legumin genes, Pisum sativum 7421.

loci association IRNA biosynthesis, mitochondria, Saccharomyces cerevisiae 1023.

w locus, Drosophila melanogaster 6570.

long terminal repeat IRNA, retrovirus 2916.

lysis proteins, localization, phage Qls 2239.

lysozyme genes promoters, steriods gene expression, receptors, chickens 5204.

lysR gene, gene regulation, Escherichia coli 3125.

macronuclei genes, processing, characterization, Oxytricha nova 5326.

magnori, limitage, genetic markers, gene mapping, crossing-over, chromosome 6, cultivars, Triticum aestivum 4499.

mass spectroscopy application, reviews 2801.

mathematical models, DNA homology, frequency 588.

matrix proteins genes, amino acid sequence predictions, respiratory syncytial virus 3153.

membrane proteins ompa gene, outer membranes, Salmonella typhimurium, comparisk oncogenes, Ti plasmid, Agrobacterium turnetaciens 3128.

--operon, Escherichia coli 7288.
operons, deficiency varients, SV40 332.
opioid peptides regulation gene expression, rats 3286.
opsin, cattle 1696.
opsin, cattle 1696.
opsin, cattle 1698.
organization, papilloma virus (human), comparison papilloma virus (bovine) 5916
origin, termination DNA biosynthesis, phage 11 342.
ori gene, Flactors, Escherichia coli 7295.
orithine carbamoyltransferase arig gene, Escherichia coli 1653.
overlaid genes, herpes simpliex virus 1 3182.
averlaid genes, herpes simpliex virus 1 3182.
overlaid genes, herpes simpliex virus 1 3183.
overlaid genes simplies virus 1 31 virus 3153.
membrane proteins ompA gene, outer membranes, Salmonella typhimurium, comparison memorane proteins ompA gene, outer memoranes, samoneila typnimunum, comparisc Escherichia, coli 5914.
membrane proteins ompA gene, Serratia marcescens 5262.
metallothionieni, monkeys 1039.
methodology, DNA, see exodeoxyribonuclease III, Escherichia coli 1286.
methodology, DNA, use exodeoxyribonuclease III, Escherichia coli 1286.
methodology, rRNA SS, tRNA genes, RNA biosynthesis, splicing, Neurospora crassa 7047. 704.7

5.10-methylenetetrahydrofolate reductase (FADH<sub>2</sub>) metF gene, 3'-terminus flanking regions, Eschericha coil 373, microcomputer computer programs, DNA 3026.

β2-microglobulin mRNA, initiation complex mutation, interferon induction, Burkett's lymphoma cell lines, man 3821. microucide IDNA, macronuclei telomeres homology, development, Tetrahymena 7303. v-mil gene, retrovirus (avian) MH2 6577. mini-Hist, I plasmid pT-We02 fragments, Escherichia coli 3769. minute virus of mice 344. mitochondria, adenosinetriphosphatase subunits genes association, Aspergillus nidulans 7313. mitochondria, genosinetriphosphatase subunits genes association, Aspergillus nidulans 7313. phospholipase A pldA gene, outer membranes, Escherichia coli 6625. phosphoproteins genes, amino acid sequence predictions, measles virus 3831. phosphorylcholine antibodies, genes, hybridoma, somatic cells mutation effects on affinity, in vitro 6548. nidulans 7313.
mitochondria genomes, Drosophila yakuba 382.
mitochondria genomes, Drosophila yakuba 382.
mitochondria outer membranes proteins genes, yeasts 2425.
mitochondria plasmids, introns characterization, Neurospora crassa 7436.
mitochondria rRNA 165, homology DNA, nuclei, man 6011.
mitochondria tRNA, homology, Aedes albopictus 6365.
molization bom region, gene mapping, Clo DF13, Escherichia coli 5223.
monoclonal antibodies «chain cDNA, conservation, germplasm, mice 5938. aminty, in viuo 0540. pili adhesins gene A, K88ab operon, Escherichia coli 5316. pili genes, Escherichia coli 4494. pili genes, ColBZ 7371. plamid pBR322, endodeoxyribonuclease substrate specificity, Thermus aquaticus 6892 6892.
jeant viruses, satellite RNA, books 2097.
plasmid pSLA2 5'-terminus, inverted repeat, Streptomyces rochei 5205.
plasmid P1, structure, phage P1 of 663.
plasmid T181, tetracycline resistance, replication, Staphylococcus aureus 6617.
plasmids, hybridization analysis, strains homology, Streptococcus 2380.
poly(C) RNA, encephalomycocarditis virus 7072.
poly(A)-containing mRNA, 5'-terminus, mitochondria, liver, rats 876. monocional antibodies k-chain cUNA, conservation, germplasm, mice 5938.

c-mos gene, rats 3081.

v-mos genes, murine sarcoma virus 2353.

motA gene, Escherichia coli 6632.

murine leukemia virus 1781.

murine leukemia virus proviruses integration chromosomes, lymphoma, mice 5287.

c-myc gene, Burkitt's lymphoma 5797.

characterization 44 r.b.

2.p. plasmid, deoxyribonuclease I cleavage sites, restriction endonuclease mapping, yeasts 6562. plasmid Av. genetic control DNA biosynthesis, mathematical models, Escherichia coli 7461

plasmid AOV, genetic control DNA biosynthesis, mathematical models, Escherichia coli 7461 plasmid AOV, mutants, regulation DNA biosynthesis, mathematical models, Escherichia coli 7480. plasmid EDP208, restriction endonuclease mapping, Escherichia coli 298. plasmid EDP208, restriction endonuclease mapping, gene expression, Escherichia coli 3215. plasmid NAH7, cloning vectors, naphthalene oxidation genes transformation, gene expression, Pseudomonas putida 1949. plasmid NAH7, plasmid SAL1, nahA gene, gene mapping, hybridization analysis, electron microscopy 3778. plasmid NAFI, DNA biosynthesis, DNA cell membranes bonds, Escherichia coli 6026. plasmid pAB124, tetracycline antibiotic resistance tet gene, transformation, gene expression, Bacillius 339, plasmid pACKC1, transformation plasmid pAMβ1 replication origin, Streptococcus faecalis 2557. plasmid pACYC184, cloning vectors, F factors leader sequence stabilization 6846. plasmid pACYC184, glnF gene transformation, characterization, Klebsiella pneumoniae 2562.

plasmid pACYC184 mobilization, R factor R68.45 insertion sequence 21, Escherichia coli 6620.

Plasmids, (continued)

plasmid pALS2, autonomously replicating sequence deletion, nucleotide sequence,

plasmid pricos, autonomously repincaning sequence deterior, nucleonoe sequi Neurospora 7299. plasmid pAMβ1, conjugation, characterization, Listena monocytogenes, use cloning vectors, Streptococcus faecalis 3368. plasmid pAMβ1, restriction endonuclease mapping, transformation replication

origin 2557

plasmid pAM)51, restriction endonuclease mapping, transformation replication origin 2557.

Plasmid pAM)51, Streptococcus faecalis, gene transfer, conjugation, Bacillus thurnigenesis 1187.

plasmid pANL, clones, gene mapping, clones, replication origin, Anacystis nidulans 2373.

plasmid pAS1, USP transformation nonstructural proteins influenza A virus 568. plasmid pAS1, USP transformation, methylation, depurination effects on, role DNA repair 3000.

plasmid pAS1, gene libraries, Bacillus anthracis toxins protection antigens genes, cloning, gene expression, Escherichia coil 1196.

plasmid pBA1, gene libraries, Bacillus anthracis toxins protection antigens genes, cloning, gene expression, Escherichia coil 1196.

plasmid pBB29, DNA repair, comparison nuclei, Saccharomyces cerevisiae 5370.

plasmid pBB12, DNA repair, comparison nuclei, Saccharomyces cerevisiae 5370.

plasmid pBB9, transformation megacin genes, Bacillus megaterium 2574.

plasmid pBF4, Bacteroides fragilis, letracycline antibiotic resistance genes, conjugation, gene expression 8875.

plasmid pBK TK-1, coning vectors construction, characterization, man cell lines, Escherichia coil 6846.

plasmid pBM309, megacin n, megacin immunity genes, gene mapping, transformation, plasmid pBM309, megacin n, megacin immunity genes, gene mapping, transformation,

Escherichia coli 0843.
plasmid pBM309, megacin A, megacin immunity genes, gene mapping, transformation, Bacillus megaterium 2574.
plasmid pBR 322, cloning vectors, glutathione synthetase genes transformation, gene amplification, Escherichia coli 2667.
plasmid pBRH4, promoters cloning vectors production 5416.
plasmid pBR322+adenovirus (human) 1 cosmids, tertiary structure effects on transchulction 4040.

plasmid pBR322+adenovirus (human) 1 cosmids, tertiary structure effects on transduction 4049. plasmid pBR322+phage k, cosmids cloning vectors construction, thymidine kinase, ampicillin antibiotic resistance genes 2636. plasmid pBR322+phage M13, cloning vectors, production single stranded DNA, nucleotide sequence 4061. plasmid pBR322+SV40, chromatin structure 1346. plasmid pBR322-U.V. radiation clastogenicity, effects on restriction endonuclease activity 959.

plasmid pBR322, β-D-galactosidase genes transformation, Klebsiella pneumoniae

plasmid pBR322, β-lactamase genes, gene expression, temperature-sensitive mutant, Escherichia coli 2676. mulant, Eschericha coni corto.

plasmid pBR322, acetylornithine aminotransferase genes transformation, Eschericha coli 2572. Eschericha coli 2572.

Escherichia (bil 25/2: plasmid pB1322 alikylation, effects on DNA repair, transformation efficacy, Escherichia coli 1210. plasmid pB1322, cleavage, DNA-binding protein isolation, ascites tumor cells

6987

plasmid pBR322, cloning DNA, U.V. radiation mutagenesis, gene transfer 3755. plasmid pBR322, cloning vectors, threonine operons transformation, Escherichia

plasmid pBR322 cloning vectors, transformation rotavirus genes 1919.

plasmid pBR322, cloning vectors, xylose isomerase, xylulokinase genes transformation, Escherichia coli 1749. plasmid pBR322, containing col1lb, inhibition phage T7 DNA biosynthesis 1846 plasmid pBR322, DNA, bleomycin A2 clastogenesis, cis-platinum diamminodichloride

effects on 3750.
plasmid pBR322, DNA, double-stranded, N-methylpyrrole pentapeptide+EDTA+iron

plasmil ponszz, Unik, outubr-szanietu, imientykynus pamaepiach cieavage specificity 301, ponsology, detection, Escherichia coli 6809, plasmid pBR322, DNA, homology, detection, Escherichia coli 6809, plasmid pBR322, DNA repair, 2-acetylaminofluorene, derivatives chemical modification, role endodeoxynbonuclease Uvr. Escherichia coli 3914, plasmid pBR322, DNA secondary structure, ribollavin, U.V. radiation effects on,

Eschericha coil 3961.
Eschericha coil 3961.
plasmid pBR322 DNA separation chromosomes DNA, methodology, bacteria 930.
plasmid pBR322 DNA, superhelix, intercalating agents interaction, light

scattering 4465.
plasmid pBR322, DNA transformation, chloroplasts, chromosomes, Nicotiana tabacum

2563

2563.
plasmid pBR322, DNA, transformation, Yersinia enterocolitica, restriction-modification 6808 plasmid pBR322, DNA, Z-form conformation, salinity effects on 2435. plasmid pBR322, doxorubicin interaction, fluorescent probes 5382.

plasmid pBR322, endo-1,3-β-D-xylanase, exo-1,4-β-D-xylosidase genes, transformation, Bacillus pumilus 2678.

plasmid pBR322, enlargement, recombination, restriction endonuclease mapping 5996

plasmid pBR322, Escherichia coli, use, site-directed mutagenesis Ti plasmid, Agrobacterium turnefaciens 1238.

plasmid pBR322, Escherichia coli, use transformation Thiobacıllus ferrooxidans

plasmids 1916. plasmid pBR322, ethidium bromide effects on cis-platinum diamminodichloride binding DNA, Eschenchia coll 262.

plasmid pBR322, genes rearrangement, tetracycline antibiotic resistance tetR gene, gene expression, Escherichia coli 5076. plasmid pBR322, heilus structure, pH 6025. plasmid pBR322, linear formation closed circular, transformation, Escherichia coli 4695.

plasmid pBR322, malolactic fermentation genes transformation, Lactobacillus

delbruecku 2556.

delbruecku 2556.

plasmid pBR322, microinjection, stimulation DNA biosynthesis, cell lines 2588, plasmid pBR322, monomers, recombinants formation, endodeoxyribonuclease RecFactivity, Escherichia coli 7612.

plasmid pBR322, + papilloma virus (bovine) +vv2 gene, cloning vectors construction

4054

4054. plasmid pBR322, +phage Mu DNA, transduction 1912. plasmid pBR322 phage T4 DNA, DNA biosynthesis, degradation, phage T4 infection effects on, Eschenchia coli 1907. plasmid pBR322 phage T4 DNA, recombination phage T4 infection Escherichia coli

plasmid pBR322, plasmid pACYC184 recombination, role DNA, nucleotide sequence, plasmid pBR322× plasmid pDU1 hybrids, Anabaena, Escherichia coli host systems

Plasmids, (continued)

plasmid pBR322, plasmid p82-6B, DNA, restriction fragment length polymorphism. electrophoresis mobility anomaly 2016.

electrophoresis mobility anomaly 2016

plasmid pBH322: polyethylene glycol effects on transformation, calcium chloride pretreatment, Escherichia coli 4717.

plasmid pBR322, ribulosebisphosphate carboxylase gones transformation,

Rhodopseudomonas sphaeroides 2566 Plasmid pBR322, RNA polymerase association tet promoter, characterization 3406 plasmid pBR322 stability, chemostats, host systems, Escherichia coli 4764 plasmid pBR322, tetracycline antibiotic resistance genes, nucleotide sequence

plasmid pBR322, tetracycline antibiotic resistance, tetA gene, transposon Tn10, Escherichia coli 5324 plasmid pBR322, transformation aminobenzoate synthetase genes, Escherichia coli

2685 plasmid pBR322, transformation, capsid protein genes, rotavirus (simian) SA11

plasmid pBR322, transformation Corynebacterium diphthenae toxins genes 1948. plasmid pBR322, transformation DNA Bordetella pertussis 2555. plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes, ARS site, Candida maltosa 2569 plasmid pBR322, transformation leucine genes plant particular plant p plasmid pBR322, use, transformation thymdine kinase genes, gene expression 1202 plasmid pBR325 DNA, liposomes, protoplast lision, Daucus carota 631 plasmid pBR325, poly(dA-dT) recombinants, RNA biosyrithesis, Escherichia coli

5756 plasmid pBR325, ribulosebisphosphate carboxylase genes transformation Rhodospirillum rubrum 2675, plasmid pBR325 transformation, Thiobacillus ferrooxidans DNA replication origin,

Escherichia coli expression 3978. plasmid pBT 42-1 cloning vectors, δ-endotoxin gene transfer, Bacillus

thuringiensis 518. asmid pCa8 DNA transcription, Glycine max RNA polymerase II levels effects on

2708

plasmid pCED6, use gene fusion, promoters, Bacillus subtilis 3367 plasmid pCE1, transposon Mu, nitrogen fixation nif gene transposition, Enterobacter cloacae 2584. plasmid pCG86, transposon Tn3 insertion nucleotide sequence, Eschenchia coli

7366

//386. Jasmid pλCM, phages immunity incompatibility, Escherichia coli 6700 plasmid pCM4000 containing deletion fragments, use analysis DNA transformation region, cytomegalovirus (human) 1079, plasmid pCM959, replication origin, nucleotide sequence, Escherichia coli 5219, plasmid pCP1, companson plasmid pCP2, hybridization analysis, clindamycin antibiotic resistance, Bacteroides 752c.

plasmid pC194, replication, association phage M13 transduction, Escherichia coli plasmid pDA0307, lactose genes transformation, host systems Streptococcus lactis

plasmid pDH5060, clone banks, construction, transformation, Bacillus subtilis, Escherichia coli 2582. plasmid pDH5060, stability. Escherichia coli transformation Bacillus subtilis

plasmid pDPT275, plasmid pBR322, DNA breaks,

4-(9-acridinylamino)methanesulfon-m-anisidide+copper induction 5129. plasmid pEX1-3 cloning vectors construction, liver proteins specificity, bacteria 6145

6145
plasmid pE6, gyrA gene transformation, gene expression, Bacillus subtilis 6803
plasmid pFTB91, cloning vectors construction, DNA recombination, host systems,
Bacillus subtilis 2637.
plasmid pFYM2, plasmid pFYM225, transformation, integration, gene expression,
Schizosaccharomyces pombe 3320.
plasmid pGC9114 containing transposon Tn951 β-D-galactosidase genes,
transposition host systems Xanthomonas campestris 2583.
plasmid pGR77, chloramphenicol resistance gene regulation, Bacillus subtilis

plasmid pGR71, chloramphenicol resistance gene regulation, Bacillus subtilis promoters 499. 
plasmid pHG, tetrahydrofolate dehydrogenase genes transformation, induction methotroxate resistance, Drosophila 2580. 
plasmid pHiy185, hemolysins, Escherichia coli 6619. 
plasmid pHiy6415, restriction endonuclease mapping, use, exodeoxyribonuclease Bal31, methodology, 3821.

plasmid pHU011, abi gene, col gene, imm gene restriction endonuclease mapping

plasmid pHV33, phage M13 recombination, Escherichia coli 6143.

plasmid pHV33, phage M13 recombination, role rec gene, Escherichia coli 2631. plasmid pHV33 transfer, protoplast fusion, Escherichia coli, Bacillus subtilis host systems 2601. plasmid piB1, outer membranes proteins, transduction, gene expression, Yersinia

pseudotuberculosis 2672. plasmid plG7, naphthalene metabolism genes, cloning, Pseudomonas putida 522 plasmid plJ1008, conjugation, gene expression, Rhizobium meliloti, Rhizobium leguminosarum 3305.

plasmid pU101, Streptomyces lividans, +Eschenchia coli plasmid pSAS1206, Cloning vectors construction 4064, plasmid pL41, transformation aminobenzoate synthetase genes, Streptomyces

plasmid plast, transiumation animioentzoate symmetase genes, orieptornyces inidians 286, cloning vectors, characterization, Eschenichia coli envZ gene, gene expression 1935. plasmid plP1031, antibiotic resistance genes, conjugation, gene expression 6874, plasmid plP1084, bNA supercolling, inverted repeat, cruciform structure, kinetics

plasmid pIRL19, cloning vectors construction, antibiotic resistance plasmids, DNA probes 2646.

plasmid pIRL2, kanamycin antibiotic resistance cloning vectors, construction plasmid pl258, +phage Φ11, cosmids, transduction, Staphylococcus aureus,

prasmio pizbs, +pnage \(\psi\_11\), oosmids, transduction, staphylicocccus aureus, genetic analysis 3960.
plasmid pJBSJI, plasmid pBR1AN, gene transfer, symbiosis, mutants, Rhizobium trfolii, Rhizobium leguminosarum, Rhizobium meilloti 1209.
plasmid pJDB219, plasmid Ylp5, high frequency transformation, Saccharomyces

cerevisiae 3989. plasmid pJH1, aminoglycoside 3'-phosphotransferase genes, nucleotide sequence

Streptococcus faecalis 1041
plasmid pJM1, ColV-K30, iron transport, loci, hybridization analysis, homology
1776.

plasmid pJR33, ribonuclease E role, rRNA 5S processing, Escherichia coli

Plasmids, (continued)

1108
plasmid pJR3∆, transformation, rRNA 5S gene expression, incorporation ribosomes, Escherichia coli 3993
plasmid pJS204, hemolysins, Escherichia coli 6619.

plasmid pKC1, cloning vectors, construction, characterization, Bacillus subtilis

4056.
plasmid pKC30 cloning vectors, construction, use DNA repair genes cloning 1192.
plasmid pKC30, phage λ O gene transformation 695.
plasmid pKC30, use cloning vectors 1246.
plasmid pKC4, transformation β-D-galactosidase genes, Escherichia coli 2692.
plasmid pKM 101 effects on, DNA repair, cis-platinum-diamminodichloride mutagenesis, comparison SOS repair, Escherichia coli 1126.
plasmid pKMR, physicochemical properties, antibiotic resistance, Escherichia coli, Shigelia sonnei 312.
plasmid pKM101 effects on mutagenesis specificity, U.V. radiation, Escherichia coli 1126. colt 1826

coii 1926. plasmid pKY159, Escherichia coii , adenosinetriphosphatase promoters, nucleotide sequence, Escherichia coii 5312. plasmid pLBi , endodeoxyribonuclease EcoRV, methylase genes, nucleotide sequence,

Escherichia coli 7409 plasmid pLC36-19, catalase genes, restriction endonuclease mapping, Escherichia

coli 4493 plasmid pLES2, cloning vectors construction, characterization, host systems

present public purpose, counting vectors construction, characterization, flost systems Escherichta obi, Nelisseria gonorrhoeae 2835. plasmid pLG4 containing arg4 gene, transformation yeasts 2558, plasmid pLG4, transformation lactose metabolism, 6-phospho-p-D-galactosidase genes, Lactobacillus cases 1999 plasmid pMA91 use, gene amplification, proteins identification, transposon Ty,

yeasts 7550.
plasmid pMB1, DNA biosynthesis regulation, role RNA interaction primers

plasmid pMB1, DNA biosynthesis regulation, role HNA interaction primers precursors 2449. 
plasmid pMB9, stability, association exodeoxyribonuclease I, exodeoxyribonuclease III, exodeoxyribonuclease V, Escherichia coli 2706 
plasmid pMC7-1, cDNA, intracisternal A particle, long terminal repeat, association colon, tumors, mice 2417. 
plasmid pMC7105 repeated sequence role, integration, excision, Pseudomonas

plasmid pMC7105 repeated sequence role, integration, excision, Pseudomonas syringae phaseoliciola 3240.00vobiocin, role DNA gyrase, Escherichia coli 4125. plasmid pMC110 elimination, nocialization 3819 plasmid pML31, replication origin, localization 3819 plasmid pMC10, transformation, DNA methylase Dpn11 genes, endodeoxyribonuclease Dpn1, endodeoxyribonuclease Dpn11, Streptococcus pneumoniae 4701 plasmid pMF3alB, transformation site selection, RNA genes intégration, mammalian

plasmid princalls, idension and site selection, any genes megitation, mammain cells, mice 3318. plasmid pMU223, +phage λ, cloning vectors construction, lactose operon+aroF gene fusion 2633. plasmid PMF2000, RAD2 gene, isolation, hybridization analysis, Saccharomyces

plasmid PNP-2001. KAD2 gene, isolation, hybridization analysis, Saccharomyces cerevisiae 2416. plasmid pNG 10, restriction endonuclease mapping, comparison plasmid pVe445 6830. plasmid pNG 18, restriction endonuclease mapping, comparison plasmid pVe445 6830. plasmid pNP40, phage c2 resistance, nisin antibiotic resistance, transformation, gene expression, Streptococcus lactic diacetylactis 1902. plasmid pNS1, transformation, plasmid pNS1981, tetracycline resistance, Bacillus subtilis 6821.

subthils 6621.
plasmid pNS1981, tetracycline resistance, Bacillus subthils 6621.
plasmid pOAD2, 6-aminohexanoate-cyclic-dimer hydrolase,
6-aminohexanoate-linear-oligomer hydrolase genes, restriction endonuclease
mapping, cloning, Flavobacterium 1200.
plasmid pOAD2, 6-aminohexanoate-cyclic-dimer hydrolase nylA gene, gene mapping,
hybridization analysis, Flavobacterium 3783.

hybridization analysis, Flavobacterium 3783.
plasmid pOA11, characterization, actinomycetes 5233.
plasmid pOA15, characterization, actinomycetes 5233.
plasmid pOA23, characterization, actinomycetes 5233.
plasmid pOA29, characterization, actinomycetes 5233.
plasmid pOA30, characterization, actinomycetes 5233.
plasmid pOA7, characterization, actinomycetes 5233.
plasmid pOC42, DNA biosynthesis, methylation effects on, cell-free system 6092.
plasmid pOC42, DNA biosynthesis, methylation effects on, cell-free system 6092.
plasmid pOC42, DNA biosynthesis, methylation effects on, cell-free system 6092.
plasmid pOC430321, citric acid transport, cloning, gene expression, gene mapping, Escherichia coli 7600.
plasmid pOC43035. citric acid quilization, restriction endonuclease mapping.

Escherichia coli 7600.
plasmid pOH3035, ottric acid utilization, restriction endonuclease mapping,
Escherichia coli 1007.
plasmid pOH50300 stability, Escherichia coli transformation 4043.
plasmid pPL1017, phage SP02 mediation transduction, Bacillus subtilis, Bacillus
amyloliquelaciens 7545.
plasmid pPL608, recA gene transformation, gene expression, Escherichia coli 2679.
plasmid pPL619, RNA polymerase prob gene, transversion mutation association
rifampicin antibiotic resistance, Escherichia coli 7618.
plasmid pPC3, transformation leucine genes, ARS site, Candida matlosa 2569.
plasmid pPD1 cloning vectors, nitrogen fixation nif gene transformation,
Enterobacter cloace a 555.

Enterobacter cloacae 535. plasmid pRD1 Escherichia coli, transformation Pseudomonas syringae, characterization 1207.

plasmid pRiA4b restriction endonuclease mapping, relationship virulence, Agrobacterium tumefaciens 1766.

plasmid pRi1855, effects on plasmid pTiAch5 transfer, plant cells, Agrobacterium 3974.

391/4.

Jelasmid pRi1855, restriction endonuclease mapping, hairy root neoplasia induction, Agrobacterium rhizogenes 6618. plasmid p rhizogenes 6622 plasmid pRK419, DNA biosynthesis, pir gene proteins regulation, mutation effects

on 1145

on 1145.
plasmid pRIo2037a, gene transfer Agrobacterium tumefaciens, characterization, Rhzcobium loti 530.
plasmid pRL1JI, nodulation nod gene, nitrogen fixation nif gene, transduction, Rhzcobium leguminosarum 2545.

plasmid pRP4+phage Mu, containing transposon Tn7, use mutagenesis, Rhizobium 2651.

plasmid pRP1.2+phage Mu, cosmids cloning vectors construction 2656. plasmid pRPS404 mutagenesis, photosynthesis genes, transposon Tn5.7, Rhodopseudomonas capsulata 6835. plasmid pRR983, drug resistance genes, gene amplification, recombination sites, role flanking regions 296. plasmid pRSF2124, +phage Mu DNA, transduction 1912.

Plasmids, (continued)
plasmid pRSF2124, stability, association exodeoxyribonuclease I,
exodeoxyribonuclease III, exodeoxyribonuclease V, Escherichia coli 2706,
plasmid pRSP20, glutamate synthase (NADPH) genes, organization, transcription
orientation, Escherichia coli 5301
plasmid pRtr514a, cloning vectors, host range, Rhizobium leguminosarum trifolii

4042 plasmid pSa, DNA biosynthesis origin nucleotide sequence, comparison plasmid R6K

5922

5922
plasmid pSAP21, 8-lactamase genes, transformation, host systems, Bacilius comparison Escherichia coli 4075, plasmid pSAS 1206. Escherichia coli, +Streptomyces lividans plasmid pJJ101, cloning vectors construction 4064, plasmid pSAS 1206. gene mapping, use cloning vectors, Escherichia coli 5474, plasmid pSC101 binding DNA outer membranes. Escherichia coli 2384, plasmid pSC101, cloning vectors, cosmids, construction, characterization 4062, plasmid pSC101, deletion mutant, nucleotide sequence, Escherichia coli 7368, plasmid pSC101, plasmid pHS1, copy number control, DNA biosynthesis, role rep101 gene products 6895. plasmid pSC101 training in pSC101 training norm. DNA proteins integration. Escharichia coli relasmid pSC101 trainitation norm. DNA proteins integration. Escharichia coli plasmid pSC101 trainitation norm. DNA proteins integration. Escharichia coli

plasmid pSC101, replication origin, DNA proteins interaction, Escherichia coli 4181

plasmid pSC101, replication, transposon Tn1000 insertion effects on 1635. plasmid pSG1, plasmid pSG2, association streptomycin biosynthesis, isolation,

plasmid pSG1, pasmid pSG2, association septiminer in symmetric section, Strephomyces griseus 4424 plasmid pSJ1, restriction endonuclease mapping, Staphylococcus aureus 5208, plasmid pSJ24, restriction endonuclease mapping, Staphylococcus aureus 5208, plasmid pSJ22, 5-terminus, inverted repeat, nucleotide sequence, Streptomyces rochei 5205. plasmid pSL1 comparison plasmid pSL2, repeated sequence, homology association

recombination, Streptomyces lavendulae 2362.
plasmid pSN, transformation sucrose fermentation, nisin biosynthesis,

plasmid pSN, transformation sucrose termentation, nisin biosynthesis, Streptococcus lactis 256 genes, gene mapping, Escherichia coli 2360. plasmid pSU23, insertion sequence IS91, restriction endonuclease mapping, Escherichia coli 5198 plasmid pSU316, replication, maintenance genes 7577. plasmid pSU316, restriction endonuclease mapping, hemolysis, Escherichia coli secono.

6629 plasmid pSV2, Escherichia coli, cells transformation, man, U.V. radiation effects

plasmid pSV2gpt, hepatitis B core antigen genes transformation, expression, man 1947

plasmid pSV2gpt transformed cells, CHO cells, xanthine phosphoribosyltransferase gene expression, deletion mutant detection 7167. plasmid pSV2330 cloning vectors, neuraminidase genes transformation, influenza A virus 1952

plasmid pSX267 Staphylococcus xylosus, plasmid pl258 Staphylococcus aureus, nucleotide sequence homology 3131. plasmid pSym, nifD gene, nifH gene, tet gene, transposition, gene expression

plasmid pSym, transformation, nodulation gene expression, gene mapping, Rhizobium meliloti 1951.

meiliott 1951.
plasmid pSym, transposons mutagenesis, methodology, Rhizobium meilioti 4030.
plasmid pTAR, stability, replication, Agrobacterium tumefaciens 3071.
plasmid pTAR001, restriction endonuclease mapping, gene mapping, cloning vectors,
Streptomyces lavendulae 4506.
plasmid pTBI9, antibiotic resistance, DNA biosynthesis determinants, Bacillus

plasmid pTB19, antibiotic resistance, DNA biosynthesis determinants, Bacillus subtilis, Bacillus stearothermophilus 5338. 
plasmid pTB913, kanamycin nucleotidytansferase genes, nucleotide sequence, Bacillus subtilis, Bacillus stearothermophilus 7377. 
plasmid pT1, transformation, association, mining, Thiobacillus 6800. 
plasmid pTiAch5, transfer plant cells, plasmid pTiC58, plasmid pRi1855, plasmid pTiAg57, effects on, Agrobacterium 3974, 
plasmid pTiAg57, effects on plasmid pTiAch5 transfer, plant cells, Agrobacterium 3974.

391/4. plasmid pTiA6, oncogenes, restriction endonuclease mapping, hybridization analysis, companson plasmid pTiAg63, Agrobacterium tumefaciens 7391. plasmid pTiA66, insertion, nucleotide sequence, association Ti plasmid, Agrobacterium tumefaciens 6615.

plasmid pTiC58, effects on plasmid pTiAch5 transfer, plant cells, Agrobacterium

3974.
plasmid pTp 6-10, restriction endonuclease mapping, Escherichia coli 1253.
plasmid pTP-4, chloramphenicol antibiotic resistance, restriction endonuclease mapping 5329.
plasmid pTP11 cloning vectors, construction, Bacilius subtilis 4760.
plasmid pTR3, cloning vectors, construction, man β-interferon gene expression, Escherichia coli 1936
plasmid pTW602, fragments, mini-Rts1, nucleotide sequence, Escherichia coli 3769, plasmid pTW602, fragments, mini-Rts1, nucleotide sequence, Escherichia coli 3769, plasmid pTZ22 transfer, protoplast fusion, Escherichia coli, Bacillius subtilis 2604.

2604.

plasmid pUB110, cloning vectors, transformation protoplasts Clostridium acetobutylicum 7584

plasmid pUB110, cloning vectors, transformation protoplasts Clostridium acetobutylicum 7584 plasmid pUB110, monomers, dimers, recombination, transformation, Bacillus subtitis 8807.

plasmid pUB110, Staphylococcus aureus, kanamycin nucleotidytansferase genes, nucleotide sequence, comparison plasmid pTB913 7377.

plasmid pUG303 cloning vectors, chloramphenicol, streptomycin antibiotic resistance, genetic markers, Anacystis indulans 84 seczision, kinetics association supercolling 1691.

plasmid pUG7, DNA palindromes, cruciform structure excision, kinetics association supercolling 1691.

plasmid pUH24, use cloning, Anacystis nidulans, nitrate reductase genes, association nitrate assimilation 6135.

plasmid pUH121, colning vectors construction, site-directed mutagenesis 1934.

plasmid pUH1, acry gene 3 terminus, endodeoxyribonuclease cloning sites insertion, clones identification 6144.

plasmid pUH, lacz gene 3 terminus, endodeoxyribonuclease cloning sites insertion, clones identification 6144.

plasmid pVB4856, cloning vectors construction, use Escherichia coli, Streptococcus sanguis hodi systems 2642.

plasmid pVB447, restriction endonuclease mapping, comparison plasmid pNG18, plasmid pVB1, gene mapping, Pseudomenas 7274.

plasmid pVS1, gene mapping, Pseudomonas 7274. plasmid pVS1, gene mapping, Pseudomonas 7274. plasmid pVS2, clonique vectors, papilloma virus (polivine) + plasmid pBR322+vv2 gene, construction, use transformation mammalia cell lines 4054.

607:50 do dependent osmoregulation ompF gene, ompC gene gene expression, outer membranes, Escherichia coll 4654 dhuh promoter, regulation characterization, Salmonella typhimurium 4677. DNA biosynthesis regulation, nucleotide sequence, SV40 5918. DNA conformation, endonuclease S1 (Aspergillus) sensitivity 5944.

DNA gyrase gyrB gene expression, temperature-sensitive mutant, Escherichia coli 7539. DNA nucleotide sequence, role RNA biosynthesis fibroin genes, characterization, Bombyx mori 3198.

Bombyx mori 3198.
dnaQ gene, gene mapping, nucleotide sequence, Escherichia coli 5173.
E2 gene, nucleotide sequence, adenovirus (human) 5 5952.
early region DNA-binding protein Ella gene, structure-activity relationships, adenovirus (human) 2 1151.
early region genes, nucleotide sequence, cytomegalovirus (human) 5211.
early region, nucleotide sequence, regulation RNA biosynthesis, adenovirus 3649.
early region, nucleotide sequence, role RNA biosynthesis, herpes simplex virus 1 7151.

early region 1A, characterization, adenovirus (human) 2 1864. early region 1A, transcription structure-activity relationships, adenovirus (human) 2 1863.

eary region, repeated sequence, site-directed mutagenesis effects on RNA biosynthesis 3360.

biosynthesis 3360.
echinomycin binding, nucleotide sequence specificity, flanking regions conformation, Escherichia coli 7202.
effects on chromatin structure, SV40 7673.
effects on tumorigenesis, relationship trans-4-acetylaminostilibene metabolites binding DNA, rats 5847.
Epstein-Barr virus DNA, homology, herpes simplex virus ribonucleotide reductase genes 7335.

genes 7335. Escherichia coli host systems use, β1-interferon gene expression 4763. fibroin genes, relationship transcription, site-directed mutagenesis 4667. function, role nucleotide sequence, Escherichia coli 339. gal promoter, lac promoter, RNA polymerase binding, DNA effects on, Escherichia

coli 6909

coli 6909.

galactose, lactose, cyclic AMP, receptors complex effects on, RNA polymerase activity. Escherichia coli 2497.
galactose promoter, catabolite activator protein binding, sites nucleotide sequence, Escherichia coli 2087.
galactose promoter, catabolite activator protein binding, sites nucleotide sequence, Escherichia coli 2087.
galactose promoter mutation, effects on gene expression galactose operon, Escherichia coli 4619.
gene expression, Shine-Dalgarno region, Escherichia coli 6102.
gene fusion, plasmid pCED6 cloning vectors, Bacilius subtilis 3367.
gene mapping, lyrT gene, Escherichia coli 330.
gene regulation, CDNA nucleotide sequence, phage T5 501.
gene 23, nucleotide sequence, RNA biosynthesis, phage T4 6114.
glin A promoter, ntr pramoter, role ntrC gene RNa biosynthesis, Salmonella typhimurium 5082.

ζ-globin genes, pseudogenes, RNA biosynthesis, man 6107

t-globin genes, pseudogenes, RNA biosynthesis, man 6107. glucocorticoids role, mammary tumor virus proviruses long terminal repeat expression, linking thymidine kinase genes, herpes simplex virus 1149. glutamate dehydrogenase genes, DNA nucleotide sequence, Escherichia coli 293. glutamine amidotransferase TRP3 gene, nucleotide sequence, structure, Saccharonyeas cerevisiae 7250. glutamine synthetase, glnA gene, transcription, nitrogen fixation effects on, Anabaena 1549.

glycoproteins, structure-activity relationships, gene regulation, herpes simplex virus 1 1150.

heat shock, RNA biosynthesis, htpR gene proteins, Escherichia coli 7530. histone H2A genes, characterization, Psammechinus miliaris 1083. histone H4 genes, structure activity relationships gene regulation, Xenopus laevis 1867

hybridization, Shine-Dalgarno region, Escherichia coli 2516. identification, transcription sites, mitochondria DNA, man 4680.

Promoters, (continued)

romidaris, Corimiae) imidaris, Corimiae) imidaris, Corimiae, Corim coli 1862

interaction RNA polymerase, bacteria 5502.
Interaction, rRNA RNA biosynthesis regulation, RNA polymerase I, Xenopus laevis

isoleucine promoter, gene regulation, ileR gene, Escherichia coli 4671. lac promoter, deletion mutant effects on cyclic AMP receptors, RNA biosynthesis, Escherichia coli 6766

Escherichia coii b/oo lac promoter, gene expression, Ap gene, Tc gene 6759. lac promoter, tryplac promoter, interferon gene regulation, man 3273. lac UV5 promoter, kinetics, interaction RNA polymerase, nucleotide sequence 3271 lacPUV5 promoter, site-directed mutagenesis, use oligodeoxyribonucleotides 6832. β-lactamase bla gene, mutation enhancement gene expression, R factor R6K 3947

3947 Jactose promoter, benzene denvatives stimulation, Escherichia coli 2530. lactose promoter, catabolite activator protein binding 1395. lactose promoter, catabolite activator protein binding, sites nucleotide sequence, Escherichia coli 2087.

lactose promoter, catabolite activator protein+cyclic AMP complex binding, Escherichia coli 2085

Escherichia coli 2085
lactose promoter structure, DNA-binding protein, Escherichia coli 7684
lactose promoter, tryptophan promoter gene fusion, cloning vectors construction,
use Escherichia coli host systems 2638
lactose promoters, cap-binding protein interaction, Escherichia coli 489,
lactose promoters mutants, effects on gene expression, Escherichia coli 215,
late region, DNA biosynthesis, role antigen T, transfection, SV40 7496.
leader sequence RNA biosynthesis, F factors 7116.
localization, association long terminal repeat, neomycin genes, gene mapping,
avian sarcoma virus 334.
orallezion, computer programs 3040.
malEFG operon, malK-lamB, Mutation effects on gene regulation, Escherichia coli
6099

6099
maltose promoter, catabolite activator protein binding 1395.
maltose promoter, catabolite activator protein effects on, Escherichia coli 1396.
Mammalia, characterization, use herpes simplex virus thymidine kinase genes, cloning vectors 4757.
mapping, rpsA operon, Escherichia coli 7534.
mellibiose operon, nucleotide sequence, Escherichia coli 5294.
metaliothionein, mice, gene fusion, man somatotropin genes, gene expression 2674.
5,10-methylenetetrahydrofolate reductase (FADH2) met gene, identification,
DNA nucleotide sequence, Escherichia coli 373.
ndfDk promoter, nitrogenase genes, nucleotide sequence. Bradythyzohium ianonicum

nrIDK promoter, nitrogenase genes, nucleotide sequence, Bradyrhizobium japonicum 7362.

17302.

InflH promoter, dinitrogenase nifDK operon, nucleotide sequence, transcription initiation sites. Bradyrhizobium japonicum 7381. nifH promoter, nitrogenase genes, nucleotide sequence, Bradyrhizobium japonicum 7362.

ntrogen fixation nif gene, hybridization analysis, nucleotide sequence, Rhizobium meliloti 3124.

Hnizobium mellioti 3124.

Introgen Inxation, nif gene, nucleotide sequence, Klebsiella pneumoniae 3133.

Introgen fixation nif promoter, characterization, Rhizobium 3943.

Introgenase, mutations effects on gene regulation, Klebsiella pneumoniae 1878.

nuclease urvC gene, nucleotide sequence, Eschericha coli 7365.

nucleotide sequence, association antigen T genes transcription, SV40 3280.

nucleotide sequence, effects on protamine genes RNA biosynthesis, cell-free system 4421.

system 442.1. undeotide sequence, growth stage, sporulation, Bacıllus subtilis 5425. nucleotide sequence, polyoma virus, SV40 347. nucleotide sequence, recognition specificity, RNA polymerase, Bacillus subtilis undeotide sequence, recognition specificity, RNA polymerase, Bacillus subtilis.

ncleohide sequence, statistical analysis 1683.
oligodeoxyribonucleolides synthesis 2829.
ornithine carbamoyltransferase arg3 gene, nucleotide sequence, role regulation gene fusion, Saccharomyces cerevisiae 1872.
pBAD promoters, function, RNA polymerase, araC gene proteins binding sites, localization effects on, Escherichia coli 2377.
phage A, multiple forms, RNA polymerase binding 584, phage A, use, identification transposition mechanisms, transposon Tn1 7559, phage 17, kinetics, interaction RNA polymerase, nucleotide sequence 3271, phenylalanyl-IRNA synthetase pheS, Toperon, Escherichia coli 5191.
phosphate-binding protein phoS gene, nucleotide sequence, Escherichia coli 3068.
plll promoter, characterization, insertion sequence 10 1109.
PL promoter, gene expression, Ap gene, Togene 6759.
pOUT promoter, RNA biosynthesis initiation, role cli gene, phage \(\lambda\), cell-free system 5812.
prepromether, lang genes, nucleotide sequence man 5942.

preproenkephalin genes, nucleotide sequence man 5942. prokaryotes gene regulation, Escherichia coli galactokinase genes, gene fusion 1877.

protein S genes, development, Myxococcus xanthus comparison Escherichia coli 4676

4076. 9a-1F gene, regulatory mutants, qa gene expression, Neurospora 6780. recA promoter, relationship U.V. radiation inhibition SOS repair, Escherichia coli 5359.

recombination, early region 1A genes transcription, adenovirus 2528. regions, transcription, corticotropin, lipotropin genes, nucleotide sequence, HeLa cells 1563.

regulation early region transcription, SV40 injected cells 7521. regulation gene expression, α-amylase Amy-1a gene, parotid gland, liver, mice 3294.

3/294.

regulation glucocorticoids transcription, mice, mammary turnor virus long terminal repeat, transfection, use papilloma virus (bovine) 1 204.

regulation, nucleotide sequence, Escherichia coli 7529.

regulation tetracycline antibiotic resistance gene expression, Escherichia coli 2511.

repeated sequence stimulation transcription, SV40 2291. repeated sequence, transformation, heat shock induction expression, Dictyostelium

3287 replacement, β-lactamase, preproinsulin gene regulation, Escherichia coli 2491

ribonuclease H rnh gene, gene mapping, nucleotide sequence, Escherichia coli

Promoters, (continued) Promyelocytic leukemia, (continued) RNA biosynthesis, activation, characterization, SV40 7159 RNA biosynthesis activation, HeLa cells infection, adenovirus, herpesvirus, SV40 myeloid cells differentiation induction, bromodeoxyuridine incorporation DNA, man 59. Pronuciel, Pronuciel, males, zygotes, microinjection, host systems, livestock 2664. 
Prooplomelanocortin, genes, gene expression, post-translation processing, thyroid, lung, pigs 2970 genes, mRNA biosynthesis, glucocorticoids effects on, rats 5771 precursors, mRNA, nucleotide sequence, genetic variance, Onchorynchus keta 5727 mRNA, cDNA nucleotide sequence, neurointermediate lobe, pigs 873 RNA genes, nucleotide sequence, comparison eukaryotes tRNA genes, adenovirus (human) 2 986.
RNA genes, transcription, genetic variance, Xenopus laevis 7509.
RNA f promoter, heat inactivation dna A gene proteins effects on, ColE1 DNA biosynthesis, Escherichia coli 5404. biosynthesis. Escherichia coli 5404.

RNA Il gromoter, heat inactivation dha A gene proteins effects on, CoIE1 DNA biosynthesis, Escherichia coli 5404.

RNA polymerase, Escherichia coli 5404.

RNA polymerase complex structure, use cross-linking 655.

RNA polymerase li dentification, rRNA genes mutagenesis, RNA biosynthesis 4739.

RNA polymerase II, identification, rRNA genes mutagenesis, RNA biosynthesis 4739.

RNA polymerase III, arbinging, hepatitis B virus 185.

RNA polymerase III transcription, structure-activity relationship, oligodeoxyribonucleotides synthesis, phage M13 cloning, tRNA genes, Alu family repeated sequence, HeLa cells 1159.

RNA polymerase, rucleotide sequence, homology, computer programs, Escherichia coli Gramatives, induction DNA damage, nuclei, liver, rats 3018 (arrangus 389).

RNA polymerase, rucleotide sequence, bronze discherichia coli 5404.

Propanolo.

P dairy starters, DNA homology, hybridization analysis, phages lysis, Streptococcus cremoris 3828 NNA polymerase recognition selectivity, role subunits, Escherichia coli 5503.

RNA polymerase, restriction endonuclease mapping, phorbol myristate acetate induction, Epstein-Barr virus 2599.

RNA polymerase, RNA biosynthesis, termination, phage T4, Escherichia coli cremoris 3828 expression; U.V. raditation, psoralen induction DNA cross-linking, aducts, Salmonella typhimunum 2316. Phage A; induction DNA polymerase biosynthesis, Escherichia coli 2718, phage P1, copy number control mutants, nucleotide sequence, gene mapping 4561 phage P1, induction SOS repair, DNA biosynthesis regulation inhibition, Escherichia coli 6060. Phage P1 plasmids, DNA biosynthesis, regulation, Escherichia coli 447, restriction endonuclease mapping, hybridization analysis, phage ФFSW 4541. INA pulymerase, NNA biosymmesis, termination, phage 14, Escherichia coli infection 7616.

RNA polymerase proD gene, heat shock, nucleotide sequence, association dnaG gene, Escherichia coli 7526.

RNA, flanking regions transcription, mice 4659.

RNA genes, localization, transcription, restriction endonuclease mapping, mice 2522. restriction endonuclease mapping, hybridization analysis, phage ⊕F P-roplolatectone, DNA repair inhibition, lymphocytes, man 7468 Proplonibacterium shermanii, cyanocobalamin intracellular levels, DNA biosynthesis 2446. 1-N-Propyl-Introacurea, DNA interaction, products, bases characterization, calif thymus 952 Propylthouracii, metabolism, inactivation peroxidase, thyroid, rats 725. ACSC2
RTNA genes, promoters, location, reviews, Xenopus laevis 18.
rRNA 16S genes, nucleotide sequence, Halobactenum halobium 6635.
tRNA 16Wet genes, base pairs substitution effects on transcription, Xenopus laevis 3364.

IRNA Leu genes, relationship DNA-binding protein, Saccharomyces cerevisiae 6988 tRNA Pro genes, mutation, RNA biosynthesis, processing, transcripts stability, Caenorhabditis elegans 6105.

IRNA Tyr genes, nucleotide sequence, yeasts 1024. role transcription, SV40 1882.

TRR gene transcription, nucleotide sequence, Escherichia coli 6757. prevention, cyclophosphamide, toxicity, rats 4937 Prorelaxin, role transcription, SV40 1882.

"mB gene transcription, nucleotide sequence, Escherichia coli 6757.

"mB operon, DNA nucleotide sequence, gene libranes, Bacillus subtilis 286.

"mB promoter, deletions effects on guanosine tetraphosphate inhibition RNA
biosynthesis, Escherichia coli 1164.

Saccharomycas cerevisiae, gene fusion Escherichia coli β-D-galactosidase lacZ
gene, gene regulation analysis 1267.

Saccharomycas cerevisiae host systems, regulation thymidine kinase gene
expression, herpes simplex virus 3957.

single-stranded DNA biosynthesis, phage λ, association Escherichia coli
proteins 7525. Prorelaxin, genes, pigs ovary, transformation, gene expression, Escherichia coli 536 Prorocentrum triestinum, DNA biosynthesis, association cell division 436. Prostaglandin A1, antiviral activity, vaccinia virus infected L cells, gene expression inhibition Prostaglandin D2, Prostagiandin Dz.
DNA polymerase inhibition, mastocytoma cell culture, mice 6188.
Prostagiandin F2a,
phosphorylation, ribosomal protein S6, 3T3 cells, mice 2871
Prostagiandin 2c,
genetic control DNA biosynthesis, DNA polymerase activity, mice 4594. proteins 7525. spoOH gene, nucleotide sequence, Bacillus licheniformis 3122 spöGH gene, nucleotide sequence, Bacillus lichenformis 3122.
spoVG gene, mapping, deletion mutant, Bacillus subbilis 1630.
structure, role, gene regulation nitrogen fixation nirflDKY operon, Klebsiella pneumoniae 251.
subtilisin sprE gene, nucleotide sequence, gene mapping, RNA biosynthesis, Bacillus subtilis 5178.
SV40 containing containing cloning vectors, role gene regulation, COS cells 1944.
SV40, use cloning vectors construction 553.
SV40+mice immunoglobiums µ chain genes chimeras, RNA processing 3657.
+tandem genes, interferon, transformation, gene expression enhancement, man 6864, tet promoter, RNA polymerase association, characterization, plasmid pBR322 3406.
tetA gene, tetB gene, DNA nucleotide sequence, transposon Tn10 297.
transcription, gene regulation, tileB gene, Escherichia coli 4670.
tor promoter, gene regulation, tileB gene, Escherichia coli 4670.
transcription, identification, nucleotide sequence, mRNA, herpes simplex virus 1
7092. Prostaglandins, mediation hormones effects on mitosis, reviews 1413. Prostaglandins receptors, binding alkaline phosphatase genes, operators, leukocytes, man 4186. Prostate, androgens+receptors complex, purification, relationship nuclease susceptibility, nuclei, rats 6297.
nuclei, RNA polymerase I, activity, testosterone, cycloheximide effects on, rats 5510. prostatic binding protein subunits, mRNA, nucleotide sequence, rats 1515. rats, mRNA polyadenylation, gonadoliberin inhibition 5063. Prostatic binding protein, subunits, mRNA, nucleotide sequence, prostate, rats 1515. Prostatic-binding protein,

Signer association, Alu family repeated sequence characterization, rats 7452.

C3 (1) gene association, Alu family repeated sequence characterization, rats 7452.

C3(1) gene comparison C3(2) gene, nucleotide sequence, rats 5261. 7092 1/392. snRNA U1, role splicing hnRNA, HeLa cells 4363.
SnRNA U5, SnRNA U2, SnRNA U4, SnRNA U5, SnRNA U6, purification, characterization, Ehrich ascites tumor cells 2859
snRNA U3 role, rRNA processing 5000.
role, histone H3 RNA biosynthesis termination, microinjection, Psammechinus

role, histone H3 HNA biosynthesis termination, microinjection, "sammechinus miliaris 1337 role, monoclonal antibodies binding antibodies," role splicing mRNA, cell-free system 2969. signal recognition particles, disassembly, reconstitution, role proteins transport, endoplasmic reticulum 2869 structure, hinRNA, electron microscopy 5332. templates, regulation transcoption, replication, vesicular stomatitis virus

iltrastructure, hnRNA processing 6938

ultrastructure, hnHNA processing 6938 Ribonucleoside-diphosphate reductase, activity relationship cell division, genetic control deoxyribonucleotides formation, reviews 1419. DNA biosynthesis, iron chelating agents inhibition, herpes simplex virus 1, vesicular stomatitis virus 6738 isolation, characterication, role, DNA biosynthesis, Saccharomyces cerevisiae

4827

4827
mRNA, gene expression, association protein biosynthesis, Escherichia coli 5086.
mRNA, hybndization analysis, characterization, Escherichia coli 880.
Ribonucleoside-triphosphate reductase,
lativity relationship celi division, genetic control deoxyribonucleotides
formation, reviews 1419.
correlation DNA biosynthesis, electron microscopy, immunofluorescence, mammallian
cells 4817. cells 4832 inhibition, lymphocytes transformation, man 6911.

Ribonucieosides,

carbamylation methodology 735. effects on 3'-amino-2',3'-dideoxycytidine cytotoxicity, DNA biosynthesis, L1210 cells 61.

ceils 01.
2(3)-0-phosphonylmethylene derivatives, synthesis 44.
Ribonucleotide reductase,
genes, herpes simplex virus, homology Epstein-Barr virus DNA, promoters 7335.
inhibition, N-hydroxy-N-aminoguanidine derivatives, N.M.R., tumor cells, rats 4128

41/20. subunits, genes, ultrastructure, temperature-sensitive mutant, herpes simplex vrus 1 7/286 Ribonucleotides,

binding ribonuclease (pancreatic), cattle 1955. conformation, computer programs 2159. conformation, Raman spectroscopy 4955.

phosphate, bases interactions, polynucleotides conformational analysis 794.

phosphate, bases interactions, polynucleotides conformational analysis 794.

Ribosomal A protein,
C.D., Halobacterium cutirubrum, Methanobacterium thermoautotrophicum 2857.

Ribosomal protein E-130, secondary structure, N.M.R., Escherichia coli 3604.

Ribosomal protein L714;
Jysine identification, ribosomal subunit 50S, Escherichia coli 5703.

Ribosomal protein L111, structure, micrococcin antibiotic resistance mutants, Bacillus megaterium 4321.

Structure, introtein L12, active sites, functional morphology, computer graphics, chloroplasts, Spinacea, comparison Escherichia coli 4317, role, release factor 1, release factor 2 binding, ribosomes, Escherichia coli

7052

Ribosomal protein L16, ribosomal subunit 50S, binding 3'-terminus tRNA, Escherichia coli 5012. Ribosomal protein L17, amino acid sequence, Bacillus stearothermophilus comparison Escherichia coli

Ribosomal protein L17s, nbosomal protein L25 genes, nucleotide sequence, mRNA characterization, yeasts

Ribosomal protein L18,

nibosomai protein L18,
ribosomai protein L25 rRNA 5S, ribonuclease role, Escherichia coli 2870.
Ribosomai protein L20,
prl1 gene, gene mapping, Escherichia coli 5191.
Ribosomai protein L25,
binding rRNA 5S, ribonuclease role 2870.
ribosomai protein L17a genes, nucleotide sequence, mRNA characterization, yeasts
7282.
Ribosomai protein L17a genes, nucleotide sequence, mRNA characterization, yeasts rRNA 5S complex, crystallization, X-ray diffraction, Escherichia coli 1482 Ribosomal protein L27.

amino acid sequence, Bacillus stearothermophilus comparison Escherichia coli 2855.

zoso.
gene mapping, Bacillus subtilis 1008.

Ribosomal protein L29,
isolation, characterization, electrophoresis, peptide mapping, ribosomes, liver,
rats 4316.

Ribosomal protein L32, ipL32 gene, nucleotide sequence, introns, mice 5303.

Ribosomal protein L4,

inhibition ribosomal protein S10 operons transcription, mechanisms 208

Ribosomal protein L44, role protein biosynthesis activity, yeasts 7053.

Ribosomal protein L45, role protein biosynthesis activity, yeasts 7053.

The protein universe security, reasts 7000.

Ribosomat protein L5 receptors,
rRNA SS, restriction endonuclease mapping, nucleotide sequence, ribosomes, liver,
rats 5737.

Ribosomal protein L6,

crystal structure, X-ray diffraction, Bacillus stearothermophilus 5701. isolation, characterization, electrophoresis, peptide mapping, ribosomes, liver, rats 4316.

localization, ribosomes, fluorescence, electron microscopy, Escherichia coli 1477

Ribosomal protein L7, gene families isolation, characterization, mice 7447. role, release factor 1, release factor 2 binding, ribosomes, Escherichia coli 7052

Ribosomal protein P1, interferon phosphorylation, regulation viruses protein biosynthesis, cell culture

repeated sequence, role, translation, poly(U), poly(A), Escherichia coli 2854. structure, function, reviews 8. Ribosomai protein 510. ribosomal protein S10, operons, transcription, mechanisms ribosomal protein L4 inhibition 208. Ribosomal protein S11, gene mapping, Bacillus subtilis 1008. Ribosomal protein S12,

genes, nucleotide sequence, elongation factor Tu association, Euglena gracilis, Escherichia coli comparison 7441.

Ribosomal protein 515, rpsO gene, polyribonucleotide nucleotidyltransferase pnp gene, gene regulation, chromosomes, Escherichia coii 7513.

Ribosomal protein S17,

localization, ribosomes, fluorescence, electron microscopy, Escherichia coli 1477

Ribbsomal protein S19, genes, nucleotide sequence, chloroplasts, Nicotiana debneyi, Spinacea oleracea 7255.

Ribosomal protein S26, localization, affinity labelling, mRNA binding sites, ribosomes, liver, rats

Ribosomal protein S33, genes, DNA nucleotide sequence, yeasts 1021. Ribosomal protein S5,

rpsE gene, insertion sequence 1 effects on gene expression, Escherichia coli 5093.

5093.

Ribosomal protein S6,
heat shock induction dephosphorylation, association protein biosynthesis,
Drosophila melanogaster 626.
phosphorylation, regulation, role pH, oocytes, Xenopus 6378.
phosphorylation, v-src gene proteins, microinjection, oocytes, Xenopus 6937.
protein kinase phosphorylation, brain, rats 2853.

Ribosomal protein S7,
genes, nucleotide sequence elongation factor Tu association, Euglena gracilis,
Escherichia coli comparison 7441.

Ribosomal protein S9,
rRNA 16S recognition sites, characterization, Escherichia coli 139.
Ribosomal protein S9,
amino acid sequence, Bacillus stearothermophilus comparison Escherichia coli

2855.
gene mapping, Bacillus subtilis 1008.

Ribosomal proteins,
amino acid sequence hornology, ribosomes, Escherichia coli 6380.
aminoglycoside antibiotics inhibition synthesis, liver, rats 3809.
biosynthesis, amino acid starvation effects on, Escherichia coli 5004.
biosynthesis, tumover, development, Dichyostellum discoideum 4323.
comparison, electrophoresis, radioimmunoassay, ribosomes, Podospora 5700.
C.D., E.S.R., companson, Escherichia coli 6379.
cross-linkage, rRNA 28S, rRNA 18S, U.V. radiation, liver, rats 138.
electrophoresis, C.D., Neurospora crassas 4319.
electrophoresis, C.D., Neurospora crassas 4319.
electrophoresis, Conservation, chloroplasts, Spinacea oleracea, comparison
Escherichia coli 4991.

Escherichia coli 4991

Escherichia coli 4991.

fartilization effects on, eggs, Pseudocentrotus depressus, Hemicentrotus pulcherrimus, Anthocidaris crassispina 5706.
genes, hybridization analysis, gene mapping, Enterobacteriaceae 5973.
genes, nucleotide sequence, structure, codons specificity, Drosophila melanogaster 7316.
interactions polyribonucleotides+HRNA, Escherichia coli 2874.
iodeacetamide effects on activity, Tetrahymena thermophila 843.
localization ribosomal subunit 30S, Escherichia coli 4324.
nomenclature, Saccharomyces cerevisiae 833.
phosphorylation, heat shock, Mammalia 5714.
phosphorylation kinetics, hypertonicity, protein biosynthesis rates, cell lines, mice 6384.
purification, characterization, phosphorylation, electrophoresis, chloroplasts, punfication, characterization, phosphorylation, electrophoresis, chloroplasts, Spinaceo oleracea 2861.
punfication, characterization, Saccharomyces cerevisiae 835.

purification, high-performance liquid chromatography methodology, Escherichia coli, reticulocytes, rabbits 5698. nbosomal subunit 30S, purification, high-performance liquid chromatography, Escherichia coli 2216.

ribosomal subunit 50S, localization, immmunoelectron microscopy, Escherichia coli

mRNA, introns, role splicing, homology snRNA U1 5'-terminus, yeasts 2962 mRNA levels, 2,4-D effects on, hypocotyls, seedling, Glycine max 916. mRNA, post-transcription processing, mutation effects on, Saccharomyces cerevisiae 5786.

corrorisate 5,789.

RNA, protein brosynthesis, RNA biosynthesis coordination, starvation, Tetrahymena pyriformis 4399.

RNA, protein biosynthesis, RNA biosynthesis coordination, nutritional shifts, Tetrahymena pyriformis 4400.

Ribosomal proteins, (continued)
rRNA 16 S complex, conformation, X-ray scattering, neutron scattering, velocity sedimentation 1480
rRNA 16S, rRNA 23S binding, X-ray scattering, neutron scattering 2860.
rRNA biosynthesis, gene regulation attenuation, Escherichia coli 7506 sulfhydryl groups, dindrophenyl haptene interaction, Escherichia coli 834 sup 1 gene, transformation, Saccharomyces cerevisae 3324.
Ribosomal subunit 30S, applications and the second control prof. 2 (automorphic prof. applications).

Ribosomial subunit 30S, analysis, use ethylene glycol bis[3-{2-ketbotryraldehyde}) ether] cross-linking, Escherichia coli 137 demeclosycline binding, Escherichia coli 2219 initiation factor 1 interaction, N.M.R., Escherichia coli 852 poly(U) localization, use antibodies, electron microscopy, prokaryotes 5705 reconstitution, tritum labelling rRNA 5S, rRNA 16S 2237 ribosomal proteins localization, Escherichia coli 4224. ribosomal proteins purification, high-performance liquid chromatography, Escherichia coli 4216. IfRNA Phe, rRNA 16S 3'-terminus, fluorescence, Escherichia coli 848 secondary structure, electron microscopy, Escherichia coli 6438 structure analysis, use glycol bis[3-{2-ketobutyraldehyde}) ether] cross-linking, Escherichia coli 136 Ribosomal subunit 35S, genes, transcription initiation sites, flanking regions, nucleosomes, veasts

genes, transcription initiation sites, flanking regions, nucleosomes, yeasts 2494.

Ribosomal subunit 40S

binding initiation factor 2 +tRNA fMet+GTP complex, assembly kinetics, eukaryotes 5007.

5007.

cross-linking initiation factor 3, reticulocytes, rabbits 1496 protein biosynthesis regulation mechanisms, reviews, eukaryotes 2812 proteins interaction, identification, ribosomes, liver, rats 2867 (RNA 185 conformation, kethoxal probes, yeasts 4992.

sedimentation, ionic strength role, liver, rats 5707 Ribosomal subunit 48S,

Ribosomal aubunit 48S, tormation, protein biosynthesis, role RNA, infection, adenovirus 5008. 
Ribosomal aubunit 50S, 
Bacillus stearothermophilus. Spinacea oferacea RNA SS Locusta migratoria mitochondria, cattle liver RNA reconstitution 5723. 
characterization, use X-ray scattering, Escherichia coli 4994 crystals, efectron microscopy. Bacillus stearothermophilus 837. 
demeolocycline binding, Escherichia coli 2219, 
dimers, conflormation, energetics, Escherichia coli 4990 
isolation, characterization rRNA 55, rRNA 23S complex, electron microscopy, ribonuclease III mutants, Escherichia coli 2856 
rbosomal protein LT/L12, lysine identification, Escherichia coli 5703. 
rbosomal protein LT6, binding 3'-terminus tRNA, Escherichia coli 5012. 
ribosomal protein LT6, binding 3'-terminus tRNA, Escherichia coli 5012. 
ribosomal protein LT6, binding 3'-terminus tRNA, Escherichia coli 5012. 
ribosomal proteins, localization, immmunoelectron microscopy, Escherichia coli 4996

4996
structure analysis, use glycol bis(3-(2-ketobutyraidehyde)ether]
cross-Iniking, Escherichia coli 136.
structure, roystallography. Bacillus stearothermophilus 2217.
structure, electron microscopy, computer applications, Escherichia coli 1478.
structure, electron microscopy, Escherichia coli 5697.
Ribosomal subunit 60S,
protien biosynthesis, muscular dystrophy defects, skeletal muscle, hamsters 2866
rRNA 265 association, conformation, kethoxal probes, yeasts 4993.
rRNA 5.8S, structure, fluoration, reviews, eukaryotes 12.
Ribosomal subunits.

Ribosomal subunits,

cell cycle effects on, ribosomes, Streptococcus pyogenes 5710. 
iodoacetamide effects on activity, Tetrahymena thermophila 843. 
rRNA, structure, magnesium, spectrophotometry, Escherichia coli 839.

rRNA, structure, magnesum, spectropnotometry, escinericial coili cost. Ribosomes, acridine orange, furocoumarins, ketones inactivation, oxygen roles 6385. acridine orange, turocoumarins, ketones inactivation, oxygen roles 6385. binding nucleotide sequence, gene regulation chloramphenicol acetyltransferase cat gene, Staphylococcus aureus, Bacillus pumilus 6775. binding sites, coat protein genes protein biosynthesis, 5-terminus effects on, phage MS2 1169. binding sites, localization, computer programs 3040. binding sites, nucleotide sequence effects on gene expression, Escherichia coli 1068.

binding sites, preproinsulin mRNA, translation initiation, rats 830.

binding sites, preproirisulin rimina, transation initiation, rats 800. binding sites, synthetic, Bacillus subtilis, urogastrone genes, transduction, gene expression, man 4788. biosynthesis, bacteria, review 3511. biosynthesis, bacteria, review 3511. biosynthesis, metabolism, regeneration, liver, rats 5002. biosynthesis metabolism, regeneration, liver, rats 5002. biosynthesis mRNA, regulation, relationship nutrition, Tetrahymena pyriformis 4674.

biosynthesis, phorbol myristate acetate, dimethylbenzanthracene induction,

epidermis, mice 1489.

biosynthesis, trichloroethylene, acrylonitrile effects on, Saccharomyces 7057.

cistrons, crossing-over, electron microscopy, chloroplasts, Euglena gracilis

conformation, cycloheximide dependent growth, sup1 gene, sup2 gene mutation, Saccharomyces cerevisiae 836.

Saccharomyces cerevisiae 836. conformation, stability, sucrose effects on, liver, rats 6381. crystallization, association precursors reticulum, chick embryos 4987. crystalis, transmission electron microscopy characterization, chloroplasts, Pisum sativum 2863. culture (media) effects on metabolism, Eschenchia coli 4327. demeclocycline binding, Eschenchia coli 2219.

dormancy, protein biosynthesis, elongation inhibition, zoospores, Blastocladiella emersonii 5718.

elongation, codons nucleotide sequence, Escherichia coli 6390. elongation factor 2 interaction, nucleotides mediation, microsomes, liver, rats

elongation factors binding, Penicillium cyclopium cyclopiazonic acid inhibition,

elongation factors binding, Periodium cyclopium cycloplazonic acid immunon, HeLa cells 2222 elongation mechanisms, tRNA photoaffinity labelling, Eschenichia coli 6387 elongation, HRNA, binding sites, Eschenichia coli 5013 enumeration, mRNA 16S late region, nucleotide sequence, SV40 3630 genes, 5-terminus, association snRNA RNA polymerase I genes, hybridization analysis, man 6660.

Ribosomes, (continued)

genes, chromatin, isolation, nucleoli, Physarum polycephalum 3460. genes, cloning, hybridization analysis, restriction endonuclease mapping, Paracentrotus lividus 1761.

genes, flanking regions, repeated sequence, RNA biosynthesis initiation sites, rats 7244 genes, repeated sequence enhancement RNA polymerase I activity, Xenopus laevis

7024
genes, spacer regioni, microinjection, gene expression, Xenopus laevis 6153, inactivation proteins, purification, activity. Saponana officinalis, Agrostemma grithago, Asparagus officinalis, Hura cropitans 5717. induction maturation, occytes, Xenopus laevis 6091. insulin effects on, role calcium inonphores, adipocytes 844, interaction IRNA ifMel, fluorescence, Escherichia coli 5688. localization proteins, rRNA, ligands, models, reviews, Escherichia coli 2807. mutants, aminoglycoside antibiotics dependent growth, Escherichia coli 146. mutants, aminoglycoside antibiotics dependent growth, Escherichia coli 147. NADPH-adrendoxin reductase, adrendoxin proteins biosynthesis, cytoplasm, mitochondria, adrenal cortex, cattle 1483.

operons, restriction endonuclease mapping, deletion mutant, chloroplasts, Euglena gracilis 3102.

peptidyltransferase, cooperativity phenylalanyl-tRNA fragments binding, Escherichia coli 847.

ESCRETCHIS COII 04/1.

peptidyttransferase sites, photoaffinity labelling, rRNA 23S rRNA 11S cross-linkage, Escherichia coii 850.

peptidyttransferase sites, photoaffinity labelling, rRNA 23S rRNA 11S cross-linkage, Escherichia coii 850.

peptidyttransferase sites, substrates, inhibitors binding effects on, Escherichia

coli 6386 coll ostes.

Phytolacca americana proteins effects on, ribosomes salinity, eukaryotes 5010. 
poly(U) localization, use antibodies, electron microscopy, prokaryotes 5705. 
polyribosomes, purification methodology, lactation, mammary giland, rats 4988. 
precursors, proteins purification, CHO cells 4320. 
protein biosynthesis, aminoglycosides inhibition, mechanisms, cell-free system 
protein biosynthesis, aminoglycosides inhibition, mechanisms, cell-free system

1493

protein biosynthesis role, gene regulation, antibiotic resistance ermC gene, ermD gene, Staphylococcus aureus, Bacillus licheniformis 4662.

gene, Staphylococcus aureus, Bacillus lichenforms 4602.

protein biosynthesis, tRNA Phe binding, elongation, Streptomyces aureofaciens, cell-free system 5825.

proteins, protein kinase phosphorylation sites, platelet-derived growth factor stimulation, Balbrc 373 cells 346.

protons release, magnesium inductions, Escherichia coli 4318. punfication, cell cycle effects on ribosomal subunits, Streptococcus pyogenes

5710

5710.
release factor 1, release factor 2 binding, nbosomal protein L7, ribosomal protein L12 role, Escherichia coli 7052.
nbosomal protein L6, ribosomal protein L29, isolation, characterization, electrophoresis, peptide mapping, liver, rats 4316, ribosomal protein S17, ribosomal protein L6 localization, fluorescence, electron microscopy, Escherichia coli 1477.
ribosomal proteins, amino acid sequence homology, Escherichia coli 6380.
ribosomal proteins, comparison, electrophoresis, radioimmunoassay, Podospora 5700

5700.

RNA. (continued)

nucleotide sequence, gene products amino acid sequence, conservation regions.

Also virus 2909

Aino virus 2909 nucleotide sequence, hemagglutnins genes, influenza A virus 171. nucleotide sequence, hemagglutnins genes, influenza A virus 172. nucleotide sequence homology, avian infectious bronchitis virus 2906. nucleotide sequence, hybridization analysis, nuclei, liver, brain, sheep 1519. nucleotide sequence, hybridization analysis, zoospores, Blastocladiella emersonii 5309

5309
nucleotide sequence, Korean hemorrhagic fever virus 1530.
nucleotide sequence, long terminal repeat, retrovirus 2916.
nucleotide sequence, methodology 5746.
nucleotide sequence, methodology frestriction endonuclease mapping,
encephalomyocardins virus 5031.
nucleotide sequence, nucleoproteins genes, influenza B virus 3642.
nucleotide sequence, polysical properties, books 6996.
nucleotide sequence, polymbosomes, gene expression, growth stage,
Blastocladiella emersonii 5046
nucleotide sequence, protein P3, protein P4, strains, alfalfa mosaic virus 5728.
nucleotide sequence, protein P3, protein P4, strains, alfalfa mosaic virus 5728.
nucleotide sequence, protein P3, protein P4, strains, alfalfa mosaic virus 5728.
nucleotide sequence, protein P3, protein P4, strains, alfalfa mosaic virus 5728.
nucleotide sequence, protein P3, protein P4, strains, alfalfa mosaic virus 5728.
nucleotide sequence, protein P3, protein P4, strains, alfalfa mosaic virus 5728.

virus 3646 nucleotide sequence, restriction endonuclease mapping, cowpea mosaic virus 5729

incleditude sequence, rotavirus (humar) 6417.
nucleotide sequence, rotavirus (humar) 6417.
nucleotide sequence, Sindbis virus 3635.
nucleotide sequence, biacco streak virus 2919
organization, membranes translocation ribonucleoproteins complex, pancreas, dogs
631.

packaging, defective mutant, biochemical characteristics, Rous sarcoma virus 4389

packaging, defective mutant, Rous sarcoma virus 4388. packaging, role v-src gene flanking regions repeated sequence, Rous sarcoma virus 5027. phosphorylation nonstructural proteins affinity bluetongue virus 7690

priospriorylation from circular proteins aming underly grow with 7 roby physical properties, mapping, use pactamycin, circlet paralysis virus 1531. physicochemical properties, sedimentation, Machupo virus 1523. poly(A) containing, physical properties, developmental stages, Ceratitis capitata

4344.
poly(C) nucleotide sequence, encephalomyocarditis virus 7072.
poly(A), repeated sequence distribution, electron microscopy, embryos, Xenopus laevis 573 poly(C), restriction endonuclease mapping, heterogeneity, relationship RNA biosynthesis, foot-and-mouth disease virus 6429 poly(A)-containing, call thymus, DNA polymerase I protein biosynthesis, characterization, beli-free system 5621.

poly(A)-containing double-stranded, induction protein biosynthesis, oocytes, Xenopus laevis 6815.

Xenopus laevis 6815. poly(A)-containing, translation products, polyribosomes, forebrain, rats 5827. poly(A)-containing, c1-antitrypsin protein biosynthesis, lung, rats, cell-free system 5805. polyadenylation, mRNA processing, polyoma virus 3651. polyadenylation, polymorphism, hybridization analysis, use, classification leukemia, man 3620 polyadenylation, sites specificity, adenovirus, cell-free system 4418. potassum, calcium binding, tobacco mosaic virus 1505. potato spindle tuber viroid, nucleotide sequence homology snRNA hepatoma cells 1055.

precipitation, use cations, citrus exocortis viroid 1504

pretreatment induction influenza virus disease resistance, experimental infection, mice 225.

primers, structure, DNA biosynthesis, embryos, Drosophila melanogaster 7076. primers, structure, function, DNA biosynthesis, site-directed mutagenesis effects

primers, structure, unction, DNA biosymnesis, site-pirected mutagenesis effects on, ColET plasmid 339 probes, use mRNA detection specificity, hybridization analysis methodology, embryos, Echinodermata 3404, processing, mating types MATa1 gene, restriction endonuclease mapping, introns, Saccharomyces cerevisiae 7277.

processing, prokaryotes, viruses, phages, yeasts, eukaryotes, mitochondria, books

6299. processing, SV40 promoters+mice immunoglobulins genes chimeras 3657. protein biosynthesis coat protein precursors, Solanum nodiflorum mottle virus 2986

proteins complex, purification, characterization, electrophoresis, cowpea mosaic virus 4335

virus 4335.
proteins ergosterol complex, cytoplasm, crystalinity, electron microscopy,
Neurospora crassa 4189.
purification, characterization, wheat mosaic virus inflectivity 2271.
purification, high-performance liquid chromatography 924.
purification methodolgy, reviews 1422
purification methodology, Streptomyces coelicolor 5838
recombination, hybridization analysis, protein biosynthesis 6841.
recombination, induction babfi locus polymorphism, nucleotide sequence, Babesia

bovis 4359
reconstitution, Bacillus stearothermophilus ribosomal subunit 50S, liver RNA

relocisionation, declared selection information in the control of the control of

virus 3633.

ribonuclease components, stability, temperature-sensitive mutant, Escherichia

ribonuclease components, stability, temperature-sensitive intualiti, Escriencina coi 1650.

RNA biosynthesis artefacts, misreading, cleavage, secondary structure, tobacco mosaic virus, cell-free system 5829

RNA-binding protein, characterization, infectious pancreatic necrosis virus 7686. snRNA interactions, sedimentation, proteins, determinants, man 6403.

role, chronic myeloid leukemia induction, lymphocytes reactivity, man 4141. role initiation DNA biosynthesis, reverse transcription, avian sarcoma virus 4978.

role, outer membranes proteins, omp F gene, omp C gene, gene regulation, gene expression, Escherichia coli 4661 role ribosomal subunit 485 formation, protein biosynthesis, infection, adenovirus

rubella virus, characterization 2240

rubella virus, carlacterization 2240.
secondary structure, algorithms 2888.
secondary structure, computer programs 2890.
secondary structure, computer programs, alfalfa mosaic virus 2892.

RNA. (continued)

na, (continued) secondary structure, ECHOvirus 22 3639. secondary structure, formation, predictions 2889 secondary structure, models, reviews 6412

secundary structure, models, reviews b412 secondary structure, relationship self-association 4360, separation, high-performance liquid chromatography, Escherichia coli 857, separation techniques, use ethanol, citrus exocortis viroid infected Gynura aurantiaca 2226

aurantiaca 2226 single-stranded, electrophoresis, maize stripe virus 6422. single-stranded, double-stranded, electrophoresis, maize stripe virus 6422. single-stranded, quinolinic phthalbocyanin staining, association magnesium chloride, light microscopy 858. single-stranded, RNA biosynthesis, eukaryotes viruses, reviews 4911. single-stranded, secondary structure, computer programs 2887. single-stranded, staining, alcian blue analogs+magnesium chloride 2884. size characterization, strains barley stripe mosaic virus 882

sarcoma virus 3661.
levels, glycoproteins, inflammation, liver, rats 231.
levels modulation, carcinoma, mammary gland, rats 1528.
levels, multiple forms, fibronectin cDNA, nucleotide sequence, man 7073.
levels, multiple forms, eminotransferase protein biosynthesis regulation, reviews, mammalian cells 2811.
levels, role, genetic control amino acids biosynthesis, Saccharomyces cerevisiae 5412.

levels, role pyruvate decarboxylase PDC1 gene regulation, yeasts 6110. levels, storage proteins, methionine effects on, Glycine max 6490. levels, tryptophan trpR gene, gene expression, Escherichia coli 6103. levels, tubulin biosynthesis regulation, neurons regeneration, retina, Carassius

auratus 889.

levels, tyrosine 3-monooxygenase, detection, gene regulation, adrenal medulla,

levels, tyrosine 3-monoxygenase, detection, gene regulation, adrenal medulla brain, rats 7516. 
ligandin subunits, protein biosynthesis, regulation, cell-free system 5822. 
light effects on, differentiation, Physarum polycephalum 1580. 
lipoprotein (low density) receptors, feedback regulation, hybridization analysis, plasma membranes, cattle 3777. 
localization, eggs, embryos, Chaeropterus pergamentaceus 3617. 
luibberin, purification, characterization, hypothalamus, rats, mice, man 2983. 
a2-macroglobulin induction, liver, rats, induction 1582. 
maternal inheritance, role hypoxanthine phosphorbosyltransferase protein biosynthesis, embryos, mice 5083. 
maturation, ribonucleoproteins role, eukaryotes, reviews 7003. 
metallothionein accumulation, heavy metals, iodoacetic acid induction, hepatocytes, mice 4405. 
metallothionein, transcription, Salmonella typhosa endotoxins induction, mice 3672.

methylation, metabolism, S-tuberoidinylhomocysteine effects on, cytoplasm, HeLa cells 4343.

methylation, S-adenosylmethionine, analogs regulation, cytoplasmic polyhedrosis virus 1561.

virus 1551.

§2-microglobulin, nucleotide sequence, initiation complex mutation, unterferon induction, Burkitt's lymphoma cell lines, man 3621. microinjection, chloride channels, acetylcholine receptors, gene expression, electric organs, Torpedo 7604. microinjection, Semiliki Forest virus envelopes structural proteins, biosynthesis, transport, Xenopus 4004.

uransport, Adirupus 4004.

microtubules proteins gene expression, development, brain, cattle 7170.

monoclonal antibodies, micronijection, Golgi apparatus, vesicular stomatitis

virus membrane proteins, BHK cells 6814.

nonstructural proteins gene 8, splicing, nucleotide sequence, influenza virus

6077.

5077

5077 nucleotide sequence, actin, skeletal muscle, man 7109. nucleotide sequence, cytoplasm, embryos development, Echinoidea 4353. nucleotide sequence, double-stranded RNA, defective mutant, Saccharomyces cerevisiae killer factor 7068. nucleotide sequence, glutamyl-alanyl-tyrosine monoclonal antibodies, immunoglobulins variable region, J region, D region heavy chains 5023. nucleotide sequence, monoclonal antibodies use, immunoglobulins variable region arinion acid sequence 2898.

amino acid sequence, microcineta antibodies use, immunoglobulins variable regiamino acid sequence, possporycholine antibodies, idiotypes 2255. nucleotide sequence, prosphorycholine antibodies, idiotypes 2254. nucleotide sequence, protein biosynthesis inhibition, cell-free system. Paramecium primaurelia 6493. nucleotide sequence, regulation RNA biosynthesis, Sendai virus, vesicular stomatitis virus homology 7094. nucleotide sequence, vasoactive intestinal peptide, peptide histidine isoleucine carcinoma, man 4345. 2;5-oligo(A) polymerase, interferon simulation, Ehrlich ascites tumor 580. 2;5-oligo(A) polymerase, cloning 1929. 2;5-oligo(A) polymerase, interferon induction, nucleotide sequence, hybridization analysis, man 3186. organization, vaccinia virus 2241. Ornithine carbamoyttransferase precursors, protein biosynthesis 2289. ornithine decarboxylase, testosterone effects on, kidney, mice 7146. overlaad genes, herpes simplex virus 1 3182. peptides, nucleotide sequence, skih, xenopus laevis 2933. peptidyl dipeptide A isoenzymes, protein biosynthesis, reticulocytes, lung, rabbits 2982. phylogiatine ammonia-lyase, protein biosynthesis, reticulocytes, lung, rabbits 2982.

phenylalanine ammonia-lyase, protein biosynthesis, cell-free system 3690 phosphoenolpyruvate carboxykinase (GTP), RNA biosynthesis, insulin effects on, liver, letuses, rats 5064.

mRNA, (continued)

htma, (continued)
phosphoproteins, gene expression, brain, rats 7171
phosphoproteins, gene expression, cerebellium, rats 7173,
placente extracts, cell-free system translation, man 5103
placenta, quanidine hydrochloride extraction, protein biosynthesis, wheat germ
cell-free system 5804,
poly(A) alkylation, carcinoma, Krebs II ascites cells 6406

poly(A)-containing, 5'-terminus, nucleotide sequence, mitochondna, liver, rats

poly(A)-containing, biosynthesis, histocompatibility antigen H-2 regulation, Brucella abortus antigens stimulation splenocytes, mice 5782 poly(A)-containing, BZ sequence repeated sequence, nucleotide sequence, poly(A)-containing, BZ sequence repeated sequence, nucleotide sequence, orientation, liver, mice 5745 poly(A)-containing, cells gene, protein biosynthesis, glucocorticoids inhibition, tumor cell lines 5068 poly(A)-containing, cell surface antigens, Paramecum primaurelia, isolation, microinjection, translation, Xenopus laevis oocytes 230 poly(A)-containing, characterization, Rhodospirillium rubrum 2901 poly(A)-containing, complexity relationship cell cycle, starvation, hybridization analysis, Physarum polycephalum 5735 poly(A)-containing, differentiation, roots, Vicia faba 4373 poly(A)-containing, bybridization analysis, infected Nicotiana tabacum, sonchu

poly(A)-containing, hybridzation analysis, infected kicotiana tabacum, sonchus yellow net virus 1507. poly(A)-containing, kilbridzation analysis, infected kicotiana tabacum, sonchus yellow net virus 1507. poly(A)-containing, kilbridzation yruses, Saccharomyces cerevisiae 2242 poly(A)-containing, membrane proteinis, cell-free system translation, chloroplasts. Spinacea offeracea 5098

poly(A)-containing, N6-benzyladenine incorporation, cytokinins concentration, Nicotiana tabacum 4375

poly(A)-containing polyribonucleotides microtubule proteins 1571 poly(A)-containing, purification, proteoglycans contamination 4337, poly(A)-containing, purification, light, chloroplasts membrane proteins, Pisum salivum 5810.

sativum 5810.
poly(A)-containing, turnover, development, Artemia 210
poly(A)-containing, use, cDNA selection, brain, rats 2407
poly(A)-lacking, gene expression, development, brain, mice 7121.
poly(A)-lacking, phycobiliproteins, ribulosebiphosphate carboxylase biosynthesis.
Cyanidium caldarium, Porphyridium aerugineum 6496.
polyadenylation, gionadoliberin inhibition, prostate, rats 5063.
polyadenylation, kineltics, embryos, mice 5084.
polyadenylation levels, role protein biosynthesis gene regulation, development, Dictyostellum discordeum 5437.
polyadenylation, poly(A) polymerase specificity, characterization, cell-free system 2992.

system 2992 polyadenylation regulation, nuclear membranes transport, reviews, eukaryotes

4906. post-transcription splicing, recognition, regulation, role tRNA Lys, mitochondria, Tetrahymena 5800 precursors, splicing, psbA gene, thylakoid membranes, chloropiasts, Euglena

gracilis 2896.

gracinis costo.

precursors splicing, ribonucleoproteins antisera inhibition, adenovirus 3437.

precursors, splicing, sequence 5784.

Streptomyces granaticolor,
RINA polymerase purification 4103.

Streptomyces griseofuscus,
+ Escherichia coli plasmids, cloning vectors construction 1939.

Streptomyces griseous.

aminobenzoate synthetase genes, transformation, gene expression 2685 plasmid pSG1, plasmid pSG2, association streptomycin biosynthesis, isolation, characterization 4424.

characterization 4424
Streptomyces hygroacopicus,
DNA-binding prolein, chromosomes folding, characterization 6264
hygromycin B phosphotransferase genes, transformation, gene expression 1921
Streptomyces kanamycelicus,
kanamycin antibiolic resistance genes, transformation 1917
Streptomyces lavendulee,
plasmid pSL1, companison plasmid pSL2, repeated sequence, homology association
recombination 2362
plasmid pTA4001, restriction endonuclease mapping, gene mapping, cloning vectors
4506

Streptomyces Ilvidans,

monophenol monooxygenase genes, cloning, gene expression 557.
plasmid plJ101, + Escherichia coli plasmid pSAS1206, Cloning vectors construction protoplasts, host systems, antibiotic resistance genes, transformation, gene

expression 5476.

streptomyces hydroscopicus hygromycin B phosphotransferase genes, transformation, gene expression 1921.

transformation aminobenzoate synthetase genes 2685.

Streptomyces olivaceus, plasmid SCP2, transformation, interspecific recombination 1201.

Streptomyces pervulus, actinomycin D+oligodeoxyribonucleotides complex, N.M.R. 2832.

Streptomyces qingfengmyceticus, plasmids, DNA, isolation, characterization 2433.

Streptomyces ravidus, antibacterial activity, ravidomycin, inhibition RNA biosynthesis, DNA expression 5476

streptomyces ravidus, antibacterial activity, ravidomycin, inhibition RNA biosynthesis, DNA biosynthesis Bacillus subtilis 3250.

Streptomyces rochel, plasmid pSLA2 5-terminus, inverted repeat, nucleotide sequence 5205.

Streptomyces tenjimariensis, istamycin production, plasmids, restriction endonuclease mapping, hybridization analysis 6624. Streptomyces venezuelae, his locus, trp locus, transduction, phage SV1 1884

Streptomycin, antibiotic resistance, genetic markers, plasmid pUC303 cloning vectors, Anacystis nidulans 6847 antibiotic resistance str gene, gene mapping, gene regulation, transposon Tn5

5424

5424
biosynthesis, association plasmid pSG1, plasmid pSG2, isolation, characterization, Streptomyces griseus 4424, effects on protein biosynthesis regulation, reviews, Escherichia coli 4222 effects on ribosomes tRNA proteins complex dissociation, Escherichia coli 4334 resistance genes, hybridization analysis, transposons, gene expression, Escherichia coli, Rhizobium meliloti 997

Streptonigrin, induction sister chromatid exchange, lymphocytes, rabbits 3451 inhibition DNA biosynthesis, ataxia telangiectasia, man 471 Streptioeporangium brasilionea, plasmids DNA, restriction endonuclease mapping 5155

Streptosporangium viridogriseum,
plasmids DNA, restriction endonuclease mapping 5155

association DNA biosynthesis, brain, rats 1139

oxidation, diadenosine tetraphosphate, adenylation nucleotides biosynthesis Salmonella typhimurium 4961

Stringent response,
RNA biosynthesis, spermidine, putrescine effects on, Escherichia coli 4393
Strongylocentrotus
tranposon TU1, isolation, characterization, repeated sequence 1731

Strongylocentrotus purpuratus, actin gene expression isotypes, hybridization analysis, muscles, embryos constitutive 4397

actin gene families, gene expression relationship development 6471

Strongylocentrotus purpuratus, (continued)
DNA histone H1 complex, C.D., comparison, calf thymus 6968
eggs, histones mRNA, localization 6398
embryos, development, nucleosomes structure 1359.

embryos, development, inclosionies structure 1003.
embryos, diadenosine tetraphosphate analogs, synthesis, characterization 7031
embryos, eggs, poly(A)-containing ribonucleoproteins+mRNA, proteins association 2864

histones genes, hybridization analysis, Arbacia lixula, Paracentrotus lividus

nucleosomes, histones composition, relationship development 7653. oogenesis, relationship mRNA accumulation, histones genes 6474 mRNA translation, caps structure, cell-free system 1583.

Structural proteins,

DNA polymerase (RNA-dependent) antigenic relationship, biochemical properties, retrovirus 1981.

retrovirus 1991. genes, gene mapping, Vaccinia virus 1774. genes, protein biosynthesis, characterization, rubella virus, Vero cells 4348. precursors, mRNA translation, rubella virus 2240, RNA, lipids, cross-linking, nearest neighbor relationship, bovine leukemia virus

4146.
Semiliki Forest virus envelopes, mRNA microinjection, biosynthesis, transport,

Xenopus 4004 Stylonychia, yronycria, micronuclei, DNA repeated sequence, identification, hybridization analysis, eukaryotes 7351.

Outsignois 351.

Stylonychia temnae,
DNA, restriction endonuclease mapping, comparison Stylonychia mytilus 319,
macronuclei, gene amplification, copy number control 1138.

Stylonychia mytilus,

antibiotic resistance gene expression, transposition, Escherichia coli host

effects on cell division, proteins, DNA biosynthesis, embryos, Echinoidea 1833.

Styrene, genotoxicity, DNA repair damage, hepatocytes, rats 7480. Styrene oxide,

interaction guanosine 4240.

Styx,

nacronuclei, DNA siolation, methodology 1802.

Submandibular gland,
preprorenin mRNA, biosynthesis, processing, characterization, mice 1576

Submaxillary gland, cDNA, gene libraries, nucleotide sequence, androgens, dissociation, mRNA, mice 2411.

kallikrein enzymes gene families, cloning, nucleotide sequence, processing, mice 7330

7.390 renin genes, nucleotide sequence, mice 5237 senne proteinase genes nucleotide sequence, homology senne proteinase genes, mice 1754. Substance P,

precursors, cDNA nucleotide sequence, brain, cattle 337. Subtillain,

Bacillus amyloliquefaciens, site-directed mutagenesis, substrate specificity, characterization 6831.

genes, cloning, cDNA nucleotide sequence, gene expression, Bacillus amyloliquefaciens 1058.

amyloiquetaciens 10b8.
genes, nucleotide sequence, gene mapping, Bacillus subtilis 3782.
spr£ gene promoters, nucleotide sequence, gene mapping, RNA biosynthesis,
Bacillus subtilis 5178.
Succinate dehydrogenase,
genes, hybridization analysis, comparison Eschenchia coli, gram-negative
bacteria 2378.

O-Succinylhomoserine (thiol)-lyase,

genes, cloning, Bacıllus subtilis 508 Sucrose,

Sucrose, armnoacyl-tRNA hydrolysis potentiation 4303. armnoacyl-tRNA hydrolysis potentiation 4303. dietary intake, chromatin transcription, RNA polymerase II, rats 7652. effects on RNA polymerase I, RNA polymerase I activity, intestine, rats 6897. fermentation, nisin biosynthesis, transformation, Streptococcus lactis 2561. Sucrose synthese, genes mutation, transposons, Zea mays 7258.

Sugar,

alcohols, alkylating agents, sister chromatid exchange, hamsters cells 6948.

role, iron(II) containing bleomycin cleavage DNA 2313. Sulfassiazine, induction sister chromatid exchange, lymphocytes, man 1349.

suffydryl groups,
effects on radiation induction DNA damage, Bacillus subtilis 6542,
nbosomal proteins, dinitrophenyl haptene interaction, Escherichia coli 834.
Suffochiorantine,

inhibition DNA polymerase, aminoacyl-tRNA synthetase, cell-free system, Escherichia coli 2716.

Sulfolobus acidocaldarius, chromosomes, proteins, comparison Thermoplasma acidophilum, characterization 2066

1'-Sulfooxysafrole, 1'-hydroxysafrole metabolites, formation DNA adducts, tumors, liver, mice 5140.

comparison phosphorus-32, radioactive labelling DNA probes 3188. containing oligodeoxyribonucleotides analogs, role replication kinetics, Escherichia coli DNA polymerase I, comparison phage T4 DNA polymerase 1303. Suffur dloxide, multaograpes polymerase 1322.

mutagenesis, activity, DNA polymerase I activity, Escherichia coli 3910.

Sunset Yellow FCF, stmulation RNA biosynthesis, nuclei, liver, rats 2278.

Supercoilling, CoIE1, isolation, characterization 3710. comparison structure, DNA, HeLa cells 1785. Supercoiling, (continued)

upercoiling, (continued) conformation, DNA, phage PM2 2431, differentiation, transcription activation effects on, SV40 662 DNA, characterization, recombination, phage x 2018. DNA, chromatin, oocytes, Xenopus laevis 5548 DNA cruciform structure, interaction endodeoxyribonuclease VII, plasmids 6895. DNA, gene regulation differentiation, transcription, transformation 6781 DNA gyrase, DNA topoisomerase regulation. Escherichia coli 601. DNA, inverted repeat, cruciform structure, kinetics, plasmid plRbke8 1060 DNA, kinetics, length effects on helix, mathematical models 3855. DNA methylation effects on supercoiling conformation. B-form Z-form transitions

DNA methylation effects on supercoiling conformation, B-form Z-form transitions 3716

DNA, purification methodology, tomato golden mosaic virus 4580.

DNA, reviews 20.
DNA, role persistent infection, hepatitis B virus, monkeys 3899.
DNA, SV40 4891.

DNA, SV40 4891.
DNA, synthetic peptides induction, x-ray diffraction, DNA topoisomerase I activity 1789.
DNA, thermodynamics, mathematical models, CoIE1 amp, Escherichia coli 6039.
DNA topoisomerase I effects on, Salmonella typhimurium 603.
DNA Z-form effects on 88.
effects on DNA B-form Z-form transitions, structure, regulation, Escherichia coli

412 effects on DNA gyrase gene expression, Escherichia coli 1171. B-form Z-form junctions, DNA, pilasmids 411. negative, DNA structure association nucleotide sequence, ColE1, Escherichia coli

413  $\lambda$  nucleosomes, DNA structure, recombination, phage  $\lambda$  2017.

nucleosomes, DNA structure, recombination, phage X 2017.

Superhelix,
chromatin, role histone H2A, erythrocytes, chickens 5550.
DNA, y radiation, heavy ion radiation damage superhelix, CHO cells 3023.
DNA, conformation transitions, statistical analysis 94.
DNA, intercalating agents interaction, light scattering, plasmid pBR322 4465.
DNA, structure-activity relationships, RNA biosynthesis, RNA polymerase, Bacillus

subblis 5760 Superoxide,

Superoxide, induction DNA damage, copper(II) catalysis, mechanisms 5888, induction chromosome aberrations, cell culture, hamsters 6222 Superoxide dismutase,

mRNA, nucleotide sequence, gene expression, chromosome 21, man 875. Suppressor mutant,

uppressor mutant, capsid protein genes, DNA biosynthesis, phage T4 4600. deletion mutant malE gene maltose-binding protein signal peptides, gene products, Escherichia coli 5695. efficacy, uar gene temperature-sensitive mutant effects on, Escherichia coli

6376 mrtochondria DNA, chloramphenicol antibiotic resistance, Saccharomyces cerevisiae

3011 nonsense mutant, missense mutant, nucleotides insertion tRNA Gly, Escherichia coli 4978

TRINA gene expression, assays, influenza virus 1503. sup3-i gene, characterization, effects on translation, Schizosaccharomyces pombe 2847.

Suppressors rRNA 15S genes, mitochondria, temperature-sensitive mutant, Saccharomyces

cerevisiae 6109.

RNA, genes, flanking regions, nucleotide sequence, characterization, liver, chickens 3194.

tRNA, termination, nucleotide sequence, Escherichia coli 4475. SV40

+ adenovirus (human) 2 hybrids, recombination, integration sites, nucleotide sequence 3804.

sequence 3804.

antigen I, antigen I, transformation, BHK-21 cells 3994.

antigen T, antigen I, transformation, BHK-21 cells 3994.

antigen T, binding DNA repeated sequence 2454.

antigen T, binding nucleoproteins complex 5583.

antigen T, binding replication origin, secondary structure effects on 1389.

antigen T, binding replication origin, structure-activity relationships 1987.

antigen T, genes, transformation, nucleotide sequence requirements 6665.

antigen T mutants binding replication origin 2074.

antigen T gromoters, DNA initiation sites identification, monoclonal antibodies, immunoassays 681.

antigen T preceptors, nucleotides specificity, methylation, athylation, 5064.

antigen T, ribonucleoproteins, role, monoclonal antibodies binding, sites characterization 2009.

characterization 2009.

antigen T role, lissue culture, cells microinjection 4003.

antigen T, translation, adenovirus promoters regulation, cell lines 2945.

atternuation sites, RNA polymerase II transcription termination 2938.

chromatin, replication, structure 656.

cloning vectors, c-Ha-ras gene mutants, transfection 2549

cloning vectors, early region promoters, regulation gene expression mice

y-interferon genes, monkeys, cell lines 516

cloning vectors, hepatitis B surface antigen genes, transfection, gene expression

4082.

cloning vectors, proinsulin genes man, transfection, mice pituitary (anterior) cell lines 1943.
cloning vectors, transfection, β-interferon gene regulation, nucleotide

Sodimer de de la constant de la cons

deletion mutant, agnoprotein genes, flanking regions, nucleotide sequence, structure 7223

DNA biosynthesis, niterferon effects on, mechanisms, models 6736.

DNA biosynthesis, Okazaki fragments nucleotide sequence specificity 6707.

DNA biosynthesis, replicative intermediates identification 7462.

DNA biosynthesis, spatial distribution 4591.

DNA conformation, lasers U.V. radiation, vacuum, effects on 4453.

DNA, deoxynbonuclease is sensitivity, transformed cells, mice 5159.

DNA, DNA topoisomerase I nucleotide sequence specificity, wheat germ, liver, rats 7634.

7634.
DNA, early region, methylation effects on gene expression 5768.
DNA, + Eschenchia coli RNA polymerase complex, +-calf thymus RNA polymerase II complex, unwinding regions 580 DNA, globin genes linkage, RNA splicing mechanisms, rabbits 6441.

Transposon Tn 501, conjugation, association mercury resistant mutant, Bradyrhizotium japonicum 4692.
Transposon Tn1 induction mutation, gene mapping, genomes, phage P1 3998. transposon Tn1, transposition mechanisms identification, promoters use, phage

A 7599 transposon Tn10, cloning vectors, promoters, tetracycline antibiotic resistance gene regulation, Escherichia coli 4748. transposon Tn10 cloning vectors, tetracycline gene regulation 7585. transposon Tn10 insertion sequences isolation, Escherichia coli, use phage Mu transduction 1887.

transposon Tn10, insertion sequences isolation, Escherichia coli, use phage Mu transduction 1887 transposon Tn10, initegration mechanisms, Escherichia coli 4719. transposon Tn10, linkage lac gene+argF gene mutation, use gene fusion, transduction, conjugation, Escherichia coli 4055. transposon Tn10, tet operon, tet repressor binding, DNA polymerase interaction, gene regulation 2501. transposon Tn10, tet aperosessor binding, DNA polymerase interaction, gene regulation 2501. transposon Tn10, tettacycline antibiotic resistance gene expression, repressors binding sites, Escherichia coli 1728 transposon Tn10, tettacycline antibiotic resistance, tetR gene, 3-terminus, nucleotide sequence, Escherichia coli 7359. transposon Tn10, tetracycline antibiotic resistance tetA gene, nucleotide sequence, plasmid pBF322, Escherichia coli 5324. transposon Tn10, tetracycline repressors, gene regulation, antibiotic resistance genes overproduction, Escherichia coli 3955. transposon Tn10, insertion plasmid pSC101, effects on replication 1635. transposon Tn1721, resolvase inpR gene DNA nucleotide sequence, homology, transposon Tn21, inverted repeat, plasmis kilon, gene, of factor RK2, 4743, transposon Tn21, inverted repeat, plasmis kilon, gene, of factor RK2, 4743, transposon Tn21, inverted repeat, plasmis kilon, gene, of factor RK2, 4743, transposon Tn21, resolvase inpR gene DNA nucleotide sequence, homology, complementation, transposon Tn21, transposon Tn23, transposon Tn24, Escherichia coli 4063, transposon Tn2410, gene mapping, Shigelia flexurer 7315.

transposon Tn2410, β-lactamase bla gene, restriction endonuclease mapping,

transposon Tn2410, 8-lactamase bla gene, restriction endonuclease mapping, Salmonella typhimurium 539.

transposon Tn2501, nucleotide sequence, characterization, relationship transposon Tn951, Escherichia coli 4476.

transposon Tn2921, fosfomycin antibiotic resistance genes, conjugation, gene expression, Escherichia coli 876.

transposon Tn3, Escherichia coli RNA polymerase binding sites, transcription initiation sites 1057

transposon Tn3, insertion, nucleotide sequence, plasmid pCG86, Escherichia coli 7366.

7366

transposon Tn3, nucleotide sequence homology repeated sequence DNA, Chironomus thummi 336

thummi 336 transposon Tn3, nucleotide sequence, relationship transposition immunity, plasmids 5959 transposon Tn3, recombination sites, nucleotide sequence 5220. transposon Tn3, transposition immunity 6813. transposon Tn3, transposon Tn3 transposon Tn3 transposon Tn3 transposon Tn396(CH), plactariase genes, restriction endonuclease mapping, molecular weight, characterization flanking regions, inverted repeat, phage

```
Transposons, (continued)

Ф80Ap 4058
transposon Tn4001, antibiotic resistance, inverted repeat, secondary structure,
Staphylococcus aureus 5189.
transposon Tn5, bacteria, plasmids inverted repeat stimulation recombination,
yeasts 3329.
                yeasts 3329, transposon Tn5, cosmids construction, transduction, Escherichia coli 3963 transposon Tn5, host systems, Xanthomonas campestris campestris 5478 transposon Tn5, induction auxotrophy mutants, Rhizobium melilioti 4002 transposon Tn5, induction, mutagenesis, Bradyrhizobium ipaponicum 4738, transposon Tn5, mutagenesis, construction profeinase deficient mutant. Pseudomonas aeruginosa 1933.

Transposon Tn5 mutagenesis, nodulation genes, Rhizobium leguminosarum 4037 transposon Tn5, mutagenesis, use, DNA nucleotide sequence, cloning, reviews, ornokaryotes euklarvnites 4035.
                  prokaryotes, eukaryotes 4035.

transposon Tri5, mutagenesis, use, gene mapping hisD gene, hisG gene, Klebsiella pneumoniae 5216.
                  transposon Tn5 mutagenesis, use, genetic analysis pathogenicity, Xanthomonas campestris 4032.
                  transposon Tn5, neomycin antibiotic resistance genes, transposition, Stylonychia
               transposon Tn5, neomycin antibiotic resistance genes, transposition, Stylonychia myfilus host systems 2586.

transposon Tn5, papilloma virus (bovine) 1, neomycin resistance genes transfection, host genetic control, gene expression, mammalian cells 560. transposon Tn5, phage P1 containing, stability, transduction bacteria 2543. transposon Tn5, site-directed mutagenesis, nitrogen fixation nif gene, Rhizobium leguminosarum 4741. transposon Tn5, site-directed mutagenesis, restriction endonuclease mapping, hybridization analysis, Acinetobacter calcoaceticus 2623. transposon Tn5, siteptomycin antibiotic resistance str gene, gene mapping, gene redudation 5424.
                transposon 1ns, streptomycin antibiotic resistance str gene, gene mapping, gene regulation 5424. 
transposon 1n5, streptomycin, kanamycin resistance genes, hybridization analysis, gene expression, Escherichia coli, Ahizobium meilioti 997. 
transposon 1n5, transposition, Ent plasmid, Escherichia coli 3999. 
transposon 1n5, transposition frequency, copy number control, Escherichia coli 6771.
                transposon Tn5, transposition Stylonychia mytilus, Escherichia coli host systems 6852.
                transposon Tn5, transposon Tn903 comparison biturosinphosphotransferase genes, biturosin resistance, Bacillus circulans 1659.
                transposon Tn5, use transposition, conjugation, Rhizobium meliloti, Escherichia
               coii 755c.
Transposon Tris-VB32 probes, promoters, kanamycin kinase gene expression,
Caulobacter crescentus 4652.
Transposon Tri501, resolvase tripR gene DNA nucleotide sequence, homology,
complementation, transposon Tri1721 Transposon Tri1721 TO44.
Transposon Tri501, transposon Tri1721, recombination sites, nucleotide sequence
              Caulobacter crescentus 4652. 
transposon Tn501, resolvase tnpR gene DNA nucleotide sequence, homology, complementation, transposon Tn21, transposon Tn721 1004, transposon Tn501, transposon Tn21, transposon Tn721 1004. 
transposon Tn501, transposon Tn21, transposon Tn21, transposon Tn501, transposon 
                transposon Tn554, transposition inhibition, tnpl locus, Staphylococcus aureus
           6812 transposon Tn7, cosmids containing, use mutagenesis, Rhizobium 2651 transposon Tn7, genetic control 4721, transposon Tn7, bast systems, Xanthomonas campestris campestris 5478, transposon Tn5, 7n, lasmid pRPS404 mutagenesis, photosynthesis genes, Rhodopseudomonas capsulata 6835, transposon Tn7, restriction endonuclease mapping, Escherichia coll 6628, transposon Tn7, steri-creted mutagenesis, plasmids, Rhizobium mellioti 6138, transposon Tn7, transposition stereospecificity, immunity, bacteria 7556, transposon Tn7, use site-directed mutagenesis, coljugation, tetracycline antibiotic resistance gene regulation, R factor R27 6789, transposon Tn9, chloramphenicol acelytiransfersos genes, cloning 509, transposon Tn9 integration, insertion sequence 1 activity, role flanking regions 5176.
                         6812
               transposon Tn9, mutagenesis, use phage P1 vectors, Klebsiella pneumoniae 6837
              transposon Tn903 kanamycin antibiotic resistance genes, antibiotic resistance clones identification, Saccharomyces cerevisiae 2684.
              transposon Tn916, cloning vectors, gram-positive bacteria genes, Escherichia coli
           5473. transposon Tn951 β-D-galactosidase genes, transposition, host systems Xanthomonas campestris 2583. transposon Tn951 (doing yectors, plasmide pGC91.14, use lactose operon, Zymomonas mobilis 551. transposon Tn951 gene expression, association β-D-galactosidase activity, Agrobacterium 3327. transposon Ty insertion effects on alcohol dehydrogenase isoenzymes ADH2 gene Trittaus services, Saccharomyces cerevisiae 2489. transposon Ty, proteins identification, gene amplification, plasmid pMA91 use, yeasts 7550. transposon Ty+8-D-galactosidase genes, gene fusion, gene expression, 4566 chloroplasts, cytoc 4566
              transposon Ty1+β-D-galactosidase genes, gene fusion, gene expression,
         transposon Ty1+9-D-galactosudase genes, gene fusion, gene expression, Saccharomyces cerevisiae 2686. 
transposon Ty1, aspartate carbamoytransferase gene expression promotion, Saccharomyces cerevisiae 4404. 
transposon Ty1, nucleotide sequence, Saccharomyces cerevisiae 322. 
transposon Ty1, nucleotide sequence, Saccharomyces cerevisiae 322. 
transposon 10, nucleotide sequence, homology tetracycline antibiotic resistance, Haemophius paramifluenzae 7341. 
transposons Tn903, kanamycin phosphotransferase genes, use site-directed mutagenesis, cauliflower mosaic virus 2628. 
use, plasmids transformation, mutagenesis, bacteria 4000. 
renaveration.
  Transversion,
apurinic sites, apyrimidinic sites effects on DNA biosynthesis, phage M13 473
apurinic sites, apyrimidinic sites ellects of the dosposition freponem pallidum, antigens genes, cloning, gene expression 561 DNA, cloning, gene expression 505. Tris(4,7-diphenylphenanthrolline)ruthenium(II), binding DNA, B-form, Z-form 4463. Trisdimefon, effects on chromatin, nucleoli, Trincum aestivum, Medicago sativa 2743. Trisbitanedarinium rips. (III).
```

Trichloroadeninium zinc (II), synthesis, structure 1435.
Trichloroethanol,

```
Trichloroethanol, (continued)
phage T4 3491
Trichloroethylene,
effects on RNA biosynthesis, ribosomes biosynthesis, Saccharomyces 7057

                                                                                                                                                                                                                                                       Triploidy,
zygotes, 5-fluorodeoxyuridine, chloroplasts gene transfer, Chlamydomonas
                                                                                                                                                                                                                                                                  reinhardtii 746.

    o-phenanthroline cobalt(III) complex, double-stranded helix cleavage,
stereospecificity, photoactivation 7186.
    Trisodium phosphonoformate,

                                                                                                                                                                                                                                                                 fects on RNA biosynthesis, influenza virus 4401.
                                                                                                                                                                                                                                                      Triticum,
                                                                                                                                                                                                                                                            HIBCUM,
2-form DNA, hybridization analysis 1690.
leaves, coleoptile, mitochondria, nuclei, DNA biosynthesis 1803.
plant breeding, genetic engineering 2618.
ribosomes, peptidyftransferase sites localization, use lyconne 1479.
sister chromatid exchange, benzene, ethanol, saccharin induction 4173.
wheat germ, chloroplasts, glutamyl-iRNA synthetase isoenzymes, purification,
                                                                                                                                                                                                                                                                 characterization 816.
                                                                                                                                                                                                                                                             wheat germ, chloroplasts, glutamyl-tRNA synthetase isoenzymes, kinetics 817. yeasts, tRNA Trp, nucleotide sequence, function 7045.
                                                                                                                                                                                                                                                            aleurone layer, α-amylase genes, gibberellic acid regulation gene expression
                                                                                                                                                                                                                                                            chloroplasts, cytochrome f genes, hybridization analysis, nucleotide sequence
                                                                                                                                                                                                                                                            cultivars, chromosome 6, nucleotide sequence mapping, linkage, genetic markers,
                                                                                                                                                                                                                                                            gene mapping, crossing-over 4499.
embryos, germination, DNA biosynthesis rate, use deoxyadenosine 4592
                                                                                                                                                                                                                                                           embryos, germination, poly(A) polymerase activity 4801. endosperm, purothionin, inhibition protein biosynthesis, mechanisms, wheat germ
                                                                                                                                                                                                                                                          endosperm, purothionin, inhibituon protein biosynthesis, mecnanisms, wheat germ cell-free system 5807.

etiolation shoots, aging coleoptiles, mitochondria DNA biosynthesis 1144 gliadin genes, nucleotide sequence 7308.

gluten cDNA nucleotide sequence 1042.

mitochondria DNA, tRNA fMet genes, inhation factors identification 1464 mitochondria, rRNA 185 genes, nucleotide sequence, secondary structure, comparison rRNA 185 genes, Escherichia coli 3136.

mitochondria, rRNA 185, rRNA 55 genes, repeated sequence, homology 7444 nucleoli, chromatin, benomyl, triadimefon, mephfuroxam, aluminum ethylphosphite effects on 2743
                                                                                                                                                                                                                                                                 effects on 2743
                                                                                                                                                                                                                                                           ribulosebisphosphate carboxylase genes, cDNA nucleotide sequence 1673 ribulosebisphosphate carboxylase, subunits, cDNA, structure, nucleotide sequence
                                                                                                                                                                                                                                                                2383
                                                                                                                                                                                                                                                           cools elongation, DNA biosynthesis, aluminum effects on 6753 seedlings development effects on rRNA 18S, rRNA 26S, nucleotides content 911 sister chromatid exchange, benzene, ethanol, sacchann induction 4173
                                                                                                                                                                                                                                                           chromatin, chloroplasts, RNA polymerase purification, kinetics 6170
chemical modification, tryptophan residues, gene 32 protein, role, binding DNA.
```

Tritium.

decay, formation 5-hydroxymethyl-2'-deoxyundine, DNA, HeLa cells 3730 induction sister chromatid exchange, bone marrow, mice 4158 labelling rRNA 5S, rRNA 16S, ribosomal subunit 30S reconstitution 2237

effects on DNA, RNA molecular weight, weight, thymus, rats 3024 incorporation DNA, hematopoietic system, rats 3025.

Tritrichomonas foetus, medica (culture), medica

DNA, repeated sequence, management of the property of the prop

Trophozoites,
antigens, rRNA, cDNA immunogenicity, Plasmodium falciparum 7639 Tropoelastin,
biosynthesis sites, mRNA, membranes, cell-free system, chickens 6498

protein biosynthesis, Rous sarcoma virus transformation effects on, chick embryos fibroblasts 7176.

Trypanosoma,

oell membranes, antigenic variants, membrane glycoproteins, gene regulation, role rearrangement 6754. clones, cell surface antigens gene expression association transposons 1271

clones, cell surface antigens gene expression association transposons 1271
Trypanosoma brucel,
antigenic variants, DNA, characterization, electrophoresis 5113.
antigens, mRNA 5'-terminus, nucleotide sequence bromology 7096.
cell surface antigens glycoproteins, mRNA nucleotide sequence 870.
cell surface glycoproteins, activation gene expression, nucleotide sequence
association transposition 5267.
cell surface glycoproteins antigenic determinants genes, transformation, gene
expression 6865.

cell surface glycoproteins genes, inactivation, reactivation mechanisms 7510 cell surface glycoproteins genes, restriction endonuclease mapping, gene expression 1719.

expression 1719.

DNA, repeated sequence characterization, association glycoproteins mRNA, 5-terminus 7401.

DNA telomeres, endodeoxyribonuclease modification, antigenic variants 7199. glycoproteins RNA biosynthesis, regulation 2258. mitochondria, cytochrome b genes, unassigned reading frames, DNA nucleotide sequence 326.

sequence 326 repeated sequence, nucleotide sequence, role antigenic variants 7209. mRNA biosynthesis, regulation, role repeated sequence 7125. mRNA genes, 5-terminus nucleotide sequence, comparison Trypanosoma vivax, Trypanosoma cruzi 7408 rRNA genes, nucleotide sequence, hybridization analysis 5950. telomeres, cell surface antigens genes, heterogeneity, gene expression, relationship chromatin structure 1025. telomeres, cell surface glycoproteins genes, cloning, Escherichia coli gene expression, role transposition activation 1155. telomeres, nucleotide sequence modification, antigens genes, RNA biosynthesis 7345.

739.
Italians, repeated sequence, nucleotide sequence, restriction endonuclease mapping 6640. Italiansformation, repression, cell surface glycoproteins gene expression 2529. Itansposons nucleotide sequence 6004
VSG gene, flanking regions, repeated sequence, transposition 7358
Trypenosome brucel brucel,

antigens genes, cloning, gene expression 4779 DNA, restriction endonuclease mapping, hybridization analysis 3185.

DNA, restriction endonuclease mapping, hypondization analysis at to.

Trypanosoma cruzi,
DNA intercalating agents, topoisomerase I, catenation enzymes inhibition 6200
DNA topoisomerase I 2.6-dimethyl-9-hydroxyellipticinium inhibition 1993.
kinetoplasts DNA, restriction endonuclease mapping 6009.
mRNA genes, 5'-terminus nucleotide sequence, companson Trypanosoma brucei,
Trypanosoma vivax 7408.

Trypanosoma gambiense,
African trypanosomiasis, autoimmunity correlation DNA autoantigens, man 4139.
kinetopiasts, nuclei, bleomycin effects on DNA, fluorometry 3751.

Trypanosoma vivax.

DNA, manna vivax.

DNA, manna vivax.

Trypanosoma vIvax, mRNA genes, 5-terminus nucleotide sequence, companson Trypanosoma brucei, Trypanosoma cruzi 7408.

rypsin, proteolysis, kinetics, relationship ribonuclease T1 folding 4091. sensitivity, association histories antigenic determinants, systemic lupus erythematosus, nuclei, erythrocytes, chickens 4140. Trypsin inhibitor (pancreatic), oligodeoxyribonucleotides synthesis, use hybridization analysis, cattle 2828.

Trypsin-like proteinase, activity relationship histone H1 proteolysis, iben hybridization analysis, ca 1-(N-L-Tryptophan)-1-deoxy-D-fructose, nitrosation, induction DNA repair, HeLa cells 1127.

nitrosation, induction blviv repair, freuz cells megaterium 1269, biosynthesis genes kransformation, Bacillus megaterium 1269, biosynthesis genes, transformation, Bacillus mesentericus 3966, biosynthesis fip gene, nucleotide sequence, Caulobacter crescentus 7385, containing, peptides binding nucleosomes core particles, chromatin, fluorescence 5571.

operons, gene products, dnaA gene, mutation, effects on, expression, Escherichia coli 913.

coli 913 residues+role, gene 32 protein binding polynucleotides, phage T4 3490, residues, free radicals chemical malification, role, gene 32 protein binding, DNA, C.D., fluorescence, phage T4 3492. residues, trichloroethanol chemical modification, gene 32 protein, role, binding DNA, phage T4 3491 trpD gene, Bacillus amyloiquetaciens, cloning vectors, Bacillus subtilis 6850, trpE gene, frameshiff mutant, nucleotide sequence, Salimonella typhimurium 3134, trpE gene, trpD gene, nucleotide sequence, Salimonella typhimurium 3134. Tryptophan synthase, trpB gene translation, relationship trpA gene expression, Eschenchia coli 7372. Tryptophan 2,3-dioxygenase, mRNA activity, dexamethasone± glucagon regulation, hepatocytes, rats 1586.

Tryptophanyl-tRNA synthetase, interaction tRNA Trp, conformational analysis, C.D., cattle, yeasts 819, isolation, temperature-sensitive mutant, lung, hamsters 3601 mechanisms, role pyrophosphate, pancreas, cattle 813.

tRNA Trp interaction, tertiary structure, animals 6362

analogs, DNA polymerase substrate specificity, herpes simplex virus 2 infected HeLa cells 4115. Tubercidin.

Tubercian, adenosine analog, synthesis, N.M.R., binding endonuclease 2°-5°-oligo(A) dependent, L. cells, mice 4973 inhibition G phase cell cycle, lymphocytes T 6330.

S-Tubercialinylhomocysteine, effects on mRNA methylation, metabolism, cytoplasm, HeLa cells 4343.

Tubericidin.

IMP derivatives, Schistosomicides, Schistosoma mansoni 3553

Tubers, dormancy, RNA spermine, spermidine, putreseine binding, Helianthus tuberosus 3619 Tubulin,

ubulin,
